Preface

The Handbook for the Doctoral Program* in Clinical Psychology (hereafter referred to as the "Handbook") provides basic information, guidelines, policies, and procedures pertaining to the Clinical Psychology Doctoral Program at East Tennessee State University (ETSU). It is designed for students in all years of the program. Most questions about procedures and guidelines can be answered by a careful reading of this Handbook. This Handbook and its supplements, when issued, contain the current regulations and requirements for graduate study leading to the Ph.D. in Clinical Psychology as well as the policies and procedures of the Program. There are additional requirements and/or procedures that are found in the ETSU Student Handbook and the ETSU Graduate Student Handbook. **All students are responsible for knowing the information in these documents, and enrollment is considered an acceptance of all conditions specified in these documents.**

Policies and guidelines may change during enrollment in the graduate program, and these changes may apply to you. Although the program makes every effort to provide updated, accurate, and appropriate information about the program requirements, this Handbook is immediately dated by even the most minor changes. Consequently, students should check with their advisor and/or the Director of Clinical Training (DCT) with respect to any problems or ambiguities that might not be addressed, or about recent changes that do not appear in the most recent edition of the Handbook. This Handbook is meant to be used as a guideline for both students and faculty.

*The Psychology Department at ETSU offers a PhD degree program in Psychology with two concentrations: Experimental and Clinical, and the use of the term “program” throughout this document is not meant to imply that there are two separate PhD degree programs. The term “program” throughout this document is in keeping with the standard of practice in utilizing the broader use of the term.*
Unanticipated problems or unique situations may occur, however, and are resolved through mutual consultation between the student, the appropriate faculty member or advisor, and the Graduate Training Committee who ultimately make decisions guided by their collective and best professional judgment.

Department Head: Wallace Dixon, Jr.

Director of Clinical Training: Peggy J. Cantrell
East Tennessee State University

Handbook

ETSU is a Tennessee Board of Regents (TBR) institution and is fully in accord with the belief that educational and employment opportunities should be available to all eligible persons without regard to age, gender, color, race, disability, veteran status, national origin, religion, sexual orientation, or political affiliation.

The Department of Psychology at East Tennessee State University has established a program of clinical training particularly designed to equip students with tools to address the behavioral and mental health needs of people located in the underserved communities surrounding the university. These communities comprise economically disadvantaged and strongly faith-based individuals located within rural Appalachia. In this way, the entire premise of the program is diversity-centered. Yet these three dimensions of individuality are but a subset of a much larger multidimensional spectrum of diversity with which the Department, through formal and informal experiences, attempts to ensure familiarity and sensitivity among all its staff and students. Included in this broader spectrum are, but are not limited to, race, ethnicity, age, sex, gender, sexual orientation, religious orientation, religion, disability status, socioeconomic status, and national origin. Below we describe the department’s efforts to infuse attention and sensitivity to diversity through (1) a long-term, systematic plan for the recruitment and retention of diverse staff and students; (2) education of students; and (3) establishment of a climate of respect.

Through 1) non-discriminatory policies on recruitment and retention of students, faculty, and staff, 2) curriculum and field placements that emphasize cultural competence, 3) in non-discriminatory policies and operating conditions, and 4) avoidance of actions that restrict program access on grounds irrelevant to success, we endorse and attempt to emulate the APA Ethical Principles and Code of Conduct (APA, 2002).

East Tennessee State University

East Tennessee State University (ETSU) is one of the principle campuses governed by the Tennessee Board of Regents. Since it opened in 1911 as a two-year normal school educating teachers, ETSU has grown into a major university attracting students from all 50 of the United States and numerous other countries. A diversified institution, ETSU is comprised of eight colleges and schools. With a 350-acre main campus in Johnson City along with centers in Kingsport and Elizabethton and sites in Bristol and Greeneville, ETSU maintains a semester enrollment of more than 15,000 students and serves 5,000-10,000 persons annually through continuing education and extended service programs.

Institutional Purpose

ETSU strives to create a community of learning that actively advances the fundamental values of higher education – advancing the free exchange of ideas, curiosity and the desire for learning, critical thinking and self-reflection, ethical behavior, academic freedom, and appreciation of human diversity.

ETSU embraces its regional setting and proudly reflects its traditional roots and Appalachian heritage. The university is recognized for its unique focus on health sciences. ETSU's division of Health Sciences, composed of the colleges of Medicine, Nursing, and Public and Allied Health, seeks to support the health and wellness of the people of Southern Appalachia, with special emphasis on meeting the needs of rural populations. As a doctoral-research intensive university, ETSU is committed to teaching based on scholarship and to advancing programs of research and creative activity that improve the quality of life in the region, state, nation, and the world. The university seeks to provide an environment in which faculty, students, and staff are encouraged to produce and disseminate the highest quality scholarly and creative work. To sustain and enhance this environment, ETSU seeks to secure financial support for research and creative programs through partnerships with local and broader communities, and through grants from government and private organizations. ETSU strives to achieve optimal efficiency in its use of resources while always seeking to offer instructional, research, and public service programs of the utmost excellence. The university recognizes that employees are its most valuable resource and students its most important constituents. Putting “people first” is the foremost value guiding the university’s operations.
Institutional Values

ETSU pursues its mission through a student-centered community of learning reflecting high standards and promoting a balance of liberal arts and professional preparation, continuous improvement, and based on core values where:

**People** come first, are treated with dignity and respect, and are encouraged to achieve their full potential;

**Relationships** are built on honesty, integrity, and trust;

**Diversity** of people and thought is respected;

**Excellence** is achieved through teamwork, leadership, creativity, and a strong work ethic;

**Efficiency** is achieved through wise use of human and financial resources; and

**Commitment** to intellectual achievement is embraced.

Student Conduct, Bill of Rights and Responsibilities

University students are citizens of the state, local, and national governments and of the academic community, and are, therefore, expected to conduct themselves as law-abiding members of each community at all times. Admission to an institution of higher education carries with it special privileges and imposes special responsibilities apart from those rights and duties enjoyed by non-students. In recognition of the special relationship that exists between the institution and the academic community which it seeks to serve, the Tennessee Board of Regents has authorized the president of the university to take such action as may be necessary to maintain campus conditions and preserve the integrity of the institution and its educational environment.

Pursuant to this authorization, the TBR has developed regulations which are intended to govern student conduct on the campus. In addition, students are subject to all national, state, and local laws and ordinances. If a student’s violation of such laws or ordinances also adversely affects the institution’s pursuit of its educational objectives, the institution may enforce its own regulations regardless of any proceedings instituted by other authorities. Conversely, violation of any section of the TBR regulations or university rules may subject a student to disciplinary measures taken by the institution whether or not such conduct is simultaneously a violation of state, local or national laws. A complete statement on institutional student disciplinary rules and procedures can be found in the student handbook located in the ETSU telephone directory and on the ETSU website.
Graduate Program in Clinical Psychology

Introduction

This document summarizes the current department procedures and regulations governing graduate work in the Department of Psychology at ETSU. The material contained herein is not intended to duplicate or substitute for other regulations that are contained in the ETSU Graduate Catalog [http://www.etsu.edu/reg/catalog/graduate.aspx](http://www.etsu.edu/reg/catalog/graduate.aspx).

Rather, the present material supplements and extends more general University-level requirements. All students should be familiar with the present information as well as with the Graduate Catalog. Questions pertaining to any of these items should be directed to the Psychology Department Chair or the Director of Clinical Training in Psychology.

Program Training Model, Philosophy and Mission Statement

The clinical psychology program is guided by the scientist-practitioner model and places a strong emphasis on research and interdisciplinary clinical training. Though diverse in respect to methods of inquiry and areas of study, the faculty is of one mind in promoting scientific inquiry as the foundation of clinical psychology. The program’s philosophy also emphasizes the respect for and understanding of cultural and individual diversity in policies for recruitment, retention, the development of faculty and students, and in the curriculum and filed placements. The program has nondiscriminatory policies and operating procedures, and it avoids any actions that would restrict program access or completion on grounds that are irrelevant to success in graduate training or the profession.

The primary mission of the articulated master's/doctoral program in Clinical Psychology at ETSU is to provide training in clinical psychology emphasizing rural behavioral health and practice in the context of integrated primary health care. ETSU has a uniquely cooperative relationship with its surrounding community and region. Because of this relationship the program is unique in what it can offer students in the field of health services psychology.
All students receive a curriculum of general clinical training as well as training in the basic science of psychology. Thus, the first two years of the program are highly structured. Due to the emphasis in primary care and rural health practice as well as adherence to the generalist model of training, the advanced coursework is more structured than some programs in clinical psychology, but students are afforded the opportunity for individualization through electives, research emphasis, and externship placements.

The program is designed for full-time study only as a 5-year post-baccalaureate articulated MA/PhD program, with the fifth year being an off-campus full-time internship in keeping with APA/APPIC requirements.

Our Diversity Plan for recruitment, retention, non-discriminatory policies, and development of faculty and students is delineated in Appendix G. As a general orientation, we engage in actions that indicate respect for and understanding of cultural and individual diversity. We pride ourselves on establishing a program of clinical training designed to equip students with tools to particularly address the needs of communities surrounding the university, which can be described as economically disadvantaged and located within rural Appalachia – two characteristics that fall under a broad definition of diversity that encompasses not only race/ethnicity, gender, sexual orientation, and religion but also culture, location (e.g., rural), and economic status. In this way, the entire premise of the program is diversity-centered. In addition, the program and department provide diversity training opportunities for students, and promote a climate of tolerance of diversity for both students and faculty through education and research, and other campus activities. Through non-discriminatory policies on recruitment and retention of students, faculty, and staff, curriculum and field placements that emphasize cultural competence; in non-discriminatory policies and operating conditions, and avoidance of actions that restrict program access on grounds irrelevant to success, we endorse and attempt to emulate the APA Ethical Principles and Code of Conduct which states that:

“Psychologists respect the dignity and worth of all people, and the rights of individuals to privacy, confidentiality, and self-determination. Psychologists are aware that special safeguards may be necessary to protect the rights and welfare of persons or communities whose vulnerabilities impair autonomous decision making. Psychologists are aware of and respect cultural, individual, and role differences, including those based on age, gender, gender identity, race, ethnicity, culture, national origin, religion, sexual orientation, disability, language, and socioeconomic status and consider these factors when working with members of such groups. Psychologists try to eliminate the effect on their work of biases based on those factors, and they do not knowingly participate in or condone activities of others based upon such prejudices” (APA, 2002).
Program Goals and Objectives

Goal #1: Prepare students as independent scientist-practitioners in clinical psychology

Objective 1-1: Provide students with a broad and general foundation in psychological science to enable them to understand the history of thought and development, methodological, and theoretical foundations as they inform the current practice of clinical psychology;

Objective 1-2: Provide students with the bases to be skilled in research design, methods, execution, and literature evaluation and integration to stay abreast in the field and to make contributions;

Objective 1-3: Provide students with theories and methods in diagnostic assessment, formulating and implementing interventions, and evaluating the efficacy of interventions.

Goal #2: Prepare students for entry level clinical practice in rural and primary care settings

Objective 2-1: Provide students with cultural competence in working with rural populations and community-based practice

Objective 2-2: Provide students with skill development for inter-professional collaboration, communication, and consultation

Objective 2-3: Provide students with knowledge and skill development in models of evidence-based assessment and intervention especially pertinent to primary care settings

Objective 2-4: Provide students with knowledge and skills in professional supervision and peer consultation

Goal #3: Prepare students for ethical and culturally competent clinical practice

Objective 3-1: Provide students with an understanding of the current professional ethics and standards of behavior;

Objective 3-2: Provide students with an understanding of current federal and state laws on the practice of psychology;

Objective 3-3: Provide students with an understanding of the literature on individual and cultural differences.

Full-time Faculty Listing and Research Interests

A. Core Clinical Faculty

Peggy Cantrell  
PhD 1982, University of Southern Mississippi. Professor and Director of Clinical Training. Violence in marital and dating relationships; adult, couple, and women’s health

William Dalton  
PhD 2006, University of Memphis. Assistant Professor. Health promotion and health risk behaviors among youth; Pediatric overweight
prevention/intervention; Smoking prevention/cessation; Integrating family systems ideas into treatment of pediatric illnesses

Chris Dula  PhD 2003, Virginia Tech.  Associate Professor.  Traffic safety, aggression and risk-taking, test and measure development

Jon Ellis  PhD 1989, University of Southern Mississippi.  Professor.  Clinical child psychology, suicide and reasons for living

Jameson Hirsch  PhD 2003, University of Wyoming.  Assistant Professor.  Optimism, pessimism and hopelessness as predictors of suicidal ideation in college students

Jodi Polaha  PhD 1998, Auburn University.  Associate Professor.  Behavioral pediatrics, rural mental health, integrated behavioral health and primary care, behavioral tele-health, and ADHD

Jill Stinson  PhD 2006, University of Arizona.  Assistant Professor.  Evidenced-based treatment for sex offenders, self-regulation

Jon Webb  PhD 1998, California School of Professional Psychology, LA.  Associate Professor.  Forgiveness, spirituality, addiction

B. Associated Program Faculty

Ginni Blackhart  PhD 2006, Florida State University.  Associate Professor.  Social Psychology.  Physiological/biological, behavioral and affective reactions to social rejection

Andrea Clements  PhD 1991, University of Alabama, Professor.  Developmental Psychology.  Effects of stress on health, particularly during pregnancy; Effects of religiosity on health, particularly as a stress buffer

Wallace Dixon, Jr.  PhD 1990, Miami University.  Professor and Department Chair.  Developmental Psychology.  Temperamental difficulty and language acquisition

Chad E. Lakey  PhD 2008, University of Georgia.  Assistant Professor.  Egotism, decision making, psychological health and well-being

Matt McBee  PhD 2006, University of Florida.  Assistant Professor.  Quantitative Psychology.  Propensity score analysis, hierarchical linear models,
longitudinal data analysis, structural equation modeling, psychometrics, psychology of giftedness

Matt Palmatier  PhD 2004, University of Nebraska. Assistant Professor. Experimental Psychology. Behavioral Neuroscience; neuroscience of addictions

Stacey Williams  PhD 2004, Kent State University. Associate Professor. Social and Quantitative Psychology. Stigma and social interaction/support, partner violence and psychosocial functioning

C. Affiliated Faculty and Staff

John Paul Abner  Ph.D., 1996, University of Florida-Gainesville. Clinical Supervisor at the Behavioral Health and Wellness Clinic

Kerry Holland  Ph.D., 1994, University of Missouri. Director of the Behavioral Health and Wellness Clinic. Women's issues, GLBT issues, and use of meditation in psychotherapy

Peggy Cantrell, Director of Clinical Training:  423-439-6660
Behavioral Health and Wellness Clinic:  423-439-7777

Admission Requirements

To be accepted into the Clinical program students must apply for, and engage in, full time study. Applicants to the MA/PhD degree program are evaluated once each year, only for admission in the fall semester; applicants are not considered for spring admission. All application
information must have been postmarked by December 31st for a candidate to be considered for admission in the following fall term. Students are admitted from two applicant pools, dependent upon level of preparation. All applications are considered with the expectation that the applicant will pursue the PhD. The two applicant pools are:

1. Students holding a baccalaureate degree from a regionally accredited institution will be considered for the MA/PhD program. Students admitted to the Clinical Psychology PhD program complete the requirements for an MA in Clinical Psychology (42 hour program of study with thesis) en route to PhD completion. Students seeking a terminal master’s degree will not be admitted.

2. Students already holding the MA or MS in psychology from a regionally accredited institution may also apply to the MA/PhD program. The master’s degree must be commensurate with the MA program in Clinical Psychology at ETSU and involve the successful completion of an empirically-based thesis project. Students possessing a master’s degree without an empirically-based thesis will be required to complete an empirically-based thesis before being admitted to doctoral candidacy. All students, regardless of entry level must complete the curriculum requirements reflective of the broad and general science of psychology, as well as those reflective of the scientific, methodological, and theoretical foundations of the clinical practice of psychology and our specific training mission.

The following application materials are required:

1. Completed University application forms;
2. A grade point average of at least 3.00 (based on a 4.00 scale) in undergraduate and/or graduate level work overall and in Psychology courses;
3. A minimum of 18 semester hours in undergraduate psychology, including courses in statistics, experimental design, personality, social, cognitive, developmental, and abnormal psychology. Students lacking some of these prerequisite courses, but presenting an exceptional undergraduate record, may be granted graduate admission, but they will be expected to remove all undergraduate deficiencies during their first academic year;
4. GRE scores (Verbal, Quantitative, and Written Analysis) are required for application and are taken into account in the admissions process;
5. Letters of recommendation from at least three persons familiar with the applicant’s academic background, aptitude for graduate study, and future performance as a psychologist;
6. A personal statement of 500-750 words indicating the applicant's academic experiences, research interests, and career goals. Prior undergraduate research interests and involvement are weighted heavily as is an interest and commitment to working in a rural and/or primary care setting;
7. A willingness to be interviewed by members of the admission committee.

**Offers and Acceptances**

First-round offers are made in writing prior to April 1st. A response is not required until April 15th (or the first Monday after April 15th, if April 15th falls on a weekend). Between April 1st and the decision date, offers may be made to students over the phone when a position opens. These verbal offers are official, but will be followed by a written confirmation within 48 hours. After being made, offers cannot be withdrawn by the university until after the decision date and then can be withdrawn only if the student fails to respond to the offer by the decision date. After the April 15th decision date, if there are more open slots, offers may be made. If an offer is made after the decision date, the length of time to make a decision on the offer will be clearly stated. The length of time may vary, but students will have at least a week in which they may visit the university before making a decision.

**Changing Concentrations**

Students must designate either the Experimental or the Clinical concentration of the PhD Program in Psychology upon application, and are admitted into a specific concentration. A student desiring to change concentrations must formally reapply to the program and concentration. Changing concentrations within the PhD Psychology program CANNOT be accomplished by filing a Change of Program of Study form with the School of Graduate Studies.

**Transfer of Credit**

Students with graduate credit earned at another institution, upon matriculation at ETSU, may petition to have these credits applied toward their degree requirements at ETSU. While such
credits are not automatically transferred and must be approved by the Director of Clinical Training and the School of Graduate Studies, a maximum of 9 semester hours earned elsewhere could be applied. See the *ETSU Graduate Catalog* for more details. Though students holding a master’s degree may not be required to complete a second master’s degree, they should expect to have to complete substantial components within the master’s, in that all required courses have to be accepted as equivalents or taken within the program. Clerkship and Practicum cannot be waived.

**Waiving Course Requirements**

Students may petition to waive specific courses through petition. The designated course instructor, along with the DCT will review petitions. Students must present evidence of completion of a similar course to that in the petition: transcript evidence of a final course grade of a “B” or better and a course syllabus constitute minimal documentation, but additional work products or course materials may be required. The instructor will make a recommendation to the DCT.

**Empirical Thesis Acceptance**

All students must complete an empirically-based thesis. Students entering the program who have already completed a master’s thesis must have that thesis accepted by a three member faculty committee. The student is responsible for submitting a copy of the thesis to the DCT for dissemination. The thesis is to be submitted, reviewed, and either accepted or rejected during the student’s first semester of study to allow adequate time for a new thesis project to be conducted if required. In any case, the student must complete the written and oral components of the clinical capstone project and preliminary project prior to being admitted into doctoral candidacy.

**Curriculum**

**Master’s Requirements (47 hours):**

- PSYC 5000 – Broad and General Foundations in Psychology, 3 hours
- PSYC 5010 – Advanced History & Systems of Psychology, 3 hours
- PSYC5040 -- Rural Health Research and Practice, 3 hours
- PSYC5100 -- Legal and Ethical Issues in Psychology, 3 hours
PSYC5210 -- Statistical Methods, 3 hours
PSYC5220 -- Personality and Psychotherapy Models, 3 hours
PSYC5410 -- Correlation & Multiple Regression, 3 hours
PSYC5707 -- Advanced Behavioral Neuroscience, 3 hours
PSYC5817—Introduction to Psychological Measurement, 3 hours
PSYC5825 -- Psychopathology, 3 hours
PSYC5830 -- Psychological Assessment I: Adult, 3 hours
PSYC5850 -- Psychological Assessment II: Children, 3 hours
PSYC5870 – Clinical Interviewing Techniques, 3 hours
PSCY5910 -- Clinical Psychological Clerkship, 2 hours
PSYC5960 -- Thesis, 6 hours

Doctoral Requirements (51-52 hours):

PSYC 6600 – Rural Case Oriented Learning & Preceptorship, 3 hours
PSYC 6870 – Evidence Based Interventions, 3 hours
PSYC 7000 – Doctoral Preliminary Project, 3 hours
PSYC 7010 – Clinical Psychology Practicum & Seminar, 1 hour per term for a total of 5 hours
PSYC 7100 – Primary Care Psychology I, 3 hours
PSYC 7110 – Primary Care Psychology II, 3 hours
PSYC 7500 – Cultural Anthropological Applications to Rural Practice, 3 hours

One of the following: 3-4 hours:
NRSE 5303 Psychopharmacology, 3 hours
\textit{OR}
PHYT 6102 Pathophysiology, 4 hours
\textit{OR}
PSYC 5407 Psychopharmacology, 3 hours

PSYC 7910 – Externship, 1 hour per term for a total of 4 hours
PSYC 7960 – Doctoral Dissertation in Psychology, 12 hours
PSYC 7980 – Pre-Doctoral Internship, 3 hours
PSYC XXXX – Electives, 6 hours
Course Descriptions

PSYC 5000 – Broad and General Foundations in Psychology (3 credits) Prerequisites: 18 hours in undergraduate psychology. This course is designed to provide foundational knowledge, as required by the APA Commission on Accreditation, for graduate training in professional psychology, with a specific focus on the areas of human development, social aspects of behavior, and cognitive/affective aspects of behavior. (spring)

PSYC 5010 -- Advanced History & Systems of Psychology This course reviews the growth of the Science of Psychology (hereafter referred to as the ‘field’ or ‘discipline’), including principal systems, key theoretical debates and developments, and contemporary views on the history of the field. Prominent relevant figures pre-dating the founding of the discipline as an independent academic enterprise will be covered as will those formally within the discipline. (fall)

PSYC 5040 – Rural Health Research and Practice (3 credits) Practical applications of community-based and participatory research methodology and theory relevant to healthcare services. Interdisciplinary student teams of health related disciplines develop proposals for community health projects and specific plans to assess achievement of objectives. Students learn about interdisciplinary working relationships among health professionals, issues associated with research involving human subjects, data collection methods and instruments, and analyses of health status indicators. An online component on theory and research methodologies is included. (spring)

PSYC 5100 - Legal and Ethical Issues in Psychology (3 credits) This course is a seminar designed to acquaint students with the American Psychological Association’s Code of Ethical Conduct, the Tennessee Psychological Association’s Code of Ethical Conduct, and the Tennessee State Legal Code pertaining to practice and research in Psychology. A variety of ethical and legal issues will be covered in the areas of teaching, research, clinical practice, and supervision. (fall)

PSYC 5210 - Statistical Methods (3 credits) Prerequisites: Psychology 2810. This course includes an overview of inferential statistics including topics such as probability, hypotheses testing, population sampling, and analysis of regression and prediction. Both parametric and nonparametric tests are reviewed. Parametric tests include the Z-test, t-test, Sandler A, Analysis of Variance, Analysis of Covariance, and the Newman-Keuls test. Nonparametric tests include the Chi square test, Sign test, Wilcoxon test, Mann-Whitney test, Kruskal-Wallis test, and the Friedman test. Students learn the purpose of these tests and their strengths and limitations. (fall)

PSYC 5220 - Personality and Psychotherapy Models (3 credits) Prerequisites: Psychology 4100. The purpose of this course is to provide a graduate-level exploration of traditional models of psychotherapy and associated personality theories. Its intent is to consider in some depth specific aspects of normal and abnormal interpersonal adjustment and to provide a basis for the student’s
own thinking about how people develop and come to have problems as well as models of psychotherapeutic change. This course is based in reading, discussion, and presentation of course material from textbook and primary sources. (spring)

**PSYC 5410 – Correlation & Multiple Regression** (3 credits) This course will provide a detailed overview of correlational and multiple regression procedures as used in contemporary psychological research. (spring)

**PSYC 5707 - Advanced Behavioral Neuroscience** (3 credits) A laboratory-based course outlining how the brain interacts with the rest of the body to determine our behavior. Lecture, discussion, and laboratory sessions are integrated to introduce students to modern methods of psychophysiological research as it applies to neuroanatomy, neurophysiology, neuroendocrinology, and biofeedback instrumentation. Areas covered will include the physiological bases of learning, memory, sleep, dreaming, emotion, psychopharmacology, and psychopathology. Classroom discussions will be augmented with readings from recent research articles. (spring)

**PSYC 5817 – Psychological Measurement** (3 credits) A history and overview of the standardized evaluation methods commonly used in the assessment of individuals and groups. Topics covered are validity, reliability, and statistical concepts for the evaluation and interpretation of test data. The student is given an overview of ability tests, interest tests, and personality tests. Experience is provided in the administration, scoring, and interpretation of selected tests.

