

**Time to claim *YOUR* seat
at the table.**

So many things outside your practice environment directly affect your work and livelihood as a doctor. If you want a say in what is happening to your profession today and how it looks tomorrow, then you need to join with other physicians in a strong, unified voice.

TMA is that voice.

TMA is the only organization representing *all* Tennessee doctors, and the only organization with the clout to successfully influence laws, rules and regulations that determine how healthcare is delivered in Tennessee.

Government Affairs

TMA lobbyists carry your message with the lawmakers on Capitol Hill who control statewide healthcare policies.

Regulatory & Judicial Advocacy

TMA amplifies doctors' positions when state agencies make important regulatory decisions, and when court cases impact you and your business.

Insurance Advocacy

TMA stands up against payers' unfair business practices and helps members resolve administrative or payment disputes.

Legal Resources

TMA's in-house healthcare attorneys help members interpret and stay compliant with ever-changing healthcare laws at the state and federal levels.

IMPACT

TMA's political action committee helps build good legislative relationships by supporting candidates who support doctors.

See tnmed.org/wins for a short list of some of our biggest achievements on your behalf or in your defense.

OTHER MEMBER BENEFITS

All Tennessee physicians benefit from TMA's advocacy work, but only those who support TMA through membership have access to exclusive resources and money-saving relationships.

Continuing Medical Education

Physician Leadership Training

Business Resources

I've practiced in several different states during my career and have always been a member of national and state organizations.

None compares to TMA.

They do more and get more results for doctors than any organization I've ever seen, and the staff is always professional and responsive. Every doctor in Tennessee should support TMA.

William R.C. Steward, III, MD
Columbia

STAND UP AND SUPPORT TMA.

Your future depends on it.

The Tennessee Medical Association is a nonprofit advocacy organization representing Tennessee physicians. We advocate for policies, laws and rules that promote healthcare safety and quality for all Tennesseans and improve the non-clinical aspects of practicing medicine.
