The Pre-Optometry program of study at East Tennessee State University prepares students for application to a 4-year Doctor of Optometry (OD) degree program. The majority of students accepted to a school of optometry have completed a bachelor’s degree.

**Careers in Optometry**

Optometrists examine the eyes and other parts of the body related to vision. They also diagnose, treat, and manage diseases, injuries, and other disorders of the eyes. They prescribe contact lenses or eyeglasses as needed.

Many optometrists own their own practices and may spend a considerable amount of time on general business activities such as hiring employees and ordering supplies.

Some optometrists spend much of their time providing specialized care, particularly if they are working in a group practice with other optometrists or doctors.

**Employment Opportunities**

http://www.bls.gov/ooh/healthcare/optometrists.htm

**Timeline**

**FRESHMAN SUMMER SOPHOMORE SUMMER JUNIOR SUMMER SENIOR**

Complete prerequisite requirements.

Build professional relationships with professors, advisors, and professionals for letters of recommendation.

Community service / volunteer work / job shadowing / engagement in student organizations. Document experiences.

Choose a major.

Gain research experience.

Campus visits to professional schools of interest

Collect letters of recommendation.

Committee Evaluation

Take OAT.

Application

Interviews

**Pre-optometry is not a major.** Therefore, you must choose a major (and minor, if appropriate) by the time you earn 60 credit hours. You do not have to major in a science field. Choose a course of study that interests you. Optometry schools look for applicants who are well-rounded, who reason and communicate well, and have demonstrated empathy. It is true that students who have an extensive science background have an easier time with the basic science components of optometry school than do non-science majors. Optometry schools do not assume, however, that you have had any courses other than those required.

**You must meet with your advisor each semester.** You are required to meet with your pre-professional and major advisors each term before registering for the next semester. Students who receive scholarships or participate in specialized ETSU programs (such as athletics or Honors College programs) must also seek advisement from those departments. Serious consequences can occur if students fail to meet with advisors (e.g., failure to graduate on time, missing appropriate courses to prepare for the OAT, etc.).

**Advisement**

Medical Professions Advisement Office
423.439.5602
ARC in Culp Center
What does it take to get into optometry school?

**GPA**

3.76-3.14

**OAT Score**

348-300

The OAT is a computerized exam administered through the Optometric Admission Testing Program. This test is required to be considered for admission to most optometry schools. Examinees are allowed to take the OAT an unlimited number of times but must wait at least 90 days between test dates. Students should not take the OAT until they have completed all prerequisite courses.

</tbody>
</table>

*Different schools may have different prerequisite requirements. It is up to the student to research and ensure the required courses are completed before application to the preferred school(s) of interest. **General Physics (PHYS 2010/11 and PHYS 2020/21) may be substituted, however, Technical Physics is recommended. *A two-semester sequence of organic chemistry is a prerequisite for BIOL 4147/57 or BIOL 4167/77. *These classes may be required by some optometry schools.

---

### Suggested 2-year schedule for pre-optometry students

**Fall**

- CHEM 1110/11
- BIOL 1110/11
- MATH 1530
- ENGL 1010
- PREH 1350

**Spring**

- CHEM 1120/21
- BIOL 1120/21
- MATH 1720/1910
- ENGL 1020
- ELECTIVE

**Fall**

- CHEM 2010/11
- PHYS 2110
- SPCH*
- PSYC 1310
- ELECTIVE

**Spring**

- CHEM 2020/21
- PHYS 2120
- ELECTIVE
- ELECTIVE
- ELECTIVE

*Students should maintain a minimum of 17-19 credit hours per semester.

*Consult with your advisor before choosing a speech course.
STUDENT ORGANIZATIONS

Alpha Epsilon Delta – National Pre-Health Honor Society (AED)
AED functions as a health pre-professional honor society encouraging excellence in scholarship. It emphasizes the importance of health education and promotes cooperation and contact among professionals.

Pre-Optometry Student Organization (POSO)
POSO is a club designed to help pre-optometry students learn about the field, get involved, meet local optometrists, and become competitive applicants to optometry school.

Health Occupations Students of America (HOSA)
HOSA provides students with knowledge and understanding of various healthcare careers. It also provides students opportunities to compete against each other in various state and regional events to learn about current health issues.

Minority Association of Pre-Health Students (MAPS)
This organization is open to all ETSU students. MAPS aims to provide students with valuable opportunities in the community to enhance their knowledge of the healthcare field they are planning to enter. Opportunities include job shadowing, volunteering, and research. MAPS is also geared toward forming friendships among members.

What else can I do to strengthen my application to optometry school?

RELATIVE EXPERIENCE
Students are encouraged to explore the field of optometry either through employment or as a volunteer. Optometry schools want to know that a student has worked in the field, observed what is involved, and still has the desire to continue in that profession. Students should gain as much experience as possible without sacrificing grades.

EXTRACURRICULARS
The admissions committees of optometry schools are interested in seeing a range of extracurricular activities, especially those demanding a significant leadership role. Students should demonstrate their ability to balance full academic schedules with extracurricular involvement on and off campus and/or through employment opportunities. ETSU has many organizations that students can join. Students should visit the SORC located on the first floor of the Culp center or www.etsu.edu/sorc for more information regarding extracurricular activities. It is not beneficial to simply join an organization; you must demonstrate leadership qualities!

VOLUNTEER EXPERIENCE
Optometry schools are looking for candidates who express a commitment to community service. Students should seek volunteer projects that focus on giving back to the community. Students are encouraged to look for volunteer opportunities related to the optometry field.

ONLINE ETIQUETTE
Please consider personal email addresses when corresponding with professional schools. First impressions are often based on correspondence and email addresses should be appropriate for professional communication. Messages and images sent electronically are reflections of judgment and potential suitability for professional careers. Inappropriate behaviors shared on an accessible venue can be viewed and shared by anyone, possibly compromising your chances of admission to optometry school.