**PSYC 5825 – Psychopathology** (3 credits) Prerequisites: Abnormal psychology and permission of instructor. Course is an advanced course in psychopathology aimed at an in-depth review of the DSM as well as conceptualization of diagnosis and treatment processes in clinical psychology. (fall)

**PSYC 5830 - Psychological Assessment I: Adults** (3 credits) Prerequisites: Psychology 4100 or PSYC 5220, a course in statistics, and permission of the instructor. Administration, scoring and interpretation of the major individual intelligence, cognitive screening, and personality assessments for adults. (fall)

**PSYC 5850 – Psychological Assessment II: Children** (3 credits) Prerequisite(s): Psychology 5220 and permission of the instructor. The aim of this course is to familiarize students with a variety of intelligence and personality assessment instruments commonly used in clinical mental health settings with children and to provide experience in administration, scoring, and interpretation of these instruments. (spring)

**PSYC 5870 – Clinical Interviewing Techniques** (3 credits) Prerequisites: Permission of the instructor. The basic skills of clinical interviewing will be covered in-depth, and the topics of mental status evaluations, diagnostic interviewing, presenting problem assessment, historical information gathering, suicide assessment, issues of confidentiality, documentation, interpersonal and intrapersonal dynamics, and general theoretical orientations will also be covered. Students will be
taught fundamental interviewing skills through didactic seminars, extensive role playing, and through videotaped interviews as part of their co-participation in Communication Skills for Health Professionals. (fall)

**PSYC 5910 - Clinical Psychology Clerkship** (1 credit, repeatable)  *Prerequisites: Permission of the instructor is required for enrollment in this course.* Four hours per week of supervised field placement in a role of observer or observer participant, for a total of 60 hours of on-site placement.

**PSYC 5960 – Thesis** (6 credits) *Prerequisite(s): Permission of instructor.* A research project developed and documented under the supervision of a faculty committee. The research project is documented in the form of a thesis.

**PSYC 6600 – Rural Case Oriented Learning & Preceptorship** (3 credits) The general purpose of this course is to provide students with experiential learning opportunities in primary care psychology. Experiential learning will include practice in engaging in brief, evidence based assessment, conceptualization, and physician consultation; supervision/feedback regarding specific skill acquisition in these areas with actors; and on-site practice/feedback in these areas with physicians.

**PSYC 6870 - Evidence-based Interventions** (3 credits) *Prerequisite(s): Permission of the instructor is required for enrollment in this course.* This course will provide a detailed overview of evidence-based psychological interventions for common adult disorders (with some overlap into adolescent/childhood disorders). Empirically supported treatments and cognitive-behavioral approaches will be particularly emphasized. Major topics covered in this class will include: perspective on valid assessment; intervention approaches with empirical support; differing modes of treatment (i.e., couples therapy, group therapy); and the application of empirically supported treatments in various settings such as those found in medical primary care and mental health center sites.

**PSYC 7000 - Doctoral Preliminary Project** (3 credits) The Preliminary Examination Project will serve as an evaluation of qualification for doctoral candidacy. The Preliminary Examination Project takes the form of a scholarly written product which will make a substantive and original contribution to our scientific understanding of some area of psychology, broadly construed, including development and submission of a grant proposal, preparation and submission of a peer-reviewed empirical, conceptual or review article for publication, or the development and completion of a pilot research project.

**PSYC 7010 - Clinical Psychology Practicum and Seminar** (1 credit repeatable to 5 ) This course provides clinical psychology doctoral students with clinical training under the supervision of a departmental faculty member. Direct clinical services, including assessment, consultation, and intervention are provided by the advanced students under the auspices of the ETSU Behavioral Health and Wellness Clinic. Successful completion of one semester of this course is a pre-requisite to enrolling in PSYC 7910 Clinical Psychology Externship.
PSYC 7100 - Primary Care Psychology I (3 credits) This course is an in-depth exploration of the psychologist in primary care settings with emphasis on the multiple roles of psychologists in those settings, an understanding of prevention and wellness, developing and maintaining collaborative relationships with healthcare providers, understanding of medical terminology, referral processes and time pressure demands, and other pertinent issues.

PSYC 7110 - Primary Care Psychology II (3 credits) Prerequisite: PSYC 7100 Primary Care Psychology I. This course is the sequel to PSYC 7100. It is designed to provide the advanced student with a comprehensive analysis of the public policies, clinical trends, and empirical literature relevant to the provision of behavioral and mental health services within an integrated primary care model with emphasis on rural and frontier areas. The psychologist’s role in providing assessment of common primary care problems and in providing interventions in primary care will be thoroughly explored.

PSYC 7500 - Cultural Anthropological Applications to Rural Practice (3 credits) This course examines beliefs about illness, healing, and the body with an emphasis on cultural influences. Lectures and readings will use case materials drawn from North America, Africa, Central and Latin America, the Pacific, and Asia. The course will begin by distinguishing physical “disease” from the cultural understandings of “illness” and will explore the ways that cultural conceptions shape the experience of illness and mental illness. Cross-cultural examples will be utilized to explore culturally defined perceptions and definitions of mental disorders.

PSYC 7910 - Clinical Externship (1 credit repeatable to 4) Prerequisite: Permission of the instructor is required for enrollment in this course. One day per week in a supervised field experience, for a total of 120 clock hours per term.

PSYC 7960 - Doctoral Dissertation in Psychology (3 credits, repeatable to 12) By arrangement with student’s Primary Academic Advisor.

PSYC 7980 - Pre-Doctoral Internship (1 credit, repeatable to 3) Full-time clinical psychology internship following the guidelines of the American Psychological Association and the American Psychology Internship Committee. Must have approval of the Director of Clinical Training to enroll.

PMNU 5303 – Psychopharmacology (3 credits) Prerequisites: Admission to the master’s nursing program or permission of instructor. This course is designed to familiarize health profession students with the basic principles of psychopharmacology and to explore medications used to treat psychiatric disorders. The physiological basis of mental illness will be reviewed and the pharmacologic, pharmacodynamic principles of medications used in mental health care examined.

PHYT 6102 - Pathophysiology (4 credits) This course includes a survey of the clinical signs, symptoms, and etiologies of the major diseases of all systems of the human body. Principles of
diseases affecting the different organ systems with clinical relationships in physical therapy are studied. (spring)

**Electives**

**PSYC 7300 - Mental Health Care Consultation/Administration** (3 credits) This course focuses on health policy and health care functioning as it applies to mental health services and integrated primary care with specific focus on the roles of the psychologist as health care administrator and consultant. Sociopolitical features of the health care system, the role of primary care in our current health care system and differences from the mental health system, and similarities and differences in various primary care settings are included.

**PSYC 7400 - Family Psychology** (3 credits) This course addresses processes that take place in families and other close relationships. Emphasis is placed on evaluating current research on family dynamics within and across generations and on the application of research findings to assessment of family dynamics in clinical settings.

**PSYC 7410 - Advanced Child Psychopathology** (3 credits) This course is an advanced course in psychiatric disorders of childhood and adolescence. Focus is not only on diagnostic criteria used in identifying these disorders, but on normal and abnormal development models. Methods of assessing childhood behavior problems, including clinical interview of child and parent, parent and child checklists, and structured observation are covered, as well as the most effective treatment strategies.

**PSYC 7420 - Substance Abuse Psychology** (3 credits) This is an advanced course covering theoretical perspectives, research, and psychological treatment of substance abuse.

**PSYC 7450 - Group Psychology** (3 credits) Prerequisites: PSYC 6870. The primary purpose of this course is to cover key concepts in assessment of group processes and group intervention strategies and to provide the student with skills in group intervention. The course assumes background in evidence-based psychological interventions.

**PSYC 7550 - Community Assessment and Intervention** (3 credits) This course covers key concepts in clinical community and health psychology with particular focus on assessment of community mental and behavioral health issues and design and evaluation of interventions which improve health and prevent disorders in general and special populations. Particular attention will be paid to rural communities and how assessments and interventions can be tailored to fit cultural and social contexts.

**PSYC 7770 - Diversity in the Psychological Sciences** (3 credits) This course takes a psychological approach to diversity, and is designed to delve into psychological theories and research that describe the influence of diversity on individuals.
Additional Matriculation Requirements and Training Experiences

Students are referred to the *ETSU Graduate Catalog* for academic requirements of the School of Graduate Studies [http://www.etsu.edu/reg/catalog/graduate.aspx](http://www.etsu.edu/reg/catalog/graduate.aspx) which, among other criteria, specifies that students must maintain at least a 3.00 average to remain in good academic standing.

Specific departmental requirements also apply. All students in the MA/PhD program are expected to be enrolled as full-time students and to devote themselves full-time to their graduate pursuits during their enrollment in degree-related activities. Students are expected to be active in research collaboratively with members of the department faculty each semester they are enrolled. In addition to coursework and research, students are required to participate in clinic and field experiences commensurate with their level of training and type of graduate assistantship. Please see Appendix A for Benchmarks for Matriculation Progress.

Integration of Science and Applied Practice

ETSU’s clinical psychology program is guided by the scientist-practitioner model, known as the Boulder Model (APA, 1949) and places a strong emphasis on inter-professional clinical training and evidence-based practice. Though diverse in respect to methods of inquiry and areas of study, the faculty is of one mind in promoting scientific inquiry as the foundation of clinical psychology. The primary mission of the articulated master’s/doctoral program in Clinical Psychology at ETSU is to provide training in clinical psychology emphasizing rural behavioral health and practice in the context of integrated primary health care. Following the ‘Boulder’ model, we believe firmly that professional psychology must be well-rooted in the science of psychology and that the scientific method must inform the practice of psychology. Gaining competence as both scientist and practitioner demands a commitment to full time study, in a sequential and cumulative course of training wherein science and practice are integrated throughout in requirements that are sequential, cumulative, and graded in complexity. The foundational broad and general courses build to substantive master’s level coursework, to doctoral-level substantive courses, with elective specialty courses occurring late in the program of study. Applied clinical components build from *Clerkship*, which emphasizes shadowing psychologists in primary care to *Practicum*, which is on-campus clinical training to *Externship*, which is community-based clinical training, to *Internship*, one or two full-time years of advanced clinical training away from the
University. Thresholds for minimum achievement of clinical competencies reflect expected developmental growth in both breadth and depth of knowledge and skills demonstrated. Scientific application builds from the master’s thesis to the preliminary project to the dissertation with increasing methodological sophistication and independence being required to advance from one level to the next.

The matriculation table below provides an overview of didactic and applied matriculation requirements and shows how they are sequential and cumulative and reflective of the scientist-practitioner training model.

In the 1st year, while taking foundational coursework and while establishing research affiliations with faculty, students participate in their first of two semesters of PSYC 5910 Clinical Psychology Clerkship, which places them as observers in a primary care setting one-half day per week. Every semester, students also have a role in the department’s Behavioral Health and Wellness Clinic through participation in the office, as observers, and on vertical training teams. First-year students also have regular meetings with the clinic director in which they are taught legal requirements and standards of good practice as part of their pre-practicum requirements. Early in the 1st year, students are expected to identify a Primary Academic Advisor, who serves as their research mentor, and to begin development of a research question that will quickly evolve into a thesis project.

In the 2nd year students propose the thesis which should be formally defended in the spring of the 2nd year. **Students must successfully propose their thesis project in order to qualify for enrollment in PSYC 7010 Practicum and Seminar.** They complete their second semester of PSYC 5910 Clinical Psychology Clerkship, which is more individualized than the first, but continues to expose them to psychologists and other health care professionals in community settings. One requirement of the Clerkship courses is that students participate in a weekly faculty-led cohort seminar for discussion of their experiences and assigned readings. They continue to participate on vertical teams and meet with the clinic director as a cohort in the Behavioral Health and Wellness clinic fulfilling non-credit pre-practicum requirements. The minimum threshold for advancement from Clerkship to Practicum is demonstrating minimum skills as defined in Section I of the Clinical Competencies (Appendix D, p119), along with passing the didactic elements of the Clerkship course. In Year 2, students complete the master’s curriculum, defend their theses, and enroll in PSYC 7010 Clinical Psychology Practicum and Seminar for the first of five semesters; this is the first semester of supervised service delivery at the on-campus training clinic where all work is supervised by faculty affiliated with the program. Students must pass this Clinical Psychology Practicum and Seminar to advance to PSYC 7910 Clinical Externship, which is supervised community placement. The minimum threshold to advance from Practicum to Externship is successful completion of the master’s curriculum, including the thesis, Clinical Capstone Project and demonstrating minimum skills at the Pre-Externship level Sections II& III of the Clinical Competencies.

In the 3rd year, students begin doctoral coursework, complete the PSYC 7000 Doctoral Preliminary Project and establish a dissertation committee. Successful defense of the Doctoral
Preliminary Project allows a student to move to Doctoral Candidacy and to register for PSYC 7960 Dissertation. Throughout the 3rd year, students are placed at externship training sites and continue in the Behavioral Health and Wellness Clinic. Four semesters of community placement are required via the PSYC 7910 Clinical Externship mechanism.

In the 4th year, students complete all didactic coursework. Proposal of the doctoral dissertation is a requirement to apply for internship, so occurs no later than the first semester of the 4th year. Nearing completion of the PSYC 7010 Clinical Psychology Practicum and Seminar five-semester sequence, 4th year students have the opportunity to be peer supervisors for beginning practicum students on the vertical teams. Fourth-year students are also completing their last two required semesters of Externship and collecting dissertation data, which is encouraged to be completed prior to beginning the Internship year. The minimum thresholds for advancement from Externship to Internship include demonstrating minimum skill levels at the pre-internship level in Sections II & III of the Clinical Competencies; completion of all coursework; completion of the data-collection phase of the dissertation.

In the 5th year, students complete a full-time, 12-month internship, which is transcripted by completing the course PSYC 7980 for Fall, Spring, and Summer semesters. Students are also expected to attain minimum thresholds for achievement during the internship year. Specifically, students are evaluated by internship supervisors at mid-year and end-year, using the Clinical Competencies form and must demonstrate minimum skills at the Internship level Sections I,II, III & IV. During the internship, students are preparing for their dissertation defense (if not done prior to beginning internship) and or publication of the dissertation.

Mission Specific Training in Primary Care and Rural Psychology

Our training model emphasizes integrated rural primary care psychology. Thus, students participate in inter-professional, rural-oriented, and/or primary care psychology courses each year of matriculation. For example, the first-year PSYC 5910 Clinical Psychology Clerkship incorporates a rotation in family medicine clinics; 1st year PSYC 5040 Rural Health Research and Practice and PSYC 5870 Interviewing Techniques in Psychology are inter-professional in both student and faculty composition. In the 3rd or 4th year, students take a medical anthropology course emphasizing cultural competence in rural practice, PSYC 7500 Cultural Anthropological Applications to Rural Practice. Also each student must complete PSYC 7100 and PSYC 7110
Primary Care Psychology I & II and PSYC 6600 Rural Case-oriented Learning and Preceptorship. Each of these three courses requires that students make presentations to and consult with practicing physicians and medical residents. Students must complete at least one semester of PSYC 7910 Clinical Externship in a rural setting and one in a primary care setting, although one placement may fulfill both requirements.

Research Training Requirements and Research Support

Primary Academic Advisor

All students must demonstrate increasing competence in research as they progress through the program. This is accomplished not only through successful completion of relevant coursework, but through the completion of research projects under the guidance of a faculty advisor, including but not limited to Thesis, Preliminary Project, and Dissertation. Upon admission, each student is assigned to an advisor who will supervise their first graduate assistantship. We attempt to match students and faculty along research interests, but do not require such matches for student admission because we believe that research interests develop and evolve throughout graduate training. Thus, a student’s initial advisor may not be the person with whom a research relationship is established.

During the first year, students identify a Primary Academic Advisor who may or may not be the initial advisor. The Primary Academic Advisor is defined by the Department of Psychology as the faculty member who provides direct research supervision and mentorship during the course of student’s completion of the master’s thesis, preliminary project, and doctoral dissertation. The primary academic advisor also guides the student’s program of study and selection of graduate advisory committee. Because of the multiple settings in which graduate students find themselves, it is incumbent upon the student and primary academic advisor to ensure that advisees accurately and promptly complete and file all appropriate forms pertaining to a timely matriculation through identified programs of study.

Research Facilities

A variety of resources are available to all graduate students when conducting research during their training at ETSU. Each faculty member maintains an active research laboratory with space for advisees. One important feature of the Clinical Psychology program is that it was
established with very close relationships to many supporting University and Medical School units and facilities and community agencies. There is considerable integration of research capabilities and agendas.

**Institutional Review Board (IRB)**

Any study, research, or investigation utilizing data collected from human participants (directly or indirectly) by graduate students in the department must approved by the ETSU IRB and approval documentation must be kept and available. Approval must be completed prior to the commencement of the investigation and approved protocol must be adhered to rigidiy, unless modifications are submitted and approved by the IRB. The ETSU IRB also requires all persons involved in research to complete the online CITI Training Program. The tutorial can be found at the following website: [www.citiprogram.org](http://www.citiprogram.org) and relevant information is provided below.

Once approved by the IRB, the research to be conducted is recognized by ETSU and subsequent steps in the research process may be followed. Additional information regarding the correct forms and procedures to be followed may be obtained from the following website: [http://www.etsu.edu/irb/](http://www.etsu.edu/irb/)

**First Time Users of CITI Training Program**

1. Go to [www.citiprogram.org](http://www.citiprogram.org) and click on “Register for the CITI Program”, then submit
2. Under ALL OTHERS, Choose “East Tennessee State University” and submit
3. Select your Username and Password, then submit. This is what you are going to use to go in and out of the program
4. Fill out Registration Page, then submit information
5. Select your group **(IRB Members, see section B below)** and submit:
   - Group 1- Biomedical not affiliated with VA
   - Group 2- Biomedical affiliated with VA (ETSU/VA members)
   - Group 3- Social and behavioral not affiliated with VA (ETSU Campus members)
   - Group 4- Social and behavioral affiliated with VA
6. On the Learners Menu, click on “Basic Course (required; Status Incomplete)”
7. Complete the Required modules (top of page).
8. To get access to the optional modules (not part of required training unless requested), click on “View the Grade Book” after completing the test on the last module. Scroll down. This will give you all the score of the modules you have completed and give you access to the optional modules.
9. Print the certificate by clicking on “Print a certificate of completion” after finishing the test on the last module. This will trigger an email to the IRB, letting us know you completed the training.

And complete: “The IRB Member Module-What every New IRB Member Needs to Know,” located in the Optional Section. You can access this module after you have completed the required modules for your group under “View Grade Book” (see # 8 above). After completing the required modules and the IRB member module, then you can print a certificate.

Resources and References

The following are important and useful resources for all students involved in research:

Clinical Training Experiences

Behavioral Health and Wellness Clinic

Students register for 5 semesters of PSYC 7010 Clinical Psychology Practicum and Seminar beginning in the spring term of the second program year. However, each semester of enrollment (8 semesters), students are involved in some manner in the practice of clinical psychology, having a role in the Behavioral Health and Wellness Clinic (BHWC). The experiences are sequential, cumulative, and graded in complexity in order to prepare the student for community placement and then for internship and sound clinical practice, as follows:

Year 1 - Pre-Practicum – Not registered as 7010

- Fall 1 –
  - Provide basic clinic coverage – telephone and desk duties 4 hours per week and
  - Participate in 5 group meetings on BHWC and Professional Practice: Orientation to Psychological Practice – Dr. Kerry Holland, Clinic Director
    - HIPAA, Professional Communications, Record-Keeping
  - Vertical Team Meetings
• Spring 1 –
  o Provide basic clinic coverage telephone and desk duties 4 hours per week
  o Participate in 5 group meetings on BHWC and Professional Practice: Documentation:
    ▪ Intake Summaries
    ▪ CPT Coding and Billing issues– Dr. Kerry Holland
  o Clinic Director Community Placement, Family Medicine- PSYC 5910 Clerkship I
  o Weekly observation of 3rd and 4th year students; 4th year student facilitates and processes
  o Bi-weekly Vertical Team Meetings

Year 2 – Pre-Practicum and Practicum & Seminar

• Fall 2 - Pre-Practicum – Not registered for 7010;
  o Provide basic clinic coverage- telephone and desk duties;
  o Bi-weekly observation of 3rd and 4th year students; 4th year student facilitates and processes
  o Participate in 5 group meetings on BHWC and Professional Practice: Documentation:
    ▪ Process and Psychotherapy notes
    ▪ HIPAA, Ethical and Legal Refresher – Dr. Holland
  o Achieve Clinical Competencies, Section I in order to take Practicum 7010
  o Bi-weekly Vertical Team Meetings

• Spring/Summer 2 - Register for PSYC 7010, Clinical Psychology Practicum and Seminar
  o Intervention cases – 3 to 4 ongoing cases
  o Bi-weekly individual supervision with 4th year student supervisor
  o Bi-weekly Vertical Team Meetings
  o Bi-Weekly Group Seminar on Professional Issues – Dr. Peggy Cantrell, DCT
    ▪ Diagnostic assessment/Goal Settings/Treatment Planning/Psychotherapy Processes
    ▪ Individual and cultural differences in psychotherapy
    ▪ Ethical Dilemmas
  o Achieve Clinical Competencies to be approved for Externship placement Year 3

Year 3 - Register for PSYC 7010, Practicum (1 hr) and PSYC 7910, Externship (1hr)

• Fall 3 - BHWC combined with Community Placement
  o Intervention case assignments – 2 to 3 ongoing cases**
  o Assessment cases on rotation; 3rd priority
  o Observed by first and second year students
  o Weekly individual supervision with faculty
  o Bi-weekly Group Seminar on Professional Issues - Dr. Cantrell
    ▪ Psychotherapy Processes; HIPAA, Ethical and Legal Refresher
    ▪ Individual and Cultural Issues : Primary Care and Rural emphasis
  o Community Placement one to two days per week - PSYC 7910 Externship
  o Bi-weekly Vertical Team Meetings

• Spring/Summer 3 - BHWC combined with Community Placement
  o Intervention case assignments – 2 to 3 ongoing cases**
  o Assessment cases on rotation; 2nd priority
  o Individual supervision with faculty
  o Observed by first and second year students
  o Bi-Weekly Group Seminar on Professional Issues - Dr. Cantrell
  o Community Placement one to two days per week - PSYC 7910 Externship
  o Bi-weekly Vertical Team Meetings
Year 4 - Register for Practicum 7010 and Externship 7910

- Fall 4 - BHWC combined with Community Placement
  - Intervention case assignments – 1 to 2 ongoing cases**
  - Assessment cases on rotation; 1st priority
  - Individual supervision with faculty
  - Observed by first and second year students
  - Weekly Group Seminar – Supervision/Peer consultation Didactics – Dr. Cantrell
  - Community Placement one to two days per week - PSYC 7910 Externship
  - Bi-weekly Vertical Team Meetings
  - Achieve Clinical Competencies to be approved for internship application process

- Spring/Summer 4 - BHWC combined with Community Placement
  - Supervision Training: Applied - Provide Supervised Supervision for 2nd yr. students
  - Individual supervision, as needed based on continuation of cases
  - Observed by first and second year students
  - Weekly Group Seminar - Supervision of Peer supervision/consultation: Applied
  - Specialty clinic cases OR ASSESSMENTS IN SPECIALTY CLINICS, based on individual goals
  - Community Placement one to two days per week - PSYC 7910 Externship
  - Bi-weekly Vertical Team Meetings

Year 5 – Optional

- Provide Supervised Supervision
- Intervention case assignments – specialty clinic cases OR ASSESSMENTS IN SPECIALTY CLINICS
- Participate in group seminars
- Individual supervision if providing direct services

Vertical Teams

The vertical team is a key element that crosses all levels of training experience, allows students at all levels to interact and learn from one another, and ensures that students’ off-campus experiences remain connected to the program. It also provides students with a forum to discuss clinical training issues. Each faculty supervisor leads a vertical team of students. Included in the vertical teams are pre-practicum students, as well as students with varying degrees of in-house practicum and externship experience. Students participate in bi-weekly vertical team meetings during which topics relevant to clinical training and practice are discussed. Formal case presentations are also part of the vertical team experience.

