Doceri:

Connecting your iPad to a computer using Doceri

From the PC

1. Open the Doceri Desktop application on the computer which are trying to connect to. Click on the ‘Start’ button in the task bar, and then type in ‘Doceri’; you should get a program search result called ‘Doceri Desktop’. Hit ENTER on the keyboard or click on the search result to start the application.

Support Contact: Daniel Gibson, Technology Development Coordinator (gibsondv@etsu.edu; 439-8244)
2. If you are running Doceri Desktop for the first time on this computer then you will be prompted to accept or decline the Doceri EULA. If you have no objections, hit accept. You will then be prompted to enter a password to use when connecting your iPad to this computer. This password is unique to your ETSU account and can be whatever you like. Once you have accepted the agreement and entered your unique password you will be presented with the Connection Dashboard.

3. From the connection dashboard you should immediately notice a large QR code. If you have an iPad 2 or newer, you will be able to scan the QR code to quickly connect to the computer. If you have a 1st generation iPad then you will need the IP address of the computer, which is shown in the bottom left of the connection dashboard window.
On your iPad

1. Open the Doceri app.
2. If you are running Doceri for the first time then you will be presented with an introductory video. You can watch the video or skip it by clicking the X icon/button in the top right of the video window. After leaving the video you will be taken to the Doceri main menu.
3. From the main menu, select the ‘through a computer’ button. This will take you to the ‘Select a Doceri Desktop’ screen.
4. From the ‘Select a Doceri Desktop’ screen, you can connect to a computer using one of two options.
iPad 2 or newer: Select the camera connection icon in the bottom left of the menu. This will activate your iPad’s camera and allow you to scan the QR code on the desktop.

1st Generation iPad: Select the plus icon (to the left of the trashcan icon) in the bottom of the menu. This will prompt you to enter the IP address of the PC, which you can find in the bottom left of the Connection Dashboard on your PC screen.

5. Once you have scanned the QR code or input an IP address, you will be prompted to enter the password for your account. Enter the password you created earlier and tap the ‘Enter’ button. (Note: If you are in the ATS Doceri workshop, the password is ‘eLearning’). Doceri will then attempt to connect to the PC.

6. If all steps were performed correctly you should now see your desktop screen on your iPad in the Doceri app.