** Case load represents a minimum caseload in BHWC. Case load may be increased based on type of community placement, i.e., 20 hours or 10 hours and training needs of student.
Community Placements

Students complete a minimum of 4 semesters of Externship. We currently have clinical affiliation agreements for 13 training sites in 7 agencies in the region. The list of sites, including types of clients, is provided in Appendix F. Most are paid graduate assistantships with stipends and tuition remission consistent with the department-funded GA's, though students in research-based GA's have the option of seeking and obtaining unpaid placements. Paid placements require 20 hours commitment per week while unpaid placements require 10 hours commitment per week. Externship contracts are for 12 months. Each site ensures face-to-face, on-site supervision with a licensed clinical psychologist at least one hour per week, plus on-site consultation/supervision with other practicing mental health or health professionals per the focus of the placement. Sites provide for supervision whether or not placements are paid. Site supervisors have no more than three student supervisees.

All externship sites are firmly committed to training, and provide training to students in related disciplines (social work, counseling, medicine) or to medical residents or pre-doctoral psychology interns. Our partnerships with some affiliate sites have been longstanding. For example, principals from several sites participated in a series of community-based workshops we hosted when we initially developed our curriculum and identified the core competencies needed for psychologists practicing in rural behavioral health and primary care settings (e.g., Cherokee Health Systems and Frontier Health).

The quality of the externship sites is ensured through at least five mechanisms. First, our clinical affiliation agreements specify student, program, and site responsibilities. Second, the DCT maintains personal and open communication with each site supervisor, and visits each site at least once per placement cycle, typically at the beginning of each placement cycle. Third, throughout their community placements, students remain under direct program faculty supervision via the course PSYC 7010 Clinical Psychology Practicum and Seminar, as well as through their participation in vertical teams. Fourth, students rate each site supervisor and placement experience with respect to the program’s training goals and objectives. Fifth and finally, supervisors rate their placement’s emphasis on each program goal and objective, ensuring their awareness of the program’s training goals. Students must complete a minimum of four semesters of Externship and must achieve clinical competencies as defined and measured on the Clinical Competencies Form, Appendix D to be eligible for Internship.
Empirical Thesis

The choosing of a Thesis Chair and Committee by the student is a very important process that should be based upon a careful consideration of the student's interests and the research expertise of the faculty members. After gaining some familiarity with the issues in the field and with the faculty members' areas of expertise, the student will be encouraged to begin development of a thesis topic, no later than 24 semester hours into the student's course of study, so that the thesis becomes the final step in an integrated learning experience. The Thesis Committee will be composed of three members of the graduate faculty, one of whom may be from outside the Department of Psychology. The Committee chairperson must be a full-time member of the faculty of the Psychology Department.

Students entering the program who have already completed a master’s thesis must have that thesis accepted by their three member faculty advisory committee. The student is responsible for submitting a copy of the thesis to the DCT for dissemination. The thesis is to be submitted, reviewed, and either accepted or rejected during the student’s first semester of study to allow adequate time for a new thesis project to be conducted if required. In any case, the student will complete the written and oral components of the clinical capstone project and preliminary project prior to being admitted into doctoral candidacy.

Students in Master's programs at ETSU are required to maintain continuous registration (each fall and spring semester) for Thesis until work is completed, even after they have defended their proposal, and must be so registered during the semester of graduation. If graduation is in August, the student must be registered for a summer session. Students conducting research or utilizing university resources must be registered even during the summer sessions.

General Policies about Theses in the Psychology Department:

1. Thesis Committee chairpersons will be full-time psychology faculty.
2. The committee will be composed of at least three members of the graduate faculty, and at least two members will be from the Psychology Department.
3. Once a thesis committee has been formed, any change in committee membership should be discussed with all involved parties; the graduate school committee form must be
amended if changes are made. It is the student’s responsibility to see that the formal changes are made.

4. File a graduate school committee form with the DCT.

5. Faculty reserves the right to decline to serve on Thesis Committees. If a student has difficulty finding faculty to serve or must replace a committee member, the DCT will provide assistance.

6. Thesis defenses are expected to be:
   a. Announced (time & place) to Psychology faculty and graduate students two weeks ahead of time. Notify the DCT and post a notice on the clinical psychology bulletin board, the graduate lounge, and on the “Psychtalk” listserv. Make a copy of thesis abstract available for review;
   b. Open to all members of the university community;
   c. Judged according to a reasonable standard of rigor;
   d. Evaluated on a pass/fail vote by the Thesis Committee members;
   e. Restricted to a maximum of two occasions. A second failure results in termination from the program.

7. After a successful defense, the student should get all forms signed and submitted. It is the student’s responsibility to bring to the thesis defense the following forms to avoid delays in securing signatures:
   a. Report of Comprehensive Examination and Thesis Defense - All committee members must sign the form. Dates for passing the Thesis Defense must be shown. See Appendix B for relevant Graduate School Forms;
   b. Manuscript approval and electronic submission forms

8. Specific guidelines on the, layout, electronic submission, and deadlines for presenting the final copies of the thesis to the Graduate School are available in the Graduate School. Basic Requirements for Electronic Submission of Theses and Dissertations (January 2000) are available from the graduate school, and on their web site (http://etd-submit.etsu.edu/index.html). The graduate school conducts workshops on thesis manuscript preparation, forms and deadlines each semester. These are very useful and students are encouraged to attend.
The Thesis: Practical Considerations

1. "Thesis" is broadly defined. Faculty members are willing to consider a wide range of options for a thesis. Projects such as meta-analyses, organizational interventions, case studies, and experimental laboratory work, could all be considered appropriate, but must be empirical in nature, not just a theoretical or literature review paper. The thesis should make a contribution to psychological knowledge or practice.

2. Topic selection. Students should begin talking about their research ideas early. As early as the first semester, students should begin to think about potential thesis topics. Approach faculty members with interests similar to yours to learn more about their research. Begin to review related literature. Faculty members are generally happy to talk with you about thesis ideas, even when the ideas are rather vague and undefined. You may wish to do an independent research under a faculty member to help you focus.

3. Use care in selecting a thesis committee. Students can tentatively select a committee, solicit feedback from potential committee members, and gain informal approval of a specific topic even before formal committee assignments are finalized. Participation by faculty throughout the department is encouraged. Students typically find a thesis chair in one of several ways. One way is to develop a thesis out of research that you have done with a faculty member and have that person serve as chair. Another way is to develop a relatively more independent idea of thesis and find a faculty member who has similar interests (see Faculty Listing in this Handbook) who may agree to be chair. A third way is to have the thesis evolve from a project in a prior class. If this is the case, then the person supervising you on the project often is willing to become chair. Do not get too far along with the thesis idea before contacting other potential committee members. Members want to have input, and if the thesis is already designed, or worse, data are collected, their input is precluded. Check with potential members to see what role they wish to play during the process.

   Faculty members are not required to serve on committees when they are asked. If a faculty member chooses not to serve on your committee because of other time commitments, low interest in the topic or other reasons, don't take it personally – find someone else.
If you want a faculty member to be on your committee, make your wishes clear. Make sure you get a definite answer before you assume that the person will serve on your committee. One way to get a definite answer is to ask the faculty member to sign the Committee Record Form. Some faculty members do not wish to commit to serve on a committee until a written draft of your idea is presented.

To select a committee, it is good to talk to several faculty members about your ideas to see if they can be helpful and have interest in your ideas. Then ask a faculty member that you know and trust to serve as your chair. Seek the chair’s advice before you ask other faculty members to serve on your committee to make sure that the committee is compatible. You don't want your thesis to be stuck in the middle of a philosophical debate about how research should be conducted.

4. There are no fixed roles for committee members. Some faculty prefer that the chair be primarily responsible for reading and revising drafts while others desire more active participation from the full committee. Clarify committee roles up front!

5. Clear communication of expectations about roles, scope, content, etc., is important. Students, chairs, and committee members need to define expectations thoroughly, starting with early discussions of thesis.

6. Consensus should be built before major meetings. Before a proposal meeting or a defense, make sure that your chair has seen and made comments on one or several drafts and agrees that it is time for a meeting. Arrange a time, making sure that your committee has ample opportunity to carefully read your paper before the meeting. Allow time to make an appointment with each committee member to discuss the paper before the meeting. Find out if there are any concerns that they have or things that need to be cleared up. Be prepared to address these at the meeting. If there are significant concerns, delay the meeting until they can be resolved. The proposal meeting is the final opportunity to reach consensus, and in some cases more than one meeting may be necessary to do so.
   a. File a Thesis Committee Record Form with the departmental executive aide;
   b. File an Admission to Candidacy Form with the departmental executive aide;
   c. File an Application for Graduation with the departmental executive aide.

7. Approval of the proposal is an implicit contract. The faculty are agreeing that if the student diligently and professionally completes the work in the proposal and satisfactorily analyze the results and conclusions, that they will consider the project to be an adequate thesis.
The student is agreeing to carry out the work as proposed. Both parties agree that there should be no major changes after approval of the proposal.

8. Students should keep committee members informed of progress. Some chairs and committee members expect to follow the progress of the thesis very closely. Others, particularly non-chair members, do not expect intermediate reports. Clarify expectations, and tailor the frequency of meetings with individuals or the whole committee to student and faculty needs. If you wish to receive feedback from committee members regarding something you have written, don't expect it for two weeks (sometimes, e.g. summers, people may need even more time). You may get it back sooner, but plan for two weeks. This includes "last-minute" revisions when you are fighting deadlines. Plan ahead.

Before you turn in something to be read, go over it thoroughly for typos and grammatical errors. That way the committee member can focus on content without being distracted. When you make revisions and would like your committee to read them, provide the previous copy upon which such comments were made. This helps speed up review.

Try very hard to accept comments about your work gracefully, since they are meant to help you produce a better thesis. Use the feedback as an opportunity to take a fresh look at you work rather than see it as a personal attack.

If more than a week passes since the last time you have talked with committee members about your thesis, begin the discussion by briefly telling what the thesis is about and recapping what was discussed at the last meeting. It is much more "present" on your mind than on theirs.

If you begin work on a thesis and then foresee a period of time (say, a month or more) during which you are not going to be working on it, let your committee know (especially your chair and anyone who has been especially helpful). This helps them plan their time and may help sustain their interest.

9. Watch deadlines. Many students find themselves fighting deadlines, wanting to get their thesis completed just in time for graduation. Make note of the deadlines for submitting the finished thesis to the graduate school. Then plan on a defense allowing plenty of time for post-defense revisions which may take several rounds of feedback. Trying to rush things through is generally not a good idea. At the end of the semester faculty also tend to be busy and may not be able to respond quickly. Allow yourself plenty of time, and recognize
that doing it well is more important than doing it quickly. Even with valiant efforts, you may miss a deadline and have to take more time.

10. Remember—that which can go wrong, will. Assume that your printer will jam and your disks will self-destruct, especially when you are in a time crunch. Make contingency plans and back up your disks.

11. After gaining the chair's approval of the final draft, students should schedule a defense. Give a copy to the committee members three weeks before the date of the defense. Publicly announce the defense which should occur at least one week before the beginning of the final exam period.

12. Check with your committee chair about bringing food to your proposal and defense meetings. Some believe that it helps set a positive tone. Others strongly believe you should not bring food, because it can detract from an independent evaluation of your work and compromise the integrity of the process of judging your work on its merit—not your hospitality skills. After you've passed it is clearly a good time to celebrate and show appreciation.

13. Faculty may not be available during summers. There is no formal expectation that faculty will remain involved in thesis work at times when they are not under contract. Clarify with the chair and committee members their availability during the summer. If faculty are willing to help during the summer, remember that they are doing it as a favor (they do not get paid for this during the summer)

Master’s Clinical Capstone Project

Purpose

The Master's Clinical Capstone Project is used to: a) assess the student's clinical and ethical competencies; and, b) assess the student's ability to integrate and synthesize core knowledge in the field. The Master’s Clinical Capstone Project may be considered the capstone or finalization of the Master's degree.

The Pre-doctoral Preliminary Examination Project is used to: a) determine the student's preparation and readiness for independent, Dissertation research; and, b) assess whether the student has developed analytical, problem-solving, and critical thinking abilities at a level befitting
doctoral candidacy. The successful completion of the Preliminary Examination Project may be considered as the initiation of Doctoral Candidacy.

**Timing of Clinical Capstone Project**

In order to sit for the Clinical Capstone Project, the student must have the written approval of her/his Thesis Committee Chair; this is obtained via completion of the *Request to Sit for Clinical Capstone Project* form. Approval will be granted only after the student has successfully completed 36 hours of the Master’s curriculum and successfully defended his/her Thesis; however, approval of the Clinical Capstone Project, committee, and designation of a clinical supervisor may be sought concurrent with thesis development and prior to the thesis defense. The Clinical Capstone Project Chair may consult with other faculty members in evaluating the candidate’s readiness. Ordinarily, a student making adequate progress would not be expected to complete the Clinical Capstone Project until the spring or summer of the second year in the program. Students entering the program with a Master’s degree in-hand, and whose Master’s thesis has been accepted by the clinical faculty, should submit a request to begin the Clinical Capstone Project to the Chair of his/her Thesis Committee at his or her earliest opportunity. As a “rule of thumb,” soon after the Thesis proposal the student and Clinical Capstone Project Chair should decide on a clinical case and committee for the Clinical Capstone Project. When appropriate, the Clinical Capstone Project Chair may act as a consultant, and may defer selection of a clinical case and/or supervision of the case conceptualization to a clinical supervisor. A suggested, and often necessary, deadline for completion of the Clinical Capstone Project, in order to maintain adequate progress toward matriculation, is August 1st prior to the beginning of a student’s 3rd year in the program, though earlier is better in order to be eligible for the broadest array of graduate assistantships in the 3rd year.

Funded externship stipends are predicated upon the assumption of completion of all Masters’ requirements. In addition, external placement sites have their own guidelines for acceptance and credentialing students. If a student has not met the Thesis or Clinical Capstone Project requirements for completion of the Masters’ degree, a student may petition the Clinical Faculty to be granted an externship placement for a probationary period of one semester, contingent upon successful completion of at least one semester of practicum and demonstrated progress on the Thesis and Clinical Capstone Project. The opportunity for probationary
placement cannot be guaranteed. Stipends for probationary placements will be significantly reduced, if available at all.

**Formation of Clinical Capstone Project Committees**

The Clinical Capstone Project Committee is composed of three faculty members, all of whom must be full-time, tenured or tenure-track faculty members holding at least temporary ETSU Graduate Faculty status. Of these three, two must be designated clinical psychology faculty; the third committee member may be a clinical or non-clinical faculty member from the Department of Psychology. A fourth Committee member may be added for consultation or as a clinical supervisor, if necessary, and may be from the Department of Psychology, or another school/college in the University, and should also be a full-time, tenured or tenure-track faculty member with an earned doctorate in a health service field, or a health professional or service provider with a terminal degree in their field, and at least temporary membership in the graduate faculty. The Clinical Capstone Project Chair should be indicated. Once the Clinical Capstone Project process has begun, changes to the composition of committees are discouraged except under extraordinary circumstances. There may be instances in which a student, a faculty member or the Clinical Committee, either solely or by mutual agreement, decides that a change to a students’ Clinical Capstone Project committee is necessary (e.g., a consultant needs to be added; a faculty member should be recused or removed; or, a student or faculty member decide that they are no longer able to work together professionally). Any such instances will be brought to the attention of the Clinical Committee and must be approved in writing by the student, Clinical Capstone Project Chair and the DCT.

Further, although it may be desirable for the Thesis Chair to also be the Clinical Capstone Project, there could be instances when a student’s Thesis Chair does not have the direct knowledge, experience or training needed to adequately supervise the development of a conceptualization for a student’s selected case. In such a situation, it may be advisable to add a fourth committee member, a clinical supervisor, to the Clinical Capstone Project Committee. As such, it is possible that the Thesis Chair may be on the Clinical Capstone Project Committee, but may not necessarily be the Clinical Capstone Project Chair.
Master’s Clinical Capstone Project Guidelines

The Master’s Clinical Capstone Project will be in the form of a written clinical case presentation, followed by an oral defense of the case presentation. Both elements of the case presentation will require: 1) the integration of case/client background and history; 2) symptoms and presenting problems; 3) diagnostics and assessment; 4) theoretical framework, which includes at least two alternate theoretical conceptualizations; 5) treatment considerations, including evidence based approaches; 6) treatment plan, including short, mid-range, and long-term goals; 7) individual and cultural differences; 8) ethical issues and, 9) outcome information and assessment. The clinical student will need to evidence at least basic curriculum-based competencies in these areas. The written component of the Clinical Capstone Project should not exceed 20 pages in length exclusive of title page, abstract, references or appendices.

A formal proposal meeting is not required for the Clinical Capstone Project. The appropriate clinical case to be analyzed will be selected by the student in collaboration with her or his Clinical Capstone Project Committee Chair with assistance from a clinical supervisor, as appropriate. In some instances, this may be an existing therapy case, a text or journal-based case, an ongoing practicum or clerkship case, a group-level case, a hypothetical case, a video vignette, etc., depending on the clinical experiences or particular needs of the student.

As stated above, for students’ making adequate progress, completion of the Clinical Capstone Project will occur ideally at the end of the Spring or Summer of the second year of the program. Failing to complete Clinical Capstone Project prior to Spring of the third year of the program is a marker of inadequate progress in the program.

Oral Defense of Clinical Capstone Project

The student, upon completion of the written Clinical Capstone Project case will be required to orally defend their work. The purposes of the Oral Defense are: 1) to extend the evaluation of the student's knowledge and understanding of clinical subject matter covered in the written Clinical Capstone Project (emphasis may be placed on topics in which the student's responses are judged to be weak); 2) to evaluate the student's knowledge and understanding of related clinical subject matter not included in the written Clinical Capstone Project; and, 3) to evaluate the student's ability to respond, in a scholarly and professional manner, to a variety of verbal inquiries.
Passing/Failing Clinical Capstone Project

A majority of the Committee members must deem the student's performance to be acceptable, and to have demonstrated at least minimal competence, on each part of the Exam for the student to pass. Failure of an attempt of either Clinical Capstone Project component (Written and/or Oral) is considered final (that is, no opportunity for remediation of the current examination is available). A student who fails any part of the Clinical Capstone Project will be required to retake each failed component. The portions of the exam to be retaken may be done so no later than one calendar year after the original exam. Failure of any component of the Clinical Capstone Project a second time will result in dismissal from the program. At the first round of the Clinical Capstone Project, the Committee will determine whether a student has obtained a FULL PASS, CONDITIONAL PASS, or FAILURE.

The Clinical Capstone Project will be considered fully passed if all three Committee members assign the student a passing evaluation of both the written and oral components.

A Conditional Pass may be granted, and occurs when at least two Committee members have assigned Full Passes, with the third assigning a Conditional Pass or a Fail. If the student obtains a Conditional Pass in any first-round component, Committee members will communicate, in writing, the nature of the remedial measures required to the student, the Clinical Capstone Project Committee Chair, and the DCT. The remedial measures then must be completed to the satisfaction of the majority of the Committee for a Conditional Pass to be revised to Full Pass status.

A component will be considered failed if at least two Committee members have assigned a Fail, regardless of whether a third committee member has assigned a Full Pass, Conditional Pass or Failure. Failure of either the written or oral component of the Clinical Capstone Project may be grounds for dismissal from the Clinical Program. In the event that a student is assigned a FAIL by two faculty members, or in the instance of a serious failure (e.g., failure by all committee members; severely deficient and/or unethical work) on any first round component, the Committee will convene to consider whether the student will be allowed to retake the Examination.

In cases where the Committee is in agreement that academic or clinical remediation will improve the Clinical Capstone Project performance and/or products, a single opportunity for remediation may be granted. The Director of Clinical Training will notify the student, in writing, of the decision and the remedial measures required, if any. The second round Clinical Capstone
Project (if administered) will be graded as either PASSED or FAILED. A failure on either component during the second round will result in the student’s dismissal from the Ph.D. program in Clinical Psychology.

Students will be provided with the final outcome of the pass/fail voting of the committee as a whole. That is, individual committee member votes will remain confidential. Documentation including committee signature and scoring forms, and the Clinical Capstone Project written product will be maintained in the student’s permanent record.

**Doctoral Preliminary Project**

In order to be eligible to begin the Preliminary Project, the student must have the written approval of her/his Preliminary Project Committee Chair. Students become eligible for enrollment in Preliminary Project (PSYC 7000) after successfully completing all requirements for the Master’s degree, including successful defense of their Thesis and passing the Clinical Capstone Project. Ordinarily, a student making adequate progress would not be expected to attempt the Preliminary Examination Project until after the summer of their second year. Typically, the Preliminary Examination Project Proposal will occur in the Fall of their third year in the program and the final Preliminary Examination Project will be due in the Spring of the third year. Students entering the program with a Master’s degree in-hand are not eligible to enroll in the Preliminary Examination Project without first completing Clinical Capstone Project. Students in this situation should consult with their Primary Academic Advisor.

At the post-Master’s level, the Preliminary Examination Project Committee and the Dissertation Committee are composed of four faculty members, all of whom must be full-time, tenured or tenure-track faculty members, with an earned doctorate or a terminal degree in their field, and holding at least temporary ETSU Graduate Faculty status. Of these four, two must be designated clinical psychology faculty, and a third must be designated non-clinical within the Department of Psychology. The fourth Committee member must also meet these criteria, but may be from the Department of Psychology or another school/college in the University. A fifth consulting member may be added if necessary (i.e., an expert from another institution; a community placement mentor), but he or she must still have an earned doctorate or terminal degree in their field, and at least temporary graduate faculty status. Once the Preliminary Examination Project has been initiated, changes to the composition of a committee are strongly
discouraged except under extraordinary circumstances. There may be instances in which a student, a faculty member or the Clinical Committee, either solely or by mutual agreement, decides that a change to a students’ Preliminary Examination committee is necessary (e.g., a consultant needs to be added; a faculty member should be recused or removed; or, a student or faculty member decide that they are no longer able to work together professionally). Any such instances will be brought to the attention of, and voted upon by, the full Clinical Faculty and must be approved in writing by the Preliminary Examination Project Chair and the DCT.

**Doctoral Preliminary Examination Project Guidelines and Requirements**

The Preliminary Examination Project will serve as an evaluation of qualification for doctoral candidacy. The Preliminary Examination Project takes the form of a scholarly written product which will make a substantive and original contribution to our scientific understanding of some area of psychology, broadly construed, including development and submission of a grant proposal, preparation and submission of a peer-reviewed empirical, conceptual or review article for publication, or the development and completion of a pilot research project. There may be extraordinary circumstances in which another form of project, such as a workshop or symposium development, may be considered upon approval of the full Clinical faculty. The completed project should provide a critical, evaluative, and integrative review and interpretation of content and methodological issues pertaining to the selected area of psychology, and it should advance the student’s area of research interest, thereby demonstrating breadth of knowledge. As a very general guide, the project should address the following issues: 1) theoretical approaches to the content domain (historical and contemporary); 2) identification of major theoretical issues in the content domain; 3) strengths and limitations of various research methods used in the content domain; 4) measurement issues (both research and clinical applications); 5) relevance to clinical practice; 6) ethical issues (clinical and research); and, 7) future directions in theory, research, and clinical practice.

A student’s decision about which type of scholarly project to complete for the Preliminary Examination Project will be made in consultation with their Preliminary Examination Project Chair, and the DCT, and will be based on several factors, including: student progress and/or needs, and student academic and/or career goals. Despite the format or particular project selected and
approved, the student should, at all times, approach the Preliminary Examination Project as a professional and scientific endeavor.

After consultation with their Preliminary Examination Project Committee Chair, students must submit and orally defend their proposed Preliminary Examination Project, including a proposed reading list. Proposal length may vary depending on the type of project selected (e.g., grant application versus pilot project), but in all cases should contain sufficient background review and logical argumentation to enable committee members to judge the appropriateness of the project. At the Proposal of the Preliminary Examination Project, students will receive summary feedback from their committee regarding the proposed direction, content, and expectations of their project. Expectations for the Preliminary Examination Project will include: 1) selection and justification of content area; 2) selection and justification of appropriate venue or forum for submission of final product; 3) organizational structure of the proposed project; and, 4) delineated reading and consultation resources. Within 72 hours the student is required to transcribe, summarize and address the summarized elements, forming an action plan for completion of the Preliminary Examination Project. Approval by the Committee indicates that the proposed Preliminary Examination Project is of sufficient scope so as to satisfy the requirements of the Preliminary Examination. Students may seek and receive guidance and feedback on their project until the point of formal approval of the Preliminary Examination Project Proposal by the committee. Upon committee approval, students must work on their Preliminary Examination Project independently and without consultation from their Chair or Committee Members; however, consultation with non-committee members is permitted. Students will have a period of three months (90 days) from time of approval to complete and submit their Preliminary Examination Project to their Committee. Oral Defense of the Preliminary Examination Project should occur as soon after this date as feasible, but does not have to be completed within the three-month timeframe.

Given that the Preliminary Examination Project committee members have heretofore played a consultative role in the project and during this three month period are playing an explicitly silent role, broad responsibility for the quality of the Preliminary Examination Project solely rests upon the student. As such, the student is again reminded to, at all times, approach this Project as a scientific endeavor, indeed the capstone for achieving doctoral candidacy.

Upon Preliminary Examination Project Committee Chair recommendation, students will orally defend the project before the full Committee. Failure to complete the Preliminary Examination Project would result in the student's standing to be terminated. The student is reminded to approach this project as a professional and scientific endeavor, indeed the capstone for achieving doctoral candidacy.
Examination Project within the designated three-month period will be considered indicative of inadequate progress in the program and possible dismissal from the program. The primary criterion for evaluating the Preliminary Examination Project will be the extent to which it provides a cogent, compelling, original, and substantive contribution to the scientific and/or theoretical understanding of the domain of interest. The final written product should adhere to relevant guidelines (e.g., APA publication guidelines for journal submissions, sponsoring agency guidelines for grant submissions, etc.), and should ordinarily not exceed 40 pages of text, excluding title page, abstract, references or appendices.

The Preliminary Examination Project Committee Chair may act in a consultative role to the student, helping the student to select a topic and breadth areas that meet the guidelines while being sufficiently original and independent from the intended Dissertation research. On some occasions, the Preliminary Examination Project may be related to or inform the Dissertation, perhaps more broadly construed or more narrowly focused, but the student should not expect the Preliminary Examination Project to simply be a literature review for the background section of the Dissertation. Ideally, the student will seek to publish some form of the final, approved Preliminary Examination Project in a peer-reviewed journal, but regardless, the quality of this product is expected to be that of a manuscript ready to be submitted to a peer-reviewed journal in the field.

**Oral Defense of Preliminary Project**

The student, upon completion of the Preliminary Examination Project, will be required to orally defend their project. The purpose of the Oral Defense of the Preliminary Examination Project is: 1) to extend the evaluation of the student's knowledge and understanding of subject matter covered in the written Examinations (emphasis may be placed on topics in which the student's responses are judged to be weak); 2) to evaluate the student's knowledge and understanding of related subject matter not included in the written Examinations; and, 3) to evaluate the student's ability to respond, in a scholarly and professional manner, to a variety of verbal inquiries.

**Passing/Failing Preliminary Examination Project**

A majority of the Committee members (three of four) must deem the student's performance to be acceptable, and to have demonstrated sufficient competence, on each part of the
Preliminary Examination Project. Failure of an attempt of either component (Proposal and/or Defense; Written and/or Oral) is considered final (that is, no opportunity for remediation is available). A student who fails any part of the Preliminary Examination Project will be required to retake each failed component. The portions of the exam to be retaken must be done so no later than four months (120 days) after receiving the results and expectations for remediation from the original exam; only under extraordinary circumstances will an extension be granted, and only with the approval of the full Clinical Committee. Failure of any component of the Preliminary Examination Project a second time will result in dismissal from the program. At the first round, the Committee will determine whether a student has obtained a FULL PASS, CONDITIONAL PASS, or FAILURE.

For a component of the Preliminary Examination Project to be considered fully passed, at least three Committee members must have assigned Full Passes with the fourth assigning, at minimum, a Conditional Pass. A component will be considered failed if at least two Committee members have assigned a Fail. If three committee members assign a Full Pass, and one committee member assigns a Fail, the students’ performance will be considered a Conditional Pass, and remediation will be necessary.

If the student obtains a Conditional Pass in any first-round component, Committee members will communicate, in writing, the nature of the remedial measures required to the student, the Preliminary Examination Project Chair, and the Director of Clinical Training. The remedial measures then must be completed, within 120 days, to the satisfaction of the majority of the Committee for a Conditional Pass to be revised to Full Pass status. In the event of a serious failure (e.g., failure by three out of four committee members; severely deficient and/or unethical work) on any first round component, the Committee will convene to consider whether the student will be allowed to retake the Examination. The Director of Clinical Training will then notify the student, in writing, of the decision and the remedial measures required, if any.

The second round Examinations (if administered) will be graded as either PASSED or FAILED. A failure on either component during the second round will result in the student’s dismissal from the Ph.D. program in Clinical Psychology.

Students will be provided with the final outcome of the pass/fail voting of their committee members. That is, individual committee member votes will remain confidential. Documentation including committee signature and scoring forms, and the Preliminary Examination Project written product will be maintained in the student’s permanent record.
Doctoral Candidacy Checklist

- Completed master’s thesis has been approved by the Graduate School
- Passed clinical capstone project written portion
- Passed clinical capstone project oral portion
- Completed Practicum
- Completed Preliminary Project
- Approval received from Primary Academic Advisor and signed by DCT

Dissertation

Alternative Multi-Paper Dissertation Format

In addition to the standard format for doctoral dissertations, the Department of Psychology allows for the use of an alternative format that consists of a series (three or more) of conceptually-coherent, publication-ready articles, in journal format, as the main basis for the dissertation. This format is rare, but can be proposed. A student wishing to pursue the alternative format dissertation must meet several criteria, including: 1) being in good-standing academically, having successfully progressed through all coursework, clinical training experiences, capstone and milestone projects according to the established Clinical Program timeline; and, 2) gaining the approval of his/her primary academic advisor, the Clinical Ph.D. Program Faculty, and from all members of the Dissertation Committee at the time that doctoral candidacy form is filed. Importantly, the choice of which dissertation format to adopt should be decided prior to the dissertation proposal meeting. Moreover, should the student, in consultation with his/her advisor, decide that it would be preferable to alter the format of the dissertation following the proposal meeting, the student is required to obtain approval for this change from all members of his/her committee and to document that change with a revision to the doctoral candidacy form.

In this alternative format, the packaged series of studies must be bounded by both a (1) substantial General Introduction section, comprising a comprehensive and critical review of the literature that sets the context for the thematic research, and (2) General Discussion section that synthesizes and critically analyzes the key issues which arise from these studies. These General Introduction and Discussion sections serve as “bookends” and are in addition to (not in place of) the specific Introduction and Discussion sections contained within each article. When preparing a
dissertation in the alternative format, a student must: 1) include a separate abstract for each paper of the series, in addition to the always-required general dissertation abstract; and, 2) separate reference lists for each paper, in addition to a master list of references for the entire dissertation document. Reference styles for the non-manuscript portions of the document, including the General Introduction, General Methods and General Discussion should adhere to the guidelines of the latest APA Style Manual; however, for the individual series papers, the structural and reference/citation styles should adhere to those of the journals selected for submission, which should be identified prior to, and identified at, the proposal meeting. When necessary and appropriate, supplementary supporting materials are to be presented in Appendices. If the student and advisor select the alternative format, the student must also provide summary overviews of each proposed article within the series at the dissertation proposal meeting. Each summary overview should include: 1) brief background and significance of the literature; 2) statement of the problem; 3) hypotheses; 4) methods, including the specific procedures, measures/techniques, and analyses for each proposed article; and, 5) intended target journal(s) for publication. The student should prepare these summary overviews with the intent to follow them through to completion.

After the formal proposal, and as the dissertation process progresses, if changes are required to any of the article-series components, it is the expectation that the student will keep all dissertation committee members informed. If the Committee determines that the proposed changes represent a substantial alteration to the proposed project, a meeting of the Committee members may be necessary to approve the proposed changes.

In some cases, a non-empirical paper may be desirable as a part of the series; in this case, it is acceptable, with the approval of the Dissertation Chair and Committee, if one of the three papers constitutes a critical review of the literature, theory development, case study, meta-analysis, or a policy paper. Although components may differ (e.g., there may not be a traditional Method section), the same type of summary overview as provided for an empirical series manuscript must be provided for these types of non-empirical manuscripts, prior to the proposal meeting.

Only papers for which the student is the sole or primary contributor may be included. If the alternative-format dissertation is selected, secondary coauthors should be determined early in the process and documented in the Proposal meeting to avoid any conflicts of interest. If the dissertation chair will be a coauthor of any manuscripts from an alternative-format dissertation, a traditional advising role must be maintained to ensure that the manuscripts fulfill the dissertation requirements.
requirements, with publication being a secondary goal. Neither the advisor nor any other coauthor who is a member of the student's dissertation committee may compose any portion of the first draft of the dissertation or any of its component manuscripts for which the student is the first author. If a paper is co-authored, that should be acknowledged in a footnote to the chapter title(s) in the dissertation, and a release letter from each coauthor not on the dissertation committee must be included in an Appendix. In all cases, the majority of the work, taken as a whole, must be done by the student, and the student's contribution to each article must be clearly identified. Manuscripts within the proposed series must be previously unpublished work.

As with the traditional format, an alternative format dissertation must meet all other Program and ETSU criteria. As with the traditional format, a committee of at least four members is formed, and a dissertation proposal and defense are held according to existing policies. The student must follow all of the steps for a traditional doctoral dissertation. Like the traditional doctoral dissertation, the manuscript based dissertation will be judged as: Pass, Conditional Pass, or Fail.

General Policies about Dissertations in the Psychology Department

1. Dissertation Committee chairpersons will be full-time psychology faculty with appropriate graduate faculty status.

2. Students in collaboration with their dissertation chairs should devise a dissertation committee. The dissertation committee will be composed of four members, all of whom must be full-time, tenured or tenure-track faculty members, with an earned doctorate or a terminal degree in their field, and holding at least temporary ETSU Graduate Faculty status. Of these four, at least two must be designated clinical psychology faculty, and at least one must be designated experimental psychology faculty within the Department of Psychology. A fifth member can be outside of the Department of Psychology.

3. Once a dissertation committee has been formed, any change in committee membership should be discussed with all involved parties; the graduate school committee form must be amended if changes are made. It is the student's responsibility to see that the formal changes are made.

4. File a graduate school committee form with the departmental executive aide who will deliver it to the graduate school.
5. Faculty reserves the right to decline to serve on graduate advisory committees. If a student has difficulty finding faculty to serve or must replace a committee member, the DCT will provide assistance.

6. Dissertation defenses are expected to be:
   a. Announced (time & place) to Psychology faculty and graduate students two weeks ahead of time. Notify the DCT and post a notice on the “Psychtalk” listserv.
   b. Open to all members of the university community;
   c. Judged according to a reasonable standard of rigor;
   d. Evaluated on a pass/fail vote by the Dissertation Committee members;
   e. Restricted to a maximum of two occasions. A second failure may result in dismissal from the program.

7. As part of the completion of a successful defense of the dissertation project, each student’s oral defense will consist of an examination oriented toward the student’s dissertation research area and issues relevant to clinical psychological science.

8. After a successful defense, the student should get all forms signed and submitted to the departmental executive aide. It is the student's responsibility to bring appropriate forms to dissertation defense the following forms to avoid delays in securing signatures:

9. Specific guidelines on the typing, layout, and deadlines for presenting the final copies of the dissertation to the Graduate School are available in the Graduate School.

**The Dissertation: Practical Considerations**

1. "Dissertation" is broadly defined. Faculty members are willing to consider a wide range of options for a thesis. Projects such as meta-analyses, analysis of archival data, organizational interventions, case studies, and experimental laboratory work, could all be considered appropriate, but must be empirical in nature, not just a theoretical or literature review paper. The thesis should make an original contribution to psychological science. Preferably the student designs a study and collects original data for the dissertation. And, building on the premise of the preliminary project which demonstrates the student’s ability to conduct research independently, the dissertation should originate from the student and be conducted and carried out accordingly.
2. Approval of the proposal is an implicit contract. The faculty is agreeing that if the student diligently and professionally completes the work in the proposal and satisfactorily analyzes the results and conclusions, that they will consider the project to be an adequate dissertation. The student is agreeing to carry out the work as proposed. Both parties agree that there should be no major changes after approval of the proposal.

3. Students should keep committee members informed of progress. Some chairs and committee members expect to follow the progress of the dissertation very closely. Others, particularly non-chair members, do not expect intermediate reports. Clarify expectations, and tailor the frequency of meetings with individuals or the whole committee to student and faculty needs.

4. After gaining the chair’s approval of the final draft, students should schedule a defense. Give a copy to the committee members two weeks before the date of the defense. Arrange to have the defense announced publicly by the departmental executive aide, which typically should occur at least one week before the final thesis defense.

5. Check with your committee chair about bringing food to your proposal and defense meetings. Some believe that it helps set a positive tone. Others strongly believe you should not bring food, because it can detract from an independent evaluation of your work and compromise the integrity of the process of judging your work on its merit—not your hospitality skills. After you’ve passed it is clearly a good time to celebrate and show appreciation.

6. Faculty may not be available during summers. There is no formal expectation that faculty will remain involved in thesis work at times when they are not under contract. The contract period for 9-month faculty ordinarily extends from 8/15-5/15. Clarify with the chair and committee members their availability during the summer. If faculty members are willing to help during the summer, remember that they are doing it as a favor (they are not on contract with the university).

7. Students should review the additional practical information about theses provided earlier in the handbook (beginning on page 16), as similar issues apply to dissertations. Likewise, students should be sure to complete appropriate graduate school forms for dissertations and submit them to the departmental executive aide. Students also file an Application for Graduation with the departmental executive aide.
Oral Defense of Dissertations

The student, upon completion of the Dissertation, will be required to orally defend their project before the full committee. The purpose of the Oral Defense of the Dissertation is: 1) to evaluate the student’s knowledge and understanding of subject matter covered in the dissertation document (emphasis may be placed on topics in which the student's responses are judged to be weak); 2) to evaluate the student’s ability to respond, in a scholarly and professional manner, to a variety of verbal inquiries; 3) to evaluate the student’s ability to address limitations of prior research with future research ideas; and 4) to evaluate the student's application of theory and research; 5) to evaluate the student’s level of ability to design and carry out independent research.

Student Evaluation Process

Rationale: Due to the nature of graduate education and clinical psychology training, specifically, students will be evaluated at least annually by the faculty evaluation committee in the areas of curricula, research, clinical skills, and adherence to APA Ethical Standards of Conduct. The annual student evaluation forms are in Appendix B3. The clinical psychology faculty is invested in the current and future success of students and is obliged to monitor student progress and critically evaluate the professional skill level of students on a regular basis.

Process and Procedure: Annually, clinical psychology graduate students will be formally evaluated by their primary academic advisor utilizing the student’s self-ratings on the Annual Summary Evaluation Form (ASEF) along with course grades, research, and clinical competency ratings. The evaluation is in the form of a discussion surrounding the student portfolio (described below), and other sources of information on student achievement. During this meeting, the student’s ASEF may be modified, as deemed appropriate by the primary academic advisor. The ASEF is signed by the primary academic advisor and student and submitted to the clinical psychology program’s clinical psychology executive aide, along with the student portfolio. Students are invited to submit an accompanying narrative if there is disagreement with the primary academic advisor’s ASEF ratings, or to supply additional information. ASEF’s and portfolios should be submitted to the clinical psychology executive aide no later than the end of the second week of December.
Faculty evaluation committee: During the beginning of the spring term, the faculty evaluation committee consisting of all primary academic advisors of students in the clinical program will meet with each student in teams. The ASEF and portfolio will serve as the basis for these feedback sessions. The purpose of these sessions is to provide the clinical faculty as a whole with oversight of all students in the program across all aspects of their achievement of program goals and matriculation progress and to provide students with feedback from faculty sources beyond their primary academic advisor.

Following the clinical faculty feedback sessions, modifications may be made to the ASEF form, and suggestions may be made for additions to the portfolio. Participating faculty and the student will sign the ASEF, and add commentary, as appropriate. In any case where the faculty views a student’s performance or progress to be “less than expected level,” there must be an accompanying commentary explaining the rating(s) and containing a plan for remediation and evaluative follow up, along with a timeline for this process.

Additional Evaluations: Each research advisor may complete the Research Competencies Form as deemed appropriate but no less frequent than annually at the end of the fall semester and will discuss ratings with the student. Students will once again be allowed to submit an accompanying narrative in the event of a disagreement. These forms are also due to the clinical psychology executive aide no later than the end of the second week of December. Additionally, each clinical supervisor will complete the Clinical Competencies Form for the student every semester and those aggregated ratings will inform the student’s course grades in Practicum, Externship, and Internship in addition to contributing to the ASEF.

Student Documentation of Achievement of Program Goals and Matriculation Progress

Though student achievements in curricular, research, and clinical areas progress is assessed each term, each student’s overall progress in meeting program and individual goals is assessed programmatically on an annual basis. This process begins with each student gathering and submitting information as follows:

Each student will submit a completed ASEF along with portfolio containing a cover sheet identifying admission year to the program and primary academic advisor. The portfolio includes a copy of Program of Study for the Master's Degree form and Program of Study for the Doctoral
Degree Form including all courses completed, course grades, and any transferred courses; current curriculum vitae; research progress including conference presentations, manuscripts, and grants; degree milestones including Thesis, Preliminary Project, and Dissertation; clinical skills progress including documented training hours and Clinical Capstone Project; any and all documentation pertaining to remediation or disciplinary actions, and professional development and lifelong learning activities including invited talks or presentations, conferences and workshops or talks attended, membership in professional organizations, teaching experience, and other service activities.

Portfolios are to be submitted to the primary academic advisor by the end of the last week in November. The student should then schedule a time to meet with the primary academic advisor to review and discuss progress as delineated in the portfolio. At this time the graduate student and primary academic advisor should complete the Signature Form for Portfolio Review and the student should turn in this form along with the portfolio (and ASEF described above) to the clinical psychology executive aide by the end of the second week in December. In addition to benefiting each student directly for internship and employment applications, the documentation of activities and experiences are used in program evaluation to demonstrate the program’s commitment to applied training and to fostering lifelong learning.

Program Evaluation

All students involved in clinical training placements will evaluate the placement and clinical supervisor each semester via the Student Evaluation of Placement Form and Student Evaluation of Supervision Form, respectively. These forms should be submitted to the clinical psychology executive aide no later than the end of the last week of classes each semester.

To ensure monitoring of mission and integration with program goals, students anonymously complete the Student Perception of Goal Achievement Form annually. Additionally, placements rate match of clinical experiences with program goals and objectives annually (Survey of Program Goals Form).

Timeline

*No later than last week of November:*
  - Portfolio due to primary academic advisor
No later than the end of the first week in December:
   Meeting with primary academic advisor to discuss ASEF, Portfolio, and Research Competencies Evaluation Form

No later than the end of the second week in December:
   ASEF, Portfolio and Signature Form for Portfolio Review, and Research Competencies; Forms due to executive aide

No later than the end of the last week of classes each semester:
   Clinical Competencies Form, Student Evaluation of Placement Form, and Student Evaluation of Supervision Form due to executive aide

Early spring semester:
   Faculty evaluation committee annual feedback sessions

Summer:
   Student Perception of Goal Achievement Form due to executive aide

**Evaluation Forms**

a. Annual Summary Evaluation Form
b. Research Competencies Form
c. Clinical Competencies Form
d. Signature Form for Portfolio Review
e. Student Evaluation of Placement Form
f. Student Evaluation of Supervision Form
g. Student Perception of Goal Achievement Form
h. Survey of Program Goals Form

**Professional Development and Lifelong Learning**

As indicated above, students throughout the MA/PhD program are expected to actively participate in extracurricular learning experiences such as Grand Rounds for the Medical School departments; the Department of Psychology Speaker Series; the VAMC or Cherokee Health System internship seminars, Frontier Health Systems continuing education workshops; and local, state regional or national professional organizations, among others.
Additional PhD Requirements

All doctoral students are required to participate in at least four semesters of supervised field experience (PSYC 7910 Clinical Externship), and must include primary care and rural mental health settings. In order to enroll for an externship, a student must complete a one semester practicum in the psychology training clinic (The BHWC) and be recommended for externship placement by the Director of Clinical Training. Throughout doctoral level work, a minimum of four semesters, a student will participate in psychology training clinic activities in addition to off-site training placements (e.g., externships). Students enroll in Practicum for 4 additional semesters concurrent with their externship enrollment. The APA Standards of Conduct must be met in all areas.

Upon completion of a successful oral defense of the dissertation project, each student will complete a final oral examination oriented toward the student’s dissertation research area and issues relevant to clinical practice.

Pre-doctoral Internship

A full-time, one-year internship in an agency approved by the student’s primary academic advisor is required as a component of matriculation, and must be successfully completed prior to the awarding of the PhD. This internship is a requirement for APA-approved programs and serves to give students an intensive professional practice experience. A student cannot accept an internship unless the dissertation proposal has been approved. Students register for PSYC 7980 Clinical Psychology Internship during the three terms, fall, spring, and summer of their internship year. A permit for registration is required and is obtained through the Director of Clinical Training.

Dissertation Proposal and Data Collection Deadlines:

_Students applying for an internship must conduct their dissertation proposal by the first Monday in October of the year prior to internship acceptance in order to receive a statement of internship readiness by the DCT._ Further, the dissertation data must be collected before the student can begin the internship unless the internship agency gives written permission that the student may collect data while on internship.
**Internship Preparation**

Internship preparation and application can be a daunting process, and the Program offers an internship preparation workshop to assists each student through the process and to maximize the success of internship placement. The Association of Psychology Postdoctoral and Internship Centers (APPIC) is an educational, non-profit organization with the mission of enhancing internship and postdoctoral training programs in professional psychology. Members are independent agencies conducting or sponsoring internship or postdoctoral training programs, with over 700 programs represented.

Internship applicants can download registration materials from the National Matching Services web site. The clinical program has the authority to determine the applicant’s eligibility for participation in the match. Participants in the APPIC match must register to participate. Applicants must notify internship sites to which they have applied if there is a change in their standing in the clinical program.

To apply for internship applicants must apply directly to the internship programs of interest. After interviewing, applicants submit a Rank Order List of preferred programs. The internship programs also submit a Rank Order List of desirable applicants.

Application dates vary by program. In November a Listing of Programs will be available for access by applicants. In December applicants should return their Agreements and fees to National Matching Services Inc., in order to register for the Match. Sometime in February is the final date for submission of applicant and program Rank Order Lists. Later in February applicants will be informed if they have been matched to an internship position.

**Student Support and Expected Costs**

Students are responsible for adherence to University, School of Graduate Studies, Departmental, Programmatic, and community agency policies and procedures pertaining to their training and matriculation. Managing all of these can be daunting, and there are resources to assist. The following are a list of University resources which can be very beneficial:

**Financial Support**

On average, four to six students are admitted per year, with all students receiving University support through a graduate assistantship for at least the first two years. The support
includes a stipend of $12,000 plus in and out-of-state tuition waivers for the academic year (fall and spring terms). Sources of graduate assistant support in the remaining two years pre-internship vary, and include community training grants and contracts, teaching assistantships, or faculty grants. The stipend amount as well as the contract period after the first two years may vary according to the source of the grant. For example, some community placements have a stipend level of $10,000 for 12 months, and include travel reimbursement. Others have a stipend of $12,000 for a 12 month period. To date, 100% of enrolled students have received at least 4 years of graduate assistantship support.

Though tuition fees are remitted for graduate assistants, students are responsible for other non-tuition fees each semester. Tuition costs and additional fees are included in information posted on the clinical psychology webpage at etsu.edu/psychology/clinical.

Administrative Support

Center for Physical Activity
The mission of the Campus Recreation Department at East Tennessee State University is to provide high quality recreational facilities, programs, and services for the entire campus community, to promote healthy and active lifestyles, and to create a marketable, meaningful work and leadership experience for all employees and Sport Club Officers. Tel: 423-439-7980. Website: http://www.etsu.edu/students/campusrec/

Disability Services
The Office of Disability Services provides a variety of services to students with qualifying disabilities. You can find more information on their website at http://www.etsu.edu/students/disable/default.aspx or by calling the office at 423.439.8346.

ETSU Bookstore
The ETSU Bookstore can be reached at cbirdwell@nebook.com, 423-439-4436, or http://www.etsubookstore.com/. If you have the ISBN you can purchase your textbook from anywhere. Just make sure that you are purchasing the proper edition. The ETSU Bookstore will have the version your instructor ordered but other sources may not.
Goldmail

Your Goldmail account is your official ETSU email address. University policy states that you must use this address as your official point of contact. You are responsible for the messages sent here. Your email address is username@goldmail.etsu.edu and you can access your messages by going to http://goldmail.etsu.edu. Contact the Student HelpDesk if you need help with your password (it can be different from your ETSU password.)

Library

You can access most library materials from your computer. The Sherrod Library even has one librarian dedicated to distance students. Her name is Amy Arnold and she is available at 423.439.4714 or by email at arnolda@etsu.edu. You can search the library databases by starting at http://sherrod.etsu.edu. You will need your ETSU username and password.

Student Counseling Center

Promote mental health, personal growth and positive relationships within the ETSU student community by providing an array of mental health, career, educational, and consultative services. The Student Counseling Center is located on the third floor of the D.P. Culp Center.
Telephone: 423-439-4841
General Information: browsd02@etsu.edu
Website: http://www.etsu.edu/students/counseling/default.aspx

ETSU Graduate Catalog

The ETSU Graduate Catalog contains all the information you will need regarding policies and procedures. It can be found online at: http://www.etsu.edu/reg/catalog/graduate.aspx

Student Health Clinic

The mission of East Tennessee State University Student Health Services is to provide acute/ episodic care and health education, promoting student development of a healthy lifestyle toward the accomplishment of educational and career goals.
Writing and Communication

The Writing and Communication Center provides online assistance for writing papers and research. You can find more information about their services online at: http://www.etsu.edu/academicaffairs/wcc/. You can call them at 423-439-7848 to schedule appointments or email them at etsuwcc@gmail.com.

Student Technical Help

Technical/Computer Help

The OIT Student HelpDesk is your best resource for most technical problems. You can call, email or stop in to see them on the first floor of the Culp Center. Phone: 423.439.5648 Email: shdesk@goldmail.etsu.edu

D2L

You can find answers to many of your D2L how-to questions on this website: http://www.etsu.edu/d2l/students.aspx. If you are still having trouble finding what you need, contact the Student HelpDesk.

Problems viewing course videos

This website lists some possible solutions for problems you might encounter when viewing streaming videos through your online course site: http://www.etsu.edu/academicaffairs/elearning/ats/services/StreamingMediaHelp.aspx

You can also contact the HelpDesk with your questions. The more information you can provide about what is occurring on your computer the easier it will be to help with your problem.

Microsoft Office Free Viewers

Some instructors may post Microsoft Word or PowerPoint documents. Even if you do not have Microsoft Office installed on your computer you can still view these documents.
by installing one of the open source products or by installing the free Office Viewers.

PowerPoint 2007

Word Viewer 2007 –

Excel Viewer 2007 –

Password Reset
Your ETSU password expires every 90 days. You can select the Password Reset link located beneath the D2L login fields or access the page directly at: https://etsuis.etsu.edu/accountactivation/AccountActivation.aspx. The Student HelpDesk can assist you if you are having trouble resetting the password or have been locked out of your account.

Virus Protection
Students may download free Symantec antivirus software at: http://antivirus.etsu.edu. You will need your ETSU username and password to download the software.

School of Graduate Studies
The mission of the School of Graduate Studies is to foster post-baccalaureate programs of scholarship that are recognized for their excellence and contributions to society. The School of Graduate Studies will provide an environment that stimulates:

- Advanced understanding of the concepts, issues and practices of a discipline;
- Independent thought and the ability to generate new knowledge;
- The ability to contribute significantly to the academic community, professions, and society;
- Diversity among ideas, programs, and people.
Office of Financial Aid

The Office of Financial Aid at East Tennessee State University provides a broad spectrum of programs to assist students in financing their college education. The University is committed to providing students with access to education through a variety of resources that includes scholarships, grants, loans, and work-study programs. To receive financial aid, students must review the Policies and Procedures http://www.etsu.edu/finaid/policies/default.aspx, meet student eligibility requirements http://www.etsu.edu/finaid/Eligibility.aspx, and complete all necessary steps outlined in our Step by Step Guide at http://www.etsu.edu/finaid/stepbystep/default.aspx

Department and Clinical Program Administrative Support

The Director of Clinical Training provides administrative oversight of the clinical program. The Director of Clinical Training, Dr. Peggy Cantrell, invites students to maintain open communication and is readily accessible via email or phone for any concerns or questions. If concerns cannot be resolved or questions answered, students should contact the Chair of the Department, Dr. Wallace Dixon. The student’s primary administrative assistance and the liaison with the School of Graduate Studies is the program’s Executive Aide, Carol Gatz. She coordinates graduate assistant and community placement contracts, routes and manages all student files, and assists students with course registration.

The Primary Academic Advisor is a core faculty member who is the point person to address program or training-related questions and concerns. The Primary Academic Advisor is the faculty chair of student research committees (thesis, preliminary project, and dissertation) and is responsible for advising students on their programs of study and mentoring their professional development.

Perhaps one of the most important sources of support for a graduate student is the peer group. The Graduate Student Association of Psychology (GSAP) is the departmental graduate
association. It is a student run association whose purpose is to give representation to the students in matters that need to be addressed to the department and to provide social support and peer mentoring. In addition, GSAP organizes activities to help promote community within the department. The faculty advisor of GSAP is Dr. Jodi Polaha. Membership in GSAP is automatic to graduate students and is another chance to exercise leadership, but is also an excellent source of valuable social support. An elected GSAP representative has an open agenda item in the clinical faculty meetings to formally bring forward any student issues requiring faculty discussion and or action.

Student and Professional Associations

Local Associations

Psi Chi
Psi Chi is the National Honor Society in Psychology. Its purpose is to encourage, stimulate, maintain excellence in scholarship, and advance the science of psychology. If you joined Psi Chi as an undergraduate then you are still a member. To be eligible for membership as a graduate student you must have completed 9 semester hours of graduate courses and have a 3.0 grade point average in all graduate classes. Membership in Psi Chi is encouraged and is a great chance to exercise leadership potential.

Graduate Student Association of Psychology (GSAP)
GSAP is the departmental graduate association. It is a student run association whose purpose is to give representation to the students in matters that need to be addressed to the department. In addition, GSAP organizes activities to help promote community within the department. The faculty advisor of GSAP is the Director of Clinical Training. Membership in GSAP is automatic to graduate students and is another chance to exercise leadership, but is also an excellent source of valuable social support.
Tennessee Psychological Association (TPA)

TPA is an association of professionals in Tennessee which offers resources to both students and professionals within the community. Their mission is to advance Psychology as a science, as a profession, and as a means of promoting human welfare. TPA holds annual conventions in Nashville, TN, wherein you might well present research findings from current work. Membership is open to all students and interns studying psychology in Tennessee.

Graduate and Professional Student Association- ETSU

The Graduate and Professional Student Association (GPSA) of East Tennessee State University is a student-managed organization whose membership is open to all currently enrolled post-baccalaureate degree-seeking students. The primary focus is to improve the quality of graduate and professional education and student experience at ETSU. Graduate and Professional students represent approximately 20% or the total student population at ETSU, and the teaching, clinical and research activities of these students present genuine needs that are considerably different from those of the disparate student population.

GPSA Staff Advisor:  David Moore
Telephone:  423-439-6149
Email:  moored@etsu.edu
Website:  www.etsu.edu/gradstud/gpsa

Regional Associations

Southeastern Psychological Association (SEPA)

SEPA is a regional psychological association affiliated with the American Psychological Association (APA) and is represented by the southeastern states including: Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, District of Columbia, and Puerto Rico.

Tennessee Psychological Association (TPA)

TPA is an association of professionals in Tennessee which offers resources to both students and professionals within the community. Its mission is to advance Psychology as a science, as a profession, and as a means of promoting human welfare. TPA holds annual conventions in...
Nashville, TN, wherein you might well present research findings from current work. Membership is open to all students studying psychology in Tennessee.

**Society of Southeastern Social Psychologists (SSSP)**

Founded in 1978 by a group of social psychologists at the University of Georgia, SSSP boasts a membership of over 400 students, faculty, and professional psychologists throughout the United States. Most members hail from the southeastern states, including Maryland, Delaware, Virginia, West Virginia, Kentucky, Tennessee, North Carolina, South Carolina, Georgia, Alabama, Mississippi, Louisiana, Arkansas, Texas, and Florida. There are no membership dues for SSSP. An annual conference is held each fall.

**National Associations**

**American Psychological Association (APA)**

Based in Washington, DC, the APA is a scientific and professional organization that represents psychology in the United States. With 150,000 members, APA is the largest association of psychologists worldwide. Student affiliates get many benefits of full membership, including publications, special services, and substantial discounts on APA products, including electronic products. Annual membership is quite reasonable for graduate students. Membership is required to obtain insurance from the APA Insurance Trust, which is required to perform clinical work in external settings. APA Insurance Trust student premiums are also very reasonable for comprehensive coverage.

**Association for Psychological Science**

The Association for Psychological Science (previously the American Psychological Society) is a nonprofit organization dedicated to the advancement of scientific psychology and its representation at the international level. The APS mission is to promote, protect, and advance the interests of scientifically oriented psychology in research, application, teaching, and the improvement of human welfare. Annual membership dues for graduate students are reasonable. Students get annual subscriptions to publications, electronic journal access, discounted convention rates, and are eligible for grant and funding opportunities.
Frequently Asked Questions

**Is the program APA-accredited?**

The Clinical Psychology PhD program at East Tennessee State University received accreditation by the APA effective April 17, 2012.

**How long is the PhD program?**

The PhD program is designed as a five-year post-baccalaureate program of study, including a full calendar year of clinical internship. Students earn a master's degree en route as part of the doctoral degree requirements. Students seeking terminal master’s degrees are not accepted. The clinical internship is a full-time supervised employment situation in a formal internship location. The internship is a separate application process and conducted as a ‘match’ similar to medical school residencies. Internships are accredited by the APA independently of doctoral programs. Because there are practical and independent research requirements in addition to structured coursework, it is common for PhD students in clinical psychology program to take longer to graduate than the 5 years of program design.

**May I enroll in the program on a part-time basis?**

No, the program must be matriculated as a full-time student. Similar to medical school, one cannot complete this type of program on a part-time basis. Thus, it is our intent to support every student who enrolls with graduate assistantships and tuition waivers.

**I do not have an undergraduate degree in Psychology. May I still apply?**

Yes, students in related undergraduate degree programs are often interested in graduate work in psychology, and are welcome to apply. There are 18 undergraduate hours in psychology that are required, however, to ensure at least some foundation work in psychology has been completed.

**Is the program going to be offered online?**

There are components of courses that are supported with online material, but the nature of clinical psychology training requires face-to-face training experiences, in our opinion. There is no course that is offered on line, much less the whole program.
**I took the GRE years ago, do I have to take it again?**

GRE scores up to five years old may be used in the application. GRE scores older than five years cannot be submitted.

**I have a master’s degree in a related discipline; will I have to complete the entire program?**

If you have an equivalent master’s degree in Psychology, you can be admitted post-masters. However, you should expect to have to take most of the master’s courses in the current program; every course taken prior to admission will be compared to our program’s courses, and each course must be individually approved by the current course instructor and the DCT. Practicum courses will not be waived. If you have a master’s degree in a related discipline such as social work, counseling, or others, you may petition upon acceptance to have up to nine hours of graduate work transferred to this program.

If you have already completed a master’s thesis, you may petition to have the thesis requirement waived.

**I want to do clinical work, but I’m not sure that I want to go all the way to the PhD. May I be admitted for just the master’s portion and decide later?**

No, there is no longer a terminal master’s program in clinical psychology at ETSU, so all applicants must apply to the MA/PhD combined program with the expectation of completing the doctorate.

**Certification as a Psychological Assistant**

Information on licensing in the State of Tennessee can be found at:

http://health.state.tn.us/Boards/Psychology/index.htm

**APA Ethical Principles of Psychologists and Code of Conduct**

Graduate students in the psychology program at ETSU are expected to conform to the ETSU guidelines, as well as the APA Ethical Principles and Standards of conduct. (APA, 2002).
The APA Ethics Code can be accessed through this website: http://www.apa.org/ethics/code/index.aspx

Policies and Procedures

Academic Honesty

Academic honesty and integrity are important characteristics for any institution. In accordance with ETSU’s and the Psychology Department's commitment to integrity, policies regarding academic honesty have been adopted. For a more complete overview of the University's policies, students are encouraged to refer to the current ETSU Graduate Student Handbook. Copies are available online at: http://www.etsu.edu/reg/catalog/graduate.aspx

Included in the policies on academic honesty are statements about plagiarism, fabrication, cheating, and misconduct. Plagiarism is the use of another person's words, ideas or data as one's own. Work submitted for credit that includes another's words, ideas or data is to be appropriately referenced. Any work submitted certifies the originality of all work unless otherwise identified and acknowledged. Plagiarism covers both published and unpublished sources. Fabrication is the use of invented or falsified research or findings. This includes citing material not contained in a source, listing sources in a bibliography that are not used, submitting fictitious data, and presenting work prepared by another as one's own. Cheating is the act or attempted act of deception by which a student misrepresents that they have mastered material or information on an academic exercise. This includes copying another's material, allowing someone to copy your material, unauthorized use of notes and texts, unauthorized collaboration on assignments, and taking a test for another individual. Other misconduct includes: stealing test answers or questions; selling test answers or questions; bribing a person to obtain test answers, questions or information; changing or altering a grade on a test or in a grade book; and being an accessory to the previously stated actions. Academic misconduct is considered a grave offense by all faculty as it should be by all upright students, and its discovery will be treated accordingly; punishment may include dismissal from the program.
Academic Performance

All graduate students must maintain a 3.0 GPA to remain in good standing with the graduate school at ETSU. In addition, the clinical program requires all students to obtain no less than a B in all clinical coursework. If a student wishes to repeat a course all grades are used in computing grade point average. The grade earned on the repeat does not replace the original, but may be considered in Faculty Evaluations of Students.

Academic departments are required to retain grade documentation for a period of one year. Specific student concerns regarding academic records must be addressed within one academic year from the date of posting of grades for the term in question.

Academic Probation

When the cumulative grade point average falls below 3.0, the graduate student will be placed on academic probation. If the student does not achieve a 3.0 cumulative grade point average at the conclusion of one probationary semester, the Dean of the School of Graduate Studies and appropriate college/departmental/program officials will determine whether the student should be dismissed from graduate study at ETSU or continued on probation. No student will be allowed more than two probationary semesters, whether consecutive or cumulative. At the end of a second probationary semester a student whose cumulative grade point average is still below 3.0 will be dismissed from graduate study. A student will be removed from probationary status upon attaining a cumulative 3.0 grade point average. When an "I" grade converts to an "F" after one calendar year, the GPA is adjusted retroactively; consequently, a student may be subject to dismissal without a probationary term.

Dismissal

Students may be dismissed from the School of Graduate Studies for such reasons as academic misconduct; failure to meet conditions of admission; failure to meet a requirement of the program; exceeding the allowed number of probationary semesters; recommendation from the Psychology Department for unethical or grossly unprofessional behavior; etc. Students who have been dismissed from the School of Graduate Studies may address a written request for reinstatement to the Chair of the Department of Psychology within 30 days of receipt of the
dismissal notice. The request should include reasons why the reinstatement should be considered. The department will review the request for reinstatement and make recommendations to the dean of the Graduate School. If the request is denied at the departmental level, the student may then direct a written appeal to the dean of the Graduate School, and a final decision will be made in accordance with policies established by the Graduate Council.

Grievance Policy and Resolution of Conflicts

Student Complaint Policy and Procedure

ETSU Policy

East Tennessee State University is committed to respecting all members of the university community and providing fair treatment regarding complaints by students. The objective of the Student Complaint Policy and Procedure is to ensure that concerns and complaints of undergraduate or graduate students are addressed fairly and are resolved promptly. Complaints usually involve actions affecting students that are alleged to be unjust, inequitable, or create unnecessary hardship. A student may pursue this complaint procedure if he or she believes a problem is not governed by other complaint or appeal procedures at the university: http://catalog.etsu.edu/content.php?catoid=5&navoid=136#Complaint_Policy_and_Procedure and the ETSU catalogs http://www.etsu.edu/reg/catalog/ for other examples). The Colleges of Medicine and Pharmacy have their own student complaint policies; complaints should be directed to appropriate personnel as identified by those colleges.

East Tennessee State University seeks to provide students, staff and faculty members with a safe and secure learning environment, free of crime and/or violations motivated by discrimination, sexual and other bias-related harassment. There are two important complaint policies not governed by the Student Complaint Policy and Procedure: Sexual, Racial, and Other Harassment and Hate Crimes and Bias-Related Incidents. These types of complaints should be filed with the Special Assistant to the President for Equity and Diversity/Affirmative Action Director or, when a charge is by one student against another student, with the Dean of Students according to the procedures described in those policies.
Procedure

When a concern occurs, the student is encouraged to discuss it with the appropriate faculty member or administrator. Often a resolution or an answer can be attained informally. If an informal approach is neither successful nor advisable, the student should use the Student Complaint Policy and Procedure. The procedure for filing student complaints governed by this policy is as follows:

Step 1:
To submit a complaint a student must complete the official Student Complaint Form [http://www.etsu.edu/students/currentstudents/forms.aspx](http://www.etsu.edu/students/currentstudents/forms.aspx) and send it via email attachment, within ten working days of the date of the initiating event, to the chair or director most directly involved (if the complaint is directed against the chair or director, it should be referred to the dean of the college or next level administrator). The chair or director will attempt to determine the validity of the complaint, and in the case of a valid complaint, seek resolution, including administrative action. He or she will communicate his or her decision on the Student Complaint Form and make every effort to do so within ten working days from the conclusion of this process.

Step 2:
If a student wishes to appeal the decision made in Step 1, he or she must submit the Student Complaint Appeal Form A [http://www.etsu.edu/students/currentstudents/forms.aspx](http://www.etsu.edu/students/currentstudents/forms.aspx) and the completed Student Complaint Form via email attachments to the appropriate dean or administrator within ten working days from the date of the decision. Undergraduate students submit the materials to the dean of the college where the issue(s) arose and graduate students submit to the Dean of the School of Graduate Studies. In the case of a complaint involving a director, the student submits materials to the next level administrator.

The student will be invited to discuss the complaint with that individual, who will attempt to determine the validity of the complaint and, in the case of a valid complaint, seek resolution, including possible administrative action. He or she will communicate his or her decision on Student Complaint Appeal Form A and make every effort to inform the student within ten working days of the conclusion of the appeal.
Step 3:
If the student believes that he or she has not been afforded due process, the student must submit Student Complaint Appeal Form B [http://www.etsu.edu/students/currentstudents/forms.aspx] together with Student Complaint Appeal Form A and the Student Complaint Form via email attachments to the vice president of the university division in which the complaint occurred within ten working days from the date of the decision. The vice president will make the final determination about the matter and communicate his or her decision on Student Complaint Appeal Form B and make every reasonable effort to submit his or her decision to the student within ten working days from the conclusion of this appeal. The determination will include reasons for the decision and direct a remedy, if any, to the student complaint.

Documentation
A record of all complaints and their resolution will be documented at each level of the review process by the appropriate administrator.

Revised March 2009

Department of Psychology Progressive Remediation/Disciplinary Policies

(Modelled on the Progressive Disciplinary Policies of ETSU, PPP-70)

The purpose of this policy is to address misconduct or poor performance (other than coursework performance) in a manner that ensures:

- Prompt, consistent, and fair treatment
- All legal requirements are met
- That the rights, benefits, and responsibilities of the student are articulated and protected
- That faculty supervisors/advisors follow standard remediation/discipline procedures

The Director of Clinical Training (DCT) has the delegated authority to suspend, place on probation or terminate the student from the program. No supervisor/faculty advisor has the authority to suspend, terminate, place on probation without prior consultation and approval from the DCT. During each phase of progressive discipline, the DCT and Department Chair (Chair)
must be notified. All supervisors/faculty advisors must maintain appropriate and adequate documentation.

Situations that may trigger progressive remediation/disciplinary policies include, but are not limited to the following:

- Violations of established Program, Department, University, affiliated training sites, and TBR policies and procedures;
- Failure to achieve and maintain standards of conduct;
- Unprofessional or unethical behavior;
- Unsatisfactory job performance;
- Non-compliance with training and graduate assistant contracts;
- Gross misconduct including, but not limited to:
  - Violations of the APA Code of Conduct;
  - Absence or habitual tardiness from duty (e.g., graduate assistant assignments);
  - Any act or omission which may seriously disrupt or disturb the normal operation of the training program;
  - Theft or dishonesty, including academic and scientific misconduct;
  - Gross insubordination;
  - Destruction of university property;
  - Falsification of records;
  - Acts of moral turpitude;
  - The illegal use, manufacture, possession, distribution, or dispensing of controlled substances or alcohol;
  - Disorderly conduct;
  - Provoking a fight;
  - Incompetence resulting in ineffectiveness or public harm;
  - Impairment due to stress, distress, psychological dysfunction, or substance use;
  - Or other intolerable behavior.

I. Remediation Process

Formal remediation is not considered a punishment, but rather a tool to problem-solve and improve performance. Remediation can be used to address minor conduct or performance issues. The process should encourage student’s understanding and concurrence on the issues.
and encourage student’s participation in developing a solution. The DCT and/or Chair will provide assistance in the identification of appropriate remediation options as necessary (e.g., counseling, coaching, and training options). The psychology department will keep a written record of all remediation discussions.

The remediation process should include:

- A memorandum to the student sent by the DCT informing the student of the need for remediation, the reason for remediation (e.g., date of incident, rule or standard violated), and the consequences of not following through with remediation;
- Development of a remediation plan which includes input minimally from the primary academic advisor and the student about the corrective action(s) to be taken;
- Acknowledgement of receipt of the remediation plan by the student;
- Documentation of the remediation plan and the student’s acknowledgement of the remediation plan (maintained in the student’s departmental file);

Possible remediation options include:

- Supervisory counseling;
- Behavioral contracts;
- Reflective papers;
- Informal discussions;
- Formal verbal warning;
- Referral for professional counseling;
- Continuing education (e.g., workshops)

II. Disciplinary Process

If remediation is not successful in solving the problem, then disciplinary processes may be initiated. Prior to any disciplinary step, the supervisor/faculty member must contact the DET before proceeding.

The disciplinary sequence may involve:

- A written warning;
- Probation for up to six months (which may include restriction of duties);
- Suspension of graduate assistantship;
- Suspension from the program;
- Termination from the program;

A. Written warning should include:
   - Details and history;
   - Rules or standards violated;
   - Improvement required;
   - Time table for improvement;
   - Consequences of not improving;
   - Signature of primary academic advisor;
   - Student acknowledgement;

   A copy of the written warning will be placed in the student’s official departmental file.

B. Probation for up to six months.
   Failed remediation may result in additional remediation or the student being placed on probation. If the primary academic advisor believes that failed remediation should result in probation, she or he is expected to provide the DCT with:
   - The details and history of the student’s failed efforts at remediation;
   - The rules or standards violated;
   - The improvement required;
   - Supporting documentation.

   The student will be notified in writing of a decision in favor of probation. A copy of the notification and supporting documents will be placed in the student’s official departmental file. The primary academic advisor is expected to meet regularly with the student to gauge student progress during the probationary period.

C. Suspension of graduate assistantship or suspension from the program
   For conduct violations only; not academic performance.

   If the primary academic advisor believes that after failed remediation and failed disciplinary actions such as written warning and probation, the student should be
suspended from the graduate assistantship responsibilities or the program, she or he is expected to provide the DCT and Department Chair with:

- The details and history of the student’s failed efforts at remediation;
- The rules or standards violated;
- The improvement required;
- Supporting documentation.

The student will be notified verbally and in writing of a decision in favor of suspension from the DCT and signed by the Department Chair. A copy of the notification and supporting documents will be placed in the student’s official departmental file. The primary academic advisor is expected to meet regularly with the student to gauge student progress during the probationary period. All students are entitled to a grievance hearing.

D. Termination from the Program

In cases where students have failed to correct problems after previous attempts at remediation and disciplinary processes, and/or the problem is severe, termination from the program may be justified. In the event of a decision for termination, a written request will be submitted to the Graduate Dean by the DCT (signed by the Department Chair) and will include:

- The details and history of the student’s failed efforts at remediation;
- The rules or standards violated;
- The improvement required;
- Supporting documentation (including prior discipline, counseling, training);

The request is reviewed by the Graduate Dean who consults as appropriate with legal affairs, disability services, etc. A formal termination letter to the student will be written by the DCT and signed by the Chair and the Graduate Dean. A copy of the letter and documentation will be placed in the student’s official departmental and Graduate School files. All students are entitled to a grievance hearing.
III. **Primary Academic Advisor Investigations and Documentation**

Primary academic advisors must investigate a problem or incident before determining what counseling or discipline is warranted. Primary academic advisors should investigate the facts and circumstances surrounding the problem, determine the rules broken, and the work practice not followed. Advisors in their investigation should review work products, interview witnesses, review timesheets, and attempt to directly observe the problem/violation.

IV. **Right to Rebuttal**

Students are permitted to submit a written rebuttal to their supervisor during each phase of the disciplinary process. Written rebuttals must be submitted formally to the DCT. All documents will be reviewed and placed in the student’s official departmental file. Documentation regarding disciplinary procedures remains a permanent part of the student’s official departmental file.

V. **To facilitate the process, faculty may:**

- Gather examples of poor work product or misconduct;
- Observe firsthand the situation or misconduct, if possible, or quote sources of information;
- Determine what rule was broken or research which practice or policy was not followed;
- Plan a private meeting with the student;
- Have an additional faculty or staff member (committee member) meet with the student as a witness;
- Keep a record of problems, dates, correct behavior expected, time-line for correction;
- Develop a list of training opportunities for the student;
- Offer the student the help of the university’s Employee Assistance Program or Student Counseling Center to assist with problems that may be affecting work performance and/or attendance;
- Ask for the student’s perception and ideas;
- Explain that further disciplinary consequences may occur if the problem is not corrected;
• Document all meetings; save emails or other written/electronic communications; transcribe voice messages;

Faculty Grievances

Please consult the Faculty Handbook for the entire text relating to these matters of Complaints and Grievances: http://www.etsu.edu/senate/facultyhandbook/

1.4 Employee Grievance/Complaint Procedures

1.4.1 Purpose
The purpose of these procedures is to provide a clear, orderly, and expedient method through which all employees of East Tennessee State University may process bona fide grievances or complaints.

1.4.2 Policy Statement
It is the intention of East Tennessee State University to provide an effective process for the resolution of problems arising from the employment relationship or environment. To this end, a formal grievance/complaint procedure has been established for the use and benefit of all employees. It is the responsibility of administrative, academic, and line supervisors to inform and make available to all employees information concerning these procedures. When an employee believes a condition of employment affecting him/her is unjust, inequitable or a hindrance to the effective performance of his/her employment responsibilities, he/she should seek resolution through this mechanism without fear of coercion, discrimination or reprisal. The objective of East Tennessee State University's Grievance/Complaint Procedures is to make every effort to resolve a grievance/complaint at the lowest possible step. Toward this end, faculty are encouraged to communicate openly with their immediate supervisors and to consult with a trained procedural consultant (so designated by the Faculty Concerns and Grievance Committee for the university and trained appropriately for the position) for clarity about definitions of grievances and complaints and procedures for advancing either.
1.4.3 Scope
These procedures apply to all employees and cover all employment related issues with the exception of Sexual Harassment, Affirmative Action Matters, and Tenure. The institution has a separate set of guidelines for the processing of Sexual Harassment complaints and matters involving Affirmative Action (i.e., unlawful discrimination on the grounds of race, religion, color, sex, age, handicap, nation origin, or veteran status). Sexual Harassment complaints should be filed with those individuals outlined in the Sexual Harassment Plan while Affirmative Action matter should be filed with the Affirmative Action Director. Furthermore, a separate Committee on Promotion/Tenure appeals exists for the disposition of matters involving tenure or promotion. Moreover, an employee may choose to utilize these procedures for review by the grievance committee (established pursuant to the within guidelines) in the following situations:

1.4.3.1 Actions relating to the suspension of employees for cause or termination in violation of an employment contract which fall under TBR Policy 1:06:00:05 (cases subject to TUAPA); or,

1.4.3.2 Actions related to TBR Policy 5:02:03:00, Section III. 16. b. (2)(suspension of tenured faculty). Furthermore, the University may choose to utilize these procedures for review by the grievance committee (established pursuant to the written guidelines) when resolving a matter initiated pursuant to TBR Policy 5:02:02:00 (faculty promotion).

1.4.4 Definitions
There are two (2) types of matters that may be addressed by these procedures:

(1) grievances subject to committee review; and,

(2) complaints that must be resolved without committee review.
a. Grievance - (committee review available)
An employee may only grieve those matters which result from any action the Institution has taken against the employee which:

(1) Violates school or TBR policy, or involves an inconsistent application of those policies; or,

(2) Violates any constitutional right including, but not limited to the First, Fourth, or Fourteenth Amendments to the Federal Constitution and specifically, but again not limited to, actions that hamper free speech, freedom of religion, the right to association, personal and professional property rights, provides for improper search and seizure, or denies constitutionally required notice or procedures.

b. Complaints (committee review not available)
A complaint is a concern an employee wants to discuss with supervisory personnel in an effort to resolve the matter. Personnel actions such as performance evaluations, rates of pay, position reclassification, or position termination due to reduction in force are not defined as complaints. In effect, in order for a personnel action such as those described in the preceding paragraph to be formally challenged by an employee or faculty member, the action must be the result of an alleged violation of school or TBR policy, an inconsistent application of those policies, a violation of any constitutional right, et. seq. (Note: bases for challenges are listed in Section III ["Scope"] and Section IV ["Definitions"]).

This section recognizes that the informal “give-and-take” traditionally associated with the employment process will not be altered and that an employee should feel free to express dissatisfaction with the working environment; however, there is an appropriate framework for expressing personal dissatisfaction, which this policy attempts to outline.

121.4.4.2 Employees
All references to the term “employee(s)” contained in these procedures only include administrators, faculty (full-time or temporary contracts), professionals, clerical, and support personnel. Probationary employees are also included in the definition; however, student workers, graduate assistants, adjunct faculty, and temporary workers are not
1.4.4.3 Grievance Committee
There are two grievance committees utilized by the University. The two types are the

(1) Faculty Concerns and Grievances Committee, and

(2) Non-Faculty Grievance Committee.

a. Faculty Concerns and Grievances Committee
The Faculty Concerns and Grievance Committee shall

(a) designate a panel of three faculty members to serve the university as procedural consultants;

(b) participate with the University Attorney in training procedural consultants in the definitions, policies, and procedures related to filing both grievances and complaints;

(c) serve, when asked by the faculty member, as a consultative body for the development of any grievance or complaint, subject to guidelines and restrictions of this process stated in 1.4.10 – Faculty Senate Policy for Faculty Grievances, Sections 1 & 2; and

(d) shall only consider and forward recommendations to the President on those matters which meet the criteria for grievances—with those problems which are deemed complaints to have their ultimate resolution through the Office of the President of the University.

b. Non-Faculty Grievance Committee – omitted from this document; see ETSU, Human Resources for entire text)

1.4.5 Responsibility for Implementation and Compliance
The President of the University has ultimate responsibility for the implementation of these
procedures and is the final decision maker in the resolution of complaints. The final decision making authority in any action involving a grievance, pursuant to TBR Policy 1:02:11:00, resides with the Chancellor of the Tennessee Board of Regents.

1.4.6 General Rules of Implementation
The primary responsibility for resolving grievable matters rests with the employee/faculty member and his or her immediate supervisor. Initial steps should always be taken to resolve disputes at this level before proceeding to the following rules of implementation. When a concern or issue has not been resolved informally, and the concern might be foreseen to result in a formal complaint or grievance, the immediate supervisor will refer the faculty member to an appropriate procedural consultant or consultants for consultation and guidance by giving the faculty member a referral card developed and provided by Faculty Senate.

1.4.6.1 Employees using these procedures shall be entitled to do so without fear of retaliation, interference, coercion or discrimination.

1.4.6.2 A grievance which is the subject of an action filed with an external body shall not be processed through the University's grievance procedures. The term external body includes a court or federal or state administrative body such as the Equal Employment Opportunity, Office of Civil Rights, or Tennessee Human Rights Commission.

1.4.6.3 A grievance/complaint must be presented to the employee's immediate supervisor within ten (10) working days after the occurrence of the incident. Any claim not presented within the time frame provided shall be deemed to have been waived. For repetitive or ongoing incidents or circumstances, the grievance/complaint must be filed within ten (10) working days of the last occurrence of such incident or circumstance or of the discovery by the employee of the occurrence. This policy presumes that all employees or faculty members will use good faith and diligence in the discovery of grievable matters.

1.4.6.4 The grievant/complainant is entitled to be accompanied by an advisor at each step of the procedure; however, the advisor may not act as an advocate on behalf of the
individual.

1.4.6.5 Employees shall be given the opportunity to pursue grievances/complaints during their assigned work time.

1.4.6.6 The President may grant reasonable extensions of the applicable time limits at each stage of the procedure upon the timely showing of good cause. The request for an extension must be in writing. The approval or denial of the request shall also be in writing.

1.4.6.7 Supervisors to whom a grievance is raised and the Grievance Committee may consult the Director of Human Resources for advice on resolving grievances (except for grievances involving an action taken against the grievant by the Director of Human Resources).

1.4.6.8 Copies of all written and associated documentation will be filed in the Office of Human Resources.

1.4.6.9 There shall be a one-semester time limit placed on all grievable matters. In essence, no grievance may be heard unless the grievable incident(s) occurred within the semester immediately preceding the current semester or within the current semester.

1.4.7 Grievance/Complaint Process

1.4.7.1 Steps for Filing a Grievance Only

1.4.7.1.1 Discussion with Immediate Supervisor

A grievance must be brought to the attention of the employee's immediate supervisor within twenty (20) working days after the employee becomes aware of the problem. The employee should state the basis for the grievance and the corrective action desired in temperate and reasonable terms. The employee and the supervisor shall discuss the
grievance in an attempt to resolve the matter in a mutually satisfactory manner. The supervisor shall conduct any necessary or appropriate investigation and inform the employee of a decision based upon full and fair consideration of all the facts within five (5) working days of the initial discussion. The immediate supervisor will assure that the decision is clearly communicated to, and understood by, the employee. If the employee is satisfied with the decision, no additional action is required. If the employee is not satisfied, the employee may proceed to Step 2 and will be referred to an appropriate procedural consultant or consultants for consultation and guidance by giving the faculty member a referral card developed and provided by the Faculty Senate. If no decision is communicated to the employee within five (5) working days of the initial discussion, the employee may proceed directly to Step 2.

1.4.7.1.2 Discussion with Higher-Level Supervisor  If the employee and the immediate supervisor are not able to reach a mutually satisfactory resolution to the grievance, the employee may proceed to discuss the matter with the next-higher-level supervisor within ten (10) working days of the date of the decision of the immediate supervisor. Failure to comply with Step 2 in a timely manner shall be deemed a waiver by the employee for this particular occurrence and the grievance may not be raised again. The next-higher-level supervisor and the employee shall then follow the procedures required in Step 1. If the employee is satisfied with the decision reached by the next-higher-level supervisor, no additional action is required. If the employee is not satisfied, the employee may proceed to Step 3; if the employee has not already seen a procedural consultant, she or he will be referred to an appropriate procedural consultant or consultants for consultation and guidance by giving the faculty member a referral card developed and provided by the Faculty Senate. If no decision is communicated to the employee within five (5) working days of the initial discussion between the employee and the next-higher-level supervisor, the employee may proceed directly to Step 3.

1.4.7.1.3 Written Grievance Statement  
If the employee and the next-higher-level supervisor are not able to reach a mutually satisfactory resolution to the grievance the employee may file a written grievance with
his/her vice president on the designated form, available online at:

http://www.etsu.edu/humanres/documents/FacultyGrievanceForm.pdf

This form shall allow the employee to clearly indicate whether she or he is filing a formal grievance or complaint – or the university may choose to make available two different forms, one for a grievance and one for a complaint: It is the faculty member’s responsibility to make her or his own case for the problem being addressed appropriately as either a grievance or a complaint as delineated in this policy. The grievance must be filed within ten (10) working days of the date of the decision of the higher-level supervisor. Failure to comply with Step 3 in a timely manner shall be deemed a waiver by the grievant for this particular occurrence and the grievance may not be raised again. A copy of the grievance, along with any supporting documentation, shall be given to the immediate supervisor and the next-higher-level supervisor. The vice president may request either or both supervisors to respond in writing to the grievance statement. If the employee is satisfied with the decision reached by the vice president no additional action is required. If the employee is not satisfied the employee may proceed to Step 4. If no decision is communicated to the employee within fifteen (15) working days after filing the grievance with the vice president, the employee may proceed directly to Step 4.

1.4.7.1.4 **Written Grievance Statement** to be Received by the President and Grievance Committee If the employee and the vice president are unable to reach a mutually satisfactory resolution the employee may file with the President of the institution. Any grievant, who may otherwise be entitled to a hearing before the grievance committee, may waive such a hearing and accept the findings of the President. Any faculty member considering such a waiver shall first be referred to an appropriate procedural consultant or consultants for a consultation on the advisability of signing a waiver of this right by giving the faculty member a referral card developed and provided by the Faculty Senate. Any such waiver shall be in writing and signed by the grievant. The waiver should state the matter involved and should expressly state that the right of the grievant to a formal hearing by the Grievance Committee is knowingly and voluntarily waived. If the grievant waives his/her rights to a hearing, the President shall within twenty (20) days after receipt of the grievant's file, advise the grievant of the decision. The President's decision will be final and
shall be directed to the employee. If no decision is communicated to the employee within twenty (20) working days of filing the grievance the employee may file directly with the Chancellor of the Tennessee Board of Regents. If the grievant does not waive the right to a hearing, the President shall, within five (5) days of receipt of the grievant's file, refer the grievance and all relevant documentation to the appropriate grievance committee. Within twenty (20) days after receipt of the grievant's file the committee shall advise the President and the grievant of its decision. The recommendation shall be based on a full and fair consideration of all the facts and circumstances. The report shall also contain a summary of the committee's investigation and findings.

1.4.7.1.5 Appeal of Grievance to the Chancellor, Tennessee Board of Regents
In any case where the President makes a decision adverse to the grievant, the President shall advise the grievant of his/her right to appeal the decision to the Chancellor. The employee's appeal to the Chancellor must be filed within fifteen (15) working days of the date of notification of the President's decision.

1.4.7.2 Steps for Filing a Complaint Only  The steps involved in the resolution of complaints follow the same procedures as those outlined for the resolution of grievances with the following exceptions: a. Complaints do not include a right to a hearing or adversarial proceeding before the grievance committee; and, b. The President is the final decision maker involving complaints; that is, the complainant does not have the right to appeal to the Chancellor of the Tennessee Board of Regents.

1.4.8 Maintenance of Records
Copies of all written grievances/complaints and accompanying responses and documentation will be maintained with the Office of Human Resources for at least three (3) years.

1.4.9 Committee Membership and Selection

1.4.9.1 A Faculty Concerns and Grievances Committee shall serve as an advisory body to
advise the Senate and, through the Senate, either the Vice President for Academic Affairs or the Vice President for Health Sciences on matters arising from either a concern or a grievance filed by a faculty member or members. The committee shall consist of one faculty senator from each college and school. An alternate may be asked, by the Senate president, to sit in place of a regular committee member in those cases in which the regular committee member is unable to serve or cannot be present for one or more scheduled meetings. A committee member who has a particular interest in the case outcome will excuse him or herself from the committee and be replaced by an alternate for that hearing.

1.4.9.2 The committee will be appointed by the Faculty Senate, as a committee of the Senate. The chair shall be elected by the committee members at their first meeting of each academic year.

1.4.10 Faculty Senate Policy for Faculty Grievances

All formal complaints and grievances by faculty are now governed by the East Tennessee State University's Employee Grievance/Complaint Policy and Procedure(1.4). Any faculty member wishing to formally challenge an administrative decision should carefully follow the procedures outlined there and it is recommended that she or he consult with an appropriate procedural consultant or consultants with regard to policy, procedures, and rights. However, faculty members occasionally want an opportunity to discuss their concerns with their peers and to obtain their peers’ advice, without becoming mired in formal grievance procedures.

East Tennessee State University provides two avenues for such discussions/consultations—either or both of which are available to all faculty members: The first is a consultation with a trained procedural consultant or consultants, and the second is through a formal consultation (specified and limited) with selected members of the Faculty Senate Committee on Faculty Concerns and Grievances. Members of the Committee on Faculty Concerns and Grievances who provide formal consultation on a case will not sit on a formal grievance hearing of that case. Therefore, we recommend that the Senate
Committee on Concerns and Grievances will serve two functions in addition to those specified in the Senate By-Laws 1.5.1.3.

1. The Committee will discuss concerns filed by individual faculty members. A concern is defined as any matter that could be subject to a complaint or grievance as outlined under the University's Complaint and Grievance Policy. In addition, the committee will have the discretion to discuss any other matter sit deems appropriate.

Prior to meeting with the committee, the faculty member will submit a brief statement of her/his concern. In discussing such matters, the Committee will not function as an adversarial hearing board. Rather the committee members will listen to the faculty member's/members' complaint and advise her/him as they see fit. They will advise the faculty member about the proper way to proceed. However, the committee's deliberations, since they are merely advisory, cannot become part of any formal grievance the faculty member chooses to file. Deliberations will be confidential, unless all parties agree otherwise. The committee will maintain no records.

2. If the faculty member chooses to file a formal grievance, the committee, in conjunction with the President of the Faculty Senate, will select a five-member committee who will formally hear the grievance in accordance with university policy.

Teaching Experience

Overview

Teaching experience prepares students in communication and instructional skills appropriate for a variety of professional positions. The program recognizes that teaching requires a synthesis and understanding of the discipline and its methodologies, which is uniquely afforded by this pedagogical experience.

Students are given the opportunity to engage in a variety of teaching experiences. As part of their required number of hours in the department, first year PhD and second year PhD
students may be assigned to a faculty member who requires a teaching assistant (TA) for an undergraduate course offered through the department. Students may serve as a TA after completion of 18 graduate hours.

Responsibilities of TA's include preparing and presenting lectures, assigning and grading homework, and assisting in the proctoring and grading of exams. For example, there are instances when a graduate student, working as the teaching assistant for a professor, may be asked to present lectures to an undergraduate or first-year graduate class. Students are supervised by the faculty member who is the lecturer in the course. Meetings should be arranged between TAs and faculty members at the beginning of each term to discuss mutual expectations. In addition, TAs may also be asked to teach a laboratory section of a course. TAs are expected to make themselves available to students by maintaining weekly office hours. These hours should be arranged at the start of the term and announced during the first week of classes.

**Teaching Assistant Policy**

Per university policy, a full time TA load is 20 hours per term. Of these 20 hours, it is expected that at least 8 per week will be devoted to in-class activities and office hours. TA's will be assigned office space. TA's will be supplied with a suitable computing infrastructure. Assignment of TA's will, where possible, be with their mentor or a core faculty member in their program track, at least some of the time. TA assignments may be varied for experience and will involve other faculty or courses as the department needs and determines.

**Additional Optional Teaching Opportunities**

As students progress through the graduate program, opportunities may arise to teach a variety of other courses, or parts of courses to undergraduates. For example, students who have completed the requirements for a Master's degree are able to teach their own courses, and could be hired as adjunct faculty. In this case, the student would have complete responsibility for the course. These responsibilities include selecting texts, presenting lectures, assigning homework, grading exams, and assigning grades.
Supervision and Evaluation

All TAs are supervised by an assigned faculty member. During the first week of the fall semester, a meeting between the TA and faculty member is held to provide an orientation to the material and teaching guidelines. Throughout the term, the faculty member and TA meet as needed. At the end of the term, the TA will meet with the faculty member to review feedback and overall performance.

Professional Ethics

Teaching assistants are expected to adhere to the same ethical standards as ETSU University faculty and staff. TAs should be clear, consistent, and objective in developing classroom policies and assigning grades to students. TAs must also maintain strictly professional relationships with students at all times.

###FALL (1st year)
- Connecting informally with faculty about thesis research ideas
- Identify a thesis committee chair person

###SPRING (1st year)
- Identify a thesis committee chair person
- Work on thesis research question; develop chapter one outline

###SUMMER (1st year)
- Work on thesis research question; develop chapter one outline; form committee
- Complete forms: Appointment of Advisory Committee, Program of Study, Application for Candidacy
- Complete chapters one and two of thesis
- Propose thesis and collect data
- Identify a thesis committee chair person

###FALL (2nd year)
- Complete chapters one and two of thesis
- Propose thesis and collect data
- Work on thesis research question; develop chapter one outline; form committee

###SPRING (2nd year)
- Complete clinic practicum;
- Complete all Masters degree requirements
- Complete comprehensive case presentation
- Defend thesis

Complete forms: Request to Sit for Comprehensive Case Presentation, Notification of Oral Defense, Intent to Graduate
- Complete chapters one and two of thesis
- Propose thesis and collect data

THE APPOINTMENT OF AN ADVISORY COMMITTEE
FOR THE MASTERS DEGREE

Student Name: ________________________  E# ________________________
Admitted to graduate school in the ________ semester of ____________
(Fall/Spring/Summer) (Enter year of admission)

Field of Study: Psychology

Concentration: Clinical Psychology

NOTE: The student is responsible for scheduling a conference with her or his Primary Academic Advisor to nominate an advisory committee. It is the responsibility of the student to present this appointment form to the Director of Clinical Training and to all committee members for signatures and to file this form with the Executive Aide for Clinical Psychology who will submit the form for filing with the School of Graduate Studies.

Faculty signatures affixed below constitute acceptance of the advisory committee assignment. The Primary Academic Advisor is responsible for reviewing the student’s program and ensuring that it fulfills program requirements.

Important Information

The department is responsible for sending a copy of the student’s abstract to Graduate Faculty Representative (Outside Observer) at least ten days before the defense. In case of cancellation, the department is responsible for notifying the Graduate Faculty Representative and the appropriate Graduate Studies Liaison.

The Graduate Faculty Representative is not considered a part of the examining committee, does not vote, but must complete the NARRATIVE REPORT form and return it to the School of Graduate Studies immediately upon completion of the exam.

Electronic Theses and Dissertations
School of Graduate Studies at East Tennessee State University

Checklist of Requirements

[ ] Defend your manuscript successfully to your graduate advisory committee.
[ ] Get agreement from your committee to release your manuscript for review by the School of Graduate Studies.
[ ] Fill out a Manuscript Review Form.
[ ] Have your committee members sign the authorization section of the Manuscript Review Form.
[ ] Fill out an ETSU ETD Release Form and a UMI ETD Release Form.
[ ] Give the Manuscript Review Form and the two release forms to the Graduate School.
[ ] If your research was reviewed by the IRB, turn in a copy of the compliance letters from the IRB.
[ ] Pay your microfilming fee to the Business Office, 2nd floor, Dossett Hall ($63.51 for theses, $74.46 for dissertations).
[ ] Give a copy of the receipt for the microfilming fee to your Program Specialist in the Graduate School.
[ ] Connect to the ETD Manager web site (http://etd-submit.etsu.edu) and create your activity account.
[ ] Login to your account and complete the online profile.
[ ] Convert your manuscript into PDF format using Adobe Acrobat software.
[ ] Login to your account and submit your converted manuscript file by the initial review deadline (listed in the ETSU Graduate Catalog and the Schedule of Classes.)

If you have done all this, you have met the requirements for the initial review deadline. The Graduate School readers will review your manuscript and either recommend its approval or return it to you via email, with comments.

You may correct your original manuscript, convert to PDF, and resubmit as many times as are needed. You must, however, meet the approval deadline or your graduation will be delayed. When it is approved, you will be notified via email.

[ ] Resubmit your manuscript as many times as needed, but earn approval before the approval deadline.
[ ] If you are a doctoral candidate, fill out and turn in to the Graduate School the Survey of Earned Doctorates.
[ ] Celebrate.

THE APPOINTMENT OF AN ADVISORY COMMITTEE
FOR THE DOCTORAL DEGREE

Student Name: ________________________  E# ________________________
Admitted to graduate school in the _________ semester of ________________
(Fall/Spring/Summer) (Enter year of admission)

Field of Study: Psychology

Concentration: Clinical Psychology

NOTE: The student is responsible for scheduling a conference with her or his Primary Academic Advisor to nominate an advisory committee. It is the responsibility of the student to present this appointment form to the Director of Clinical Training and to all committee members for signatures and to file this form with the Executive Aide for Clinical Psychology who will submit the form for filing with the School of Graduate Studies.

Faculty signatures affixed below constitute acceptance of the advisory committee assignment. The Primary Academic Advisor is responsible for reviewing the student’s program and ensuring that it fulfills program requirements.

Revised October 2013  Page 110
I, ___________________________  _______________, hereby apply for admission to candidacy for the Doctorate in Psychology with a concentration in Clinical Psychology at East Tennessee State University. To the best of my knowledge, I have completed all of the prerequisites for admission to candidacy, graduate as well as undergraduate, including completion of the master’s degree in Psychology based in part on an empirical thesis, the Clinical Capstone Case project, and the Preliminary Examination Project.

My transcripts of undergraduate and graduate credits are on file with the Dean of the School of Graduate Studies.

In consultation with my Primary Academic Advisor and all members of my dissertation committee, I have decided to utilize the following format for completion of my dissertation:

   Traditional Format ☐ or Alternate Format ☐

Please note that the use of the Alternate Format for dissertations must have prior approval by the Primary Academic Advisor, all members of the student’s dissertation committee, the Clinical Faculty, the Graduate Coordinator, and the Department of Psychology Chair.

The proposed title for my doctoral dissertation is

______________________________________________________________

Student name: ____________________________  Date: ____________

Program initiation year: ____________________________

Primary faculty advisor: ____________________________

Examples of ratings include:
Unsatisfactory = frequently missed class, did not participate in class, did not turn in assignments (<C)
Needs improvement = occasionally missed class, minimal class participation, late assignments (C or B-)
Expected for level of trainee = “B” quality work
Exceeds Expectations = B+ or A quality work
Exceptional = rarely used; denotes truly superlative performance

**INSTRUCTIONS for SUPERVISORS (IMPORTANT, PLEASE READ CAREFULLY):**

*Do NOT rate students at Levels Higher Than Appropriate. Ratings should reasonably reflect their actual time in the program to date. The purpose of the evaluation process is to show accurately the development which occurs across time as a result of experience, education, and training.*

Mark N/A if an item is not applicable, and fill out all other item as follows:

**Scale/Rating Definitions:**

**Needs Remediation:** Requires remedial work in this area; competency attainment is not at level expected for type of research experience being rated. Specific activities may be required to address noted issues.

**Beginning Student Level:** Possesses basic research skills. Ratings reflect knowledge, understanding, and application of fundamental research methods and analyses. Students are most likely to consistently achieve this level during their first year in the program.

**Intermediate Student Level:** Possesses intermediate research skills. Ratings at this level reflect knowledge, understanding, and application of research methods, analyses, writing skills, and professional dissemination of results, commensurate with an intermediate student status. Intermediate criteria include, but are not limited to, accomplishments such as: ability to formulate basic hypotheses and articulate methods to test research questions; understanding and use of advanced techniques of statistical analyses with faculty supervision; competently designing and conducting research projects with faculty supervision; engagement in at least one opportunity annually with regard to professional dissemination of research results (e.g., presents at conferences, submits manuscripts to peer-reviewed outlets); assists faculty in developing grants; etc. Students are most likely to consistently achieve this level during their second and third years in the program.

**Advanced Student Level:** Possesses advanced research skills. Ratings at this level reflect knowledge, understanding, and application of research methods, analyses, writing skills, and professional dissemination of results, commensurate with an advanced student status. Advanced criteria include, but are not limited to, accomplishments such as: acquisition of skills needed to execute sophisticated techniques of statistical analyses without faculty supervision; independence in competently designing and conducting research projects; engagement in multiple opportunities annually with regard to professional dissemination of research results (e.g., presents at conferences, submits manuscripts to peer-reviewed outlets); primary authorship on small grants and/or advanced assistance of faculty on large grants; etc. Students are most likely to consistently achieve this level during their third and fourth years in the program.

**Professional Level:** Possesses entry level doctoral professional research skills. Ratings at this level reflect knowledge, understanding, and application of research methods, analyses, writing skills, and professional dissemination of results, commensurate with an entry-level professional with a doctoral degree. Students are most likely to consistently achieve this level during dissertation completion and/or Internship years.

Please be as objective and honest as possible so that we may deliver the most accurate feedback to the student, and if needed, create a competency-based remediation plan with specific, clear goals.

Please discuss your ratings with the student researcher, during which time you may adjust the ratings as you see fit and sign the form. There is a place for students to write whether they agree or disagree with your evaluation, and if they disagree, to explain the reasons for that disagreement. Your time and effort is greatly appreciated!
At what level does the student demonstrate substantial understanding and competence in…

| ETSU Clinical Psychology PhD Program |
| Graduate Student Clinical Competencies Form |

| Student Name (print): |
| Supervisor Name (print): |
| Clinical Site Name (print): |

| Semester (circle specifics): | Spring | Summer | Fall | Year (write in): |

| Experience Level (circle proper level): | Clerkship II | BHWC Practicum I | Advanced Practica/Externship | Pre-doctoral Internship |

| Placement Type (circle if applicable): | Rural Placement | Primary Care Placement |

**INSTRUCTIONS for SUPERVISORS (IMPORTANT, PLEASE READ CAREFULLY):**
Mark N/A if an item is not applicable, and fill out the appropriate sections as follows:
- Clerkship II: CLINICAL SKILLS I;
- BHWC Practicum I: CLINICAL SKILLS I & II;
- Advanced Practica, Externships AND Pre-doctoral Internship: CLINICAL SKILLS I, II &III;
- Rural placements (>25% of clients designated rural) and/or Primary Care placements, please fill out MISSION SPECIFIC SKILLS in addition to other relevant sections for each student training level.

**Scale/Rating Definitions:**
- **Needs Remediation:** Requires remedial work in this area; competency attainment is not at level expected for type of clinical experience being rated. Specific activities may be required to address noted issues.
- **Beginning Student Level:** Shows basic knowledge and understanding of how to analyze problems and of intervention skills and the processes and techniques of implementing them.
- **Intermediate Student Level:** Recognizes some important recurring domain features and to select appropriate strategies to address the issue at hand. Generalization of diagnostic and intervention skills to new situations and clients is limited, and support is needed to guide performance. Most common rating during practicum and community placements.
- **Advanced Student Level:** Shows integrated knowledge of the domain in question, including appropriate knowledge of scholarly/research literature, as needed. Fluent in the ability to recognize important recurring domain features and to select appropriate strategies to address the issue at hand. Recognition of overall patterns, of a set of possible diagnoses, and/or treatment processes and outcomes for a given case are taking shape. Student is less flexible in these areas than the proficient psychologist, but does have a feeling of mastery and the ability to cope with and manage many contingencies of clinical work.
- **Professional Level:** Shows knowledge, skills, and abilities commensurate with an entry-level professional with a doctoral degree. Students are most likely to consistently achieve this level during Internship.

Please be as objective and honest as possible so that we may deliver the most accurate feedback to the student, and if needed, create a competency-based remediation plan with specific, clear goals.

Please discuss your ratings with the student clinician, during which time you may adjust the ratings as you see fit and sign the form. There is a place for students to write whether they agree or disagree with your evaluation, and if they disagree, to explain the reasons for that disagreement.

Your time and effort is greatly appreciated!
CLINICAL SKILLS I: ABILITY TO EFFECTIVELY DISCUSS CONCEPTS
FILL OUT THIS SECTION FOR CLERKSHIP II AND BEYOND
(This is the ONLY section needed for Clerkship II Students)

Student demonstrates ability to effectively discuss…

| I-1...the cognitive aspects of behavior (e.g., automatic thoughts, schemas, beliefs about self). 1-1c; 1-2a |
| Needs Remediation | Beginning Student Level | Intermediate Student Level | Advanced Student Level | Professional Level | N/A |

| I-2 ...the affective aspects of behavior (e.g., emotional expression, lability, display rules). 1-1d; 1-2a |
| Needs Remediation | Beginning Student Level | Intermediate Student Level | Advanced Student Level | Professional Level | N/A |

| I-3...the biological aspects of behavior (e.g., genetic predispositions, physiology, pharmacology). 1-1e; 1-2a |
| Needs Remediation | Beginning Student Level | Intermediate Student Level | Advanced Student Level | Professional Level | N/A |

| I-4...the social aspects of behavior (e.g., relationship-based roles, stigma/stereotyping, interpersonal/dyad/group dynamics). 1-1b; 1-2a |
| Needs Remediation | Beginning Student Level | Intermediate Student Level | Advanced Student Level | Professional Level | N/A |

| I-5...individual difference in behavior (e.g., trait/personality characteristics, demographic factors). 1-2a; 1-3a |
| Needs Remediation | Beginning Student Level | Intermediate Student Level | Advanced Student Level | Professional Level | N/A |

| I-6...human development (e.g., developmental stages/milestones, stage of life issues/challenges). 1-2a; 1-3b |
| Needs Remediation | Beginning Student Level | Intermediate Student Level | Advanced Student Level | Professional Level | N/A |

| I-7...dysfunctional behavior or psychopathology (e.g., DSM-IV-TR symptoms/criteria/diagnosis, family history, patient history). 1-2a; 1-3c |
| Needs Remediation | Beginning Student Level | Intermediate Student Level | Advanced Student Level | Professional Level | N/A |

| I-8...professional standards and ethics (e.g., limits of confidentiality, disclosure of student status, on time to therapy, supervisory, and staff meetings, effectiveness in writing notes/reports/letters, adherence to deadlines, promptness in communications, following procedures for resolution of conflicts, and ability to work well with other professionals). 3-1; 3-2 |
| Needs Remediation | Beginning Student Level | Intermediate Student Level | Advanced Student Level | Professional Level | N/A |

| I-9...issues of cultural and individual diversity (e.g., topics of ethnicity, race, sex, sexuality, SES, disability, geography, politics, religion, etc.). 3-1; 3-2 |
| Needs Remediation | Beginning Student Level | Intermediate Student Level | Advanced Student Level | Professional Level | N/A |

| I-10...attitudes essential for lifelong learning, scholarly inquiry, and professional problem-solving. 1-1a; 1-2a; 3-1; 3-2 |
| Needs Remediation | Beginning Student Level | Intermediate Student Level | Advanced Student Level | Professional Level | N/A |
Student applies concepts in therapeutic situations, and articulates rationale for doing so in supervision, in such a way as to demonstrate an understanding of...

### II-12...theories and methods of assessment and diagnosis, including the process of administration, scoring, and interpretation of psychological measures as pertains to diagnosis and treatment planning issues (may include objective and/or projective tests). 1-2a; 1-3a; 1-3b; 1-3c; 1-3d

| Needs Remediation | Beginning Student Level | Intermediate Student Level | Advanced Student Level | Professional Level | N/A |
**CLINICAL SKILLS II (CONTINUED)**

Applies concepts in therapeutic situations, and articulates rationale for doing so in supervision, in such a way as to demonstrate an understanding of...

| II-13…theories and methods of effective intervention, including the major systems of empirically supported and accepted psychotherapy practices, and an understanding of case conceptualization and treatment plan development and implementation. 1-2a; 1-3a; 1-3b; 1-3c; 1-3d |  |
| Needs Remediation | Beginning Student Level | Intermediate Student Level | Advanced Student Level | Professional Level | N/A |

| II-14…theories and methods of evaluating efficacy of interventions, including consultation of empirical literature and theoretical underpinnings central to evaluating psychotherapeutic efficacy, and skills needed for empirically evaluating their own psychotherapy practice. 1-2a; 1-3a; 1-3b; 1-3c; 1-3d |  |
| Needs Remediation | Beginning Student Level | Intermediate Student Level | Advanced Student Level | Professional Level | N/A |

| II-15…the need for supervision and self-evaluative processes, as well as demonstration of proper preparation for meetings (e.g., video cued, case files reviewed) and proper use of critical feedback to further development as a therapist. |  |
| Needs Remediation | Beginning Student Level | Intermediate Student Level | Advanced Student Level | Professional Level | N/A |

---

**CLINICAL SKILLS III: CONSULTATIVE AND/OR SUPERVISORY ACTIVITIES FILL OUT THIS SECTION FOR ADVANCED PRACTICA, EXTERNSHIPS, INTERNSHIPS (In Addition to Clinical Skills I & II Above)**

| III-1 Theories and Methods of Supervision: Student demonstrates understanding and competence in evidence-based clinical supervision models and consultation of empirical literature pertaining to clinical supervision, as well as application of evidence-based models in their own practice of supervision, and attendance to individual cultural differences and ethical issues in supervision. 1-2a; 1-3e |  |
| Needs Remediation | Beginning Student Level | Intermediate Student Level | Advanced Student Level | Professional Level | N/A |

| III_2 Theories and Methods of Consultation: Student demonstrates understanding and competence in the utility, rationale, and models of collaborative care wherein consultation plays an important role, and an application of said principles to the efficient and effective practice of consultation with other professionals. 1-2a; 1-3e |  |
| Needs Remediation | Beginning Student Level | Intermediate Student Level | Advanced Student Level | Professional Level | N/A |

---

**IV: MISSION SPECIFIC SKILLS: RURAL AND/OR PRIMARY CARE PLACEMENTS ONLY**

| IV-1 Demonstrates an understanding of community-based practice in rural and/or primary care settings. 2-1 |  |
| Needs Remediation | Beginning Student Level | Intermediate Student Level | Advanced Student Level | Professional Level | N/A |

| IV-2 Demonstrates knowledge and skills in inter-professional collaboration and professional consultation in rural and/or primary care settings. 2-2 |  |
| Needs Remediation | Beginning Student Level | Intermediate Student Level | Advanced Student Level | Professional Level | N/A |

| IV-4 Demonstrates knowledge and skills in applying models of evidence-based assessment and intervention in rural and/or primary care settings. 2-3 |  |
| Needs Remediation | Beginning Student Level | Intermediate Student Level | Advanced Student Level | Professional Level | N/A |

| IV-5 Demonstrates applied knowledge of clinical supervision in rural and/or primary care settings. 2-4 |  |
| Needs Remediation | Beginning Student Level | Intermediate Student Level | Advanced Student Level | Professional Level | N/A |

Student, please circle below your level of agreement with the assessment of the supervisor. If after discussion with your supervisor about his/her ratings, you disagree in any way with the final evaluation, please print or type an explanation below, or attach additional pages as necessary. Please be specific about which item(s) you are in disagreement with, and specifically list your reasons for your disagreement.

Form Developed with Guidance from the Following:
ETSU Clinical Psychology PhD Program
Signature Form for Portfolio Review

I, ____________________ (Print Graduate Student Name), acknowledge that I have to the best of my ability completed all sections of the portfolio as outlined in the ETSU Clinical Psychology Ph.D. Program Handbook and have reviewed this document and received feedback from my Primary Academic Advisor. I understand that this acknowledgement form and my portfolio should be submitted to the Clinical Psychology Executive Aide (by the end of the fall academic semester) and will be reviewed by faculty as part of my annual review in the spring academic semester.

<th>Not Applicable</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
<td>N/A</td>
</tr>
</tbody>
</table>

1) I am satisfied that the duration of the supervision sessions was appropriate (i.e. they lasted as long as they should).
   | 1 2 3 4 5 N/A |

2) I am satisfied with the frequency of supervision sessions (i.e. supervision sessions occurred when they should have).
   | 1 2 3 4 5 N/A |

3) Management: The supervisor helped me with planning, managing, evaluating and problem-solving issues.
   | 1 2 3 4 5 N/A |

4) Support: I felt supported through the supervisor’s use of ‘core’ relationship conditions (e.g. feeling accepted, receiving recognition and support).
   | 1 2 3 4 5 N/A |

5) Learning
   a) I was able to recognize relevant feelings, becoming more self-aware, (e.g. role play helped me to express emotion).
      | 1 2 3 4 5 N/A |
   b) I was able to reflect on events and perceive things more clearly (e.g. draw on my own experience to give events more personal meaning).
      | 1 2 3 4 5 N/A |
   c) My understanding of my work was improved (i.e. analyzing cases to gain more insight and a better grasp).
      | 1 2 3 4 5 N/A |
   d) Based on applying this information we agreed action/s based on these supervision sessions (e.g. made a plan, agreed steps, set a goal).
      | 1 2 3 4 5 N/A |
   e) The supervisor helped me to try things out and to try and solve problems/practice skills, (e.g. gave me corrective feedback that improved my competence).
      | 1 2 3 4 5 N/A |

6) Of the events which occurred in these supervision sessions, which ones do you feel was the most helpful for you personally? It might be something you said or did, or something the supervisor said or did. (please use other side of page if necessary)

7) Any other comments? e.g. unhelpful events, unresolved problems (please use other side of page if necessary)

As students in the program, you already know that our primary mission is to provide training in clinical psychology emphasizing rural behavioral health and mental health practice in the context of integrated primary health care. However, you may not be completely clear as to our more specific goals and objectives. Further, we would like to get your views on how well the program is meeting these goals and objectives. Please complete this survey and return it to my mailbox in either Rogers-Stout or in the clinic. Do not include your name. Depending upon your matriculation year, you may not be at the point in the program where certain goals are applicable, so please indicate N/A to any of these that do not seem to apply. Please return the survey no later than April 25th.

Thank you, Dr. Cantrell

Circle the number that best fits with how well we have met this objective for you personally through your didactic and applied experiences:

Note - there are two sides.

**Goal #1: Prepare students as independent scientist-practitioners in clinical psychology**

1-1 Provide students with a broad and general foundation in psychological science to enable them to understand the history of thought and development, methodological, and theoretical foundations as they inform the current practice of clinical psychology;

1-2 Provide students with the bases to be skilled in research design, methods, execution, and literature evaluation and integration to stay abreast in the field and to make contributions;

1-3 Provide students with theories and methods in diagnostic assessment, formulating and implementing interventions, and evaluating the efficacy of interventions.

**Goal #2: Prepare students for entry level clinical practice in rural and primary care settings**

2-1 Provide students with cultural competence in working with rural populations and community-based practice
2-2 Provide students with skill development for inter-professional collaboration, communication, and consultation

<table>

Partnerships are essential to the training mission of our Clinical Psychology PhD Program at ETSU, and we greatly appreciate and value the partnership we have with you. We want to make certain that you are aware of our training mission statement, our training philosophy, and our goals and objectives so that these will inform the training opportunities and the supervision you provide to our students. We also need you to inform us as to which of our program goals and objectives are addressed through the training that you provide to our students. We understand that every placement will not address every objective, so do not hesitate to indicate if an objective is not applicable to your placement. Please review the information in this letter, sign and return it to me within two weeks of receipt. Feel free to share with other supervisors who work with our students. I have provided a self-addressed stamped envelope for your convenience.

The primary mission of the articulated master’s/doctoral program in Clinical Psychology at ETSU is to provide training in clinical psychology emphasizing rural behavioral health and mental health practice in the context of integrated primary health care.

**Goal #1: Prepare students as independent scientist-practitioners in clinical psychology**

Thank you for your assistance and for your continuing partnership with our program.

Peggy J. Cantrell, PhD
Clinical Psychologist
Professor
Director of Clinical Training
Appendix E: Practicum Competency and Resolving Difficulties on Practicum Sites

1. Relationships – Have your skills been enhanced through training the formation of positive relationships with colleagues, faculty, supervisors, and importantly, in knowing how to form a therapeutic alliance with your clients?

2. Assessment – Have you been sufficiently prepared to conduct psychological assessment, administration and interpretation of testing, development of intervention or treatment recommendations, and evaluation of outcome?

3. Intervention – Have you been trained to successfully conduct a case from clinical interview, diagnosis, case conceptualization, treatment planning, and therapeutic interventions, to treatment outcome measurement?

4. Diversity – Are you able to be sensitive and knowledgeable about individual and cultural differences as they apply in the practicum setting with clients and colleagues? Have you been trained to understand how individual and cultural differences can affect appropriate provision of psychological services to a diverse population? Do you understand how to apply knowledge of individual and cultural differences to all aspects of training?

5. Supervision – Do you have the ability to make effective use of supervision, to work collaboratively with supervisors, to incorporate supervisory suggestions for growth and learning? Further, are there opportunities for advanced doctoral students to supervise master’s level students, lead staffing, or supervise other students in promoting the development of your own supervisory skills?

6. Ethics – Do you understand the application of the APA Ethics Code to clinical cases and decision making regarding client welfare and risk management? Can you recognize potential and actual ethical issues in professional environments?

7. Management of Stress – Are you mentored on how to manage the demands of the program coupled with health promoting practices for quality of life? Do you know about burnout and methods of prevention? Do you use those methods?

8. Leadership Skills - Do you have opportunities to begin developing management and leadership skills through experiences such as leading research teams, peer supervision, being a clinic assistant, assisting in editorial or administrative roles, or writing and/or managing grants?

Process for Students and Supervisors to Deal with Difficulties Relating to Clerkship or Practicum

Unique professional issues and difficulties may arise for both students and supervisors when clinical psychology students are engaged in clinical field training. In the event that clinical psychology graduate students experience difficulties (defined broadly and may refer to difficulties with supervision, the number of hours, the activities engaged in, or personal issues) while engaged in field training either on clerkship or practicum, it is important that the student initiate discussions with the appropriate person(s) as soon as possible to resolve/address the situation.

We have outlined a flow-chart model reflecting the line of appropriate persons to whom the student experiencing difficulties should follow (see below). Students should first discuss the difficulties with their field supervisor(s). It may be helpful and is appropriate to informally consult with faculty members, research supervisors, trusted colleagues, etc. as preparation for this discussion. In the event that discussions with the field supervisor(s) do not adequately address the difficulties, students should then bring the situation to the attention of the On-site Practicum Coordinator for the agency, and the ETSU course coordinator for clerkships and/or externships. The onsite-coordinator and the ETSU coordinator will attempt to resolve the issue through informal communications and problem-solving. If necessary to the Department of Psychology's Director of Clinical Training (DCT) will be notified at this stage. THE DCT will further attempts, with the student's permission, to resolve the difficulties informally. If the difficulties are of a sufficient magnitude, seriousness or intractability, the DCT will conduct a formal investigation, which may include interviewing the parties involved, or any party who has evidence concerning the validity of the complaint, concern, and/or issue. This process may be continued, if necessary, by contacting the other individuals listed below in the order shown. If the DCT's efforts do not lead to resolution, the student and/or the DCT will refer the issue to the Dean of the School of Graduate Studies as a grievance filed on the part of the student, or as an academic conduct complaint against the student, depending on the nature of the issue. Grievance policies are detailed in the Psychology Department Handbook and the ETSU School of Graduate Studies Handbook.

Care and planning should occur before discussing problems informally with persons not directly involved in your program or training. A student can unwittingly place a fellow student, colleague, or faculty member in a difficult situation by "informally" discussing a situation which the recipient may construe as something which they must ethically act on. Remember, when you start
a conversation with someone about a clinical training matter, who decides what is and is not a consultation becomes a shared responsibility between the speaker and listener.

It is highly recommended that all students review the APA Standards of Ethical Conduct prior to beginning their practica and internships. A copy of these guidelines is at www.apa.org/ethics/code.html. If students have any questions regarding these guidelines, they are encouraged to discuss them with the DCT and/or course coordinator.
Flowchart Model:
Process for Students and Supervisors to Deal with Difficulties Relating to Clerkship or Practicum

Field Supervisor

Appendix F: Community Placement Descriptions

1. Behavioral Health and Wellness Clinic (BHWC) – ETSU Department of Psychology

   (20 hours per week; academic year)
   $12,000 plus tuition remission

   Box 70416
   ETSU Campus
   Johnson City, TN 37614
   Supervisor: Psychology faculty

   Site description: The East Tennessee State University Behavioral Health and Wellness Clinic is a community based clinic run by the ETSU Psychology department. Services provided at the Behavioral Health and Wellness Clinic include psychotherapy for individuals, couples, families and groups. The BHWC also provides a wide range of assessment services. Populations served by the BHWC include children, adolescents and adults of all ages. Because the BHWC is a training clinic, we are not able to be involved in any legal cases or work that is "court ordered". We do not render any opinions for forensic cases, including divorce or child custody.

   Student Description of placement:
   The services offered in this clinic include group, individual and couples therapy. This is a unique placement as a heavy component of the placement allows the student to learn needed administrative skills. Current assignments include assisting in securing state licensure, assisting in the assignment of treatment teams, and developing procedures for the assurance and maintenance of quality control. The graduate assistant at this site also provides direct clinical services under supervision.

2. ETSU Department of Pediatrics - Quillen College of Medicine

   20 hours per week; full year
   $12,000 plus tuition remission

   PO Box 70578
   Johnson City, TN 37614
   Supervisors: Rebecca Powers, MD and Jodi Polaha, PhD

   Site Description: The Department of Pediatrics at the James H. Quillen College of Medicine is committed to improving health care for children in Northeast Tennessee and the surrounding Appalachian Region while providing excellent education to our medical students and pediatric residents. The department consists of 22 full time faculty, numerous clinical faculty and 39 staff and support personnel. The Department of Pediatrics has divisions including the General Pediatrics, Gastroenterology, Endocrinology, Infectious Disease, Pulmonary Medicine, Adolescent Medicine,
Cardiology, Nephrology, Developmental/Behavioral Pediatrics, Hematology/Oncology and Neonatology. The Hematology/Oncology Division is an affiliate of St. Jude Children’s Hospital in Memphis, Tennessee, and provides up-to-date cancer care on clinical research studies from St. Jude and the Children's Oncology Group. Our Newborn Division is the nucleus of the Northeast Tennessee Regional Perinatal Center which services high risk pregnancies and premature newborn care for the eight counties in Upper East Tennessee as well as ten counties in Southwest Virginia, North Carolina and Kentucky.

**Student description of placement:**

1/2 time Behavioral Health Consultant (BHC) at ETSU Pediatrics, located in Johnson City and 1/2 time Telehealth, located on the ETSU campus: This student provides pediatric residency training and on-site consultation at ETSU Pediatrics 10 hours per week (typically 3 afternoons from 1-4 or 5 p.m.). During the other 10 hours, the student works in the Telehealth Grant Program providing 4 hours of consultative services in the "open access hours," 3 hours of specialty mental health treatment (i.e., regular outpatient services), and 3 hours of program development/evaluation work. The Telehealth Program is currently providing services to a pediatric primary care population and a rural OB/GYN program (women’s health) and the program is continuing to grow and expand.

3. **Mountain View Pediatrics, Private Practice – Marion, Virginia**

20 hours per week; full year

$12,000 plus tuition remission

1020 Terrace Drive, #101
Marion, VA 24354
Supervisor: Jodi Polaha, PhD

**Site Description:** Mountain View Pediatrics is serving the healthcare needs of infants, children and adolescents in Southwest Virginia. The site provides care from birth to age 21 including comprehensive medical care and behavioral health. Behavioral Health Consultants through the ETSU Doctoral in Psychology program are in the office on Fridays. They specialize in treating behavior concerns that come up during pediatric visits. Common pediatric behavior concerns include ADHD, sleep, feeding, noncompliance, toileting, school issues, and habits such as thumbsucking or hitting.

**Student description of placement:**

1/2 time BHC at Mountainview Pediatrics in Marion, VA, 1/2 time Telehealth: This student provides on-site consultation at a private pediatric practice in SW Virginia for one full day (Friday) each week. This is a very progressive practice with a new clinic designed to
incorporate a BHC. During the other 10 hours, the student would work in the Telehealth Program providing 4 hours of consultative services in the "open access hours," 3 hours of specialty mental health treatment (i.e., regular outpatient services), and 3 hours of program development/evaluation work. The Telehealth Program is currently providing services to a pediatric primary care population and a rural OB/GYN program (women's health) and the program is continuing to grow and expand.

4. Cherokee Health Systems - Morristown, TN

20 hours per week; full year
$10,000 plus $500.00 per semester TNCARE, plus travel

815 West 5th North Street
Morristown, TN 37814
Services: Primary Care and Behavioral Health
Supervisor: Karina Stewart, PsyD

Site(s) Description: Cherokee Health Systems believes in a type of holistic care called Integrated Care. This biopsychosocial approach to health care addresses the whole person by integrating behavioral services into primary care. By combining the best traditions of primary care (adult, family practice, pediatric) and mental health services the integrated health care team is able to treat the whole person - mind and body so all patient needs are met. Behavioral health consultants work within a primary care setting and are involved in on site and timely assessment, brief intervention and consultation with patients. Services include education, behavioral management and treatment for mental health disorders. After meeting with a physician or nurse, a psychologist may assess and treat patients with behavioral concerns and work with the medical provider regarding referral questions and follow-up. Training and practicum experience is provided to advanced standing doctoral students in Clinical Psychology

Student description of placement:
This site is a community mental health clinic that provides psychiatric, therapy, and primary care services to an adult population. At this site students have the opportunity to get experience with groups, intensive outpatient, crisis intervention, working as part of an integrated team, primarily providing individual psychotherapy and initial intakes, and weekly supervision. At CHS, student clinicians are treated like any other professional from day one.

5. Cherokee Health Systems – Newport, TN

20 hours per week; full year
Funded at $10,000 plus $500.00 per semester TNCARE, plus travel
215 Hedrick Drive  
Newport, TN 37821  
Services: Behavioral Health  
Supervisor: Jean Schaid, PhD

**Student description of placement:**  
This facility provides outpatient mental health and psychosocial services in a very rural location where other health care resources are limited. In addition to individual psychotherapy, this facility offers several group therapy programs. Previous students have served as co-leaders for alcohol and drug abuse treatment groups.

6. **Cherokee Health Systems – Talbott, TN**  
   20 hours per week; full year  
   **Funded at $10,000 plus $500.00 per semester TNCARE, plus travel**  
   6350 W. Andrew Johnson Highway  
   Talbott, TN 37877  
   Supervisor: Tom Bishop, PhD  
   Services: Pediatric Primary Care and Rehabilitation, and Behavioral Health

7. **Frontier Health Systems – Watauga Behavioral Health Services**  
   20 hours per week; full year  
   **$12,000 plus tuition remission**  
   109 W. Watauga Avenue  
   Johnson City, TN  37604  
   Supervisor: Diane Whitehead, PhD

**Site Description:** Outpatient behavioral health, mental health, substance abuse and co-occurring programs for adults, children and adolescents are provided at Watauga Behavioral Health Services. Services include individual and group psychotherapy, marital and family therapy, pharmacotherapy, crisis services, case management, education and consultation services, parenting classes, psychiatric consultation, intensive outpatient A&D, Continuous Treatment Team and Comprehensive Child and Family, and Peer Support Services. Also offered at this site are Child abuse Prevention, a parent education group offered at no charge for parents; Family Links, a short-term respite program for families with children 2 to 15 years old and have severe emotional disturbances in the Tri-Cities area. The program is 8 to 12 weeks for 2 to 4 hours one time per week; Greenwood Challenge, a ropes course carefully planned as an outdoor learning environment where mental and physical problem-solving activities are included. Offers simple to complex elements, develops courage, vision, team spirit, and leadership
skills; Mother-Child Connection, an outpatient program for substance-abusing women who are pregnant or mothers of dependent children; Regional Intervention Program, a parent-implemented program that helps parents work with their own children; and Student Assistance Program, clinical services for at-risk students.

**Student description of placement:**
Watauga Behavioral Health Services has the convenience of being located within Johnson City, and provides students great exposure to a wide range of adult clients in a traditional community mental health center. The site offers psychiatric and psychological services and is a traditional mental health provider. An individual therapist is the primary role at this placement; however, involvement in groups is also possible. This placement also provides the opportunity to interact with administrative staff, social workers, licensed professional counselors marriage and family counselors, nurses, nurse practitioners, and physicians. Watauga offers both a wide demographic in terms of cultural competency and psychological disorders. Typical caseloads at Watauga will include clients with a wide range of psychopathology, including chronic and severe, which helps build comfort, flexibility, and clinical skills. In addition, for those interested, experience with specialized addiction treatment through Intensive Outpatient Services is a unique opportunity at this placement. Watauga serves the wider tri cities community and has a specialized alcohol and drug unit which increases referrals from the community for addictions treatment.

8. **Frontier Health Systems – Holston Counseling Center, Kingsport, TN**

20 hours per week; full year  
$12,000 plus tuition remission

1570 Waverly Road  
Kingsport, TN  37664  
Supervisor: Diane Whitehead, PhD

**Site Description:** Outpatient behavioral health, mental health, substance abuse and co-occurring programs for adults are provided at Holston Counseling Center. Services include individual and group psychotherapy, marital and family therapy, pharmacotherapy, crisis services, case management, psychiatric consultation, intensive outpatient A&D, peer support services. Other services offered at this site include Mother-Child Connection, an outpatient program for substance-abusing women who are pregnant or mothers with dependent children; and HOPE for Tennessee, Health, Outreach, Prevention & Empowerment education / prevention services offered to clients and provider agencies. Information is provided on HIV, STD's, Hepatitis, Tuberculosis, Universal Precautions, Abstinence, Teen Pregnancy.
Student description of placement:
Located in Kingsport, TN, this site serves an adult population. Approximately half of the clients served are considered low SES and cannot afford any other types of services. Many resources in this community are available, but this site seems to operate as a primary hub for community based mental health care. This site is staffed with a variety of counselors, therapists, case managers, psychological examiners, psychiatrists and nurse practitioners.

9. Frontier Health Systems – Holston Children and Youth Services, Kingsport, TN

10 hours per week; full year
$6,000 plus tuition remission

2001 Stonebrook Place
Kingsport, TN 37660
Supervisor: Diane Whitehead, PhD and John Paul Abner, PhD

Site Description: Services include evaluation and treatment of all child and adolescent behavioral health, mental health, substance abuse and co-occurring disorders. Services include individual and group psychotherapy, family therapy, parenting classes, psychiatric consultation, pharmacotherapy, crisis services, case management, consultation and education services, C&Y Continuous Treatment Team, Comprehensive Child & Family Therapy. Also offered at this site are Children First, a court-mandated program for divorcing parents; Intensive In-Home Services including Alcohol & Drug Prevention, a school- and community-based program leads students in a small group process of 8 to 15 sessions; Regional Intervention Program, a parent-implemented program for children with behavior problems; Student Assistance Program, clinical services for at-risk students provides crisis intervention, violence prevention, assessment, life skills training, and parent education and counseling; and TRACES Therapeutic Foster Care and Adoption Services for children and youth with behavioral and/or emotional problems.

Student description of placement:
Located in Kingsport, TN, services are provided to children of all ages up to 18 years. Students are given a great deal of flexibility in terms of extra opportunities such as completing court-ordered drug and alcohol assessments and teaching parenting classes. Depending on the days of the week the student is on site, there are also opportunities to work with adolescents in residential settings.

10. Frontier Health Systems – Hawkins County Mental Health Center

20 hours per week; full year
$12,000 plus tuition remission
101 Lena Drive
Rogersville, TN 37857
Supervisor: Diane Whitehead, PhD

**Site Description:** Outpatient behavioral health, mental health, substance abuse and co-occurring programs for children, adolescents and adults are provided at Hawkins County Mental Health Center. Services include individual and group psychotherapy, marital and family therapy, pharmacotherapy, crisis services, case management, psychiatric consultation, Comprehensive Child and Family Therapy, C&Y Continuous Treatment Team, and consultation and education services. Other programs offered at this site include Project BASIC, an early intervention classroom program that targets appropriate expressions of feelings, social skills, conflict resolution, and problem-solving skills with fun, challenging activities. Also provided is mental health education, early intervention, teacher consultation and school climate projects.

**Student description of placement:**
Located approximately an hour from any other type of mental health services, this small rural outpatient mental health clinic in Rogersville, TN is the only mental health resource that people in the surrounding community have available. This site provides psychotherapy services through a clinical psychologist, LCSW’s and doctoral students. The site also offers integrated psychiatric services through a nurse practitioner. The majority of clients served are impoverished, relying on state funded methods of support for reimbursement of services. Students conduct intakes and provide traditional psychotherapy for individuals of varying demographics and diagnoses. Students work in a mental health setting along with other community mental health providers, which provides ample opportunity for professional development in being an active member of a mental health team. Staff at the site are enthusiastic about working with psychology graduate students and are eager to accommodate students’ interests, such as treating particular age groups and diagnoses, or in various modalities including group, couple, and individual therapy.

11. **Frontier Health Systems: Scott County Behavioral Health**

20 hours per week; full year
$12,000 plus tuition remission

1006 US 23N
Weber City, VA
Supervisor: Farah Williams, PhD

**Site Description:** Outpatient behavioral health, mental health, substance abuse and co-occurring treatment programs for children, adolescents and adults are provided at Scott County Mental Health Center. Services include individual and group psychotherapy, marital and family counseling, psychiatric services, case management, medication
monitoring, crisis services, intensive in-home services, home-based services, education and consultation services, Virginia Alcohol Safety Action Plan and Children in the Middle. Project LINK, an outpatient program for pregnant, substance-abusing women or mothers with dependent children, is also offered at this site. Service in Scott County is provided in partnership with Planning District One Behavioral Health Services.

**Student Description of Placement:**
This placement is a community mental health center that serves both adults and children in a rural community. The population served are persons who don't have insurance, insurance will not pay, or overflow clients. This site is located about 35-40 minutes north of Johnson City and about 5-10 minutes from Kingsport. Great experience working with a variety of levels of service providers including: psychologist, master's level counselors, social workers, case managers, support staff, nurses, and psychiatrist. Students provide therapeutic interventions to children ages 5-17. In addition, there is a heavy focus on assessments. Students have been involved with assessments concerning Mental Retardation Waivers, Capacity to Consent for Treatment, Parenting and Custody Evaluations, Competency to Stand Trial, and other full psychological evaluations used for diagnostic clarification and treatment recommendations. Overall, this is a great place to get both therapy and assessment experience.

12. **Friends in Need Health Center**

**10 hours per week; unpaid**

1105 West Stone Drive  
Kingsport, TN 37660  
Supervisor: Faculty, Department of Psychology

**Site description:** The mission of Friends in Need Health Center Inc. is to provide regionally supported medical, dental and counseling care for the employed uninsured residents and members of their immediate families, of Sullivan, Hawkins and Scott counties.

**Student description of placement:**
Students operate as a behavioral health provider in a primary care clinic that offers reduced cost services for patients that are employed but have no access to medical insurance. Students collaborate with treating medical providers including volunteer physicians, nurses, nurse practitioners, and internal medicine residents, to develop a professional identity as a behavioral health consultant. Consequently, students become proficient in medical terminology and culture and in treating numerous behavioral health concerns including smoking or alcohol cessation, weight loss, pain management, sleep hygiene, and treatment adherence. Students also have the opportunity to carry a
caseload of traditional psychotherapy clients who would not otherwise receive mental health treatment.

13. **Johnson City Community Health Clinic – College of Nursing, ETSU**

20 hours per week paid or 10 hours unpaid; full year
$12,000 plus tuition remission

207 E. Myrtle Avenue
Johnson City, TN 37601
Supervisor: Susan L. Reed, PhD (on site) and Peggy Cantrell, PhD

**Site description:** The Johnson City Downtown Clinic (JCDC), which opened in 1990, was originally established to serve the needs of the local homeless population in Johnson City and has expanded over the past nearly 15 years to include the uninsured, underinsured, TennCare enrollees, a growing Hispanic population and medically indigent individuals. Patient contacts in the clinic meet primary care, prenatal care and socialization needs of these various population groups. No one is turned away because of their inability to pay. In addition, many outreach contacts each year are provided to individuals on the street, in shelters and in farm worker camps. Along with the Hancock County School-based Clinics, JCCHC is one of only a few nurse-managed community health centers (CHC) in the nation to be designated as a Federally Qualified Health Center (FQHC) and is a unique CHC in the nation operating in conjunction with a College of Nursing.

**Student description of placement:**
This is a primary care clinic and the providers are primarily nurse practitioners, with many volunteering their time at the clinic. Psychology students provide behavioral health services in both an integrated BHC role and a traditional format of a 45-50 minute session. Virtually all of the patients seen at the clinic are low SES and do not have insurance. A majority of the patient population is Hispanic, and interpreters are available. This represents a unique opportunity to provide services not only to a diverse client population, but also to develop intervention skills while working with a trained interpreter. Types of psychopathology seen are varied, but affective and anxiety disorders are most prevalent. The JCDC is a great work environment that focuses on patient needs, team work, and integrated care.

14. **Southwest Virginia Mental Health Institute – Marion, VA**

Unpaid position for 2011-2012; may be renewable

340 Bagley Circle
Marion, VA 24354
Supervisor: Colin Barrom, PhD
Site Description: Southwestern Virginia Mental Health Institute (SWVMHI) is a 156-bed state psychiatric institute operated by the Department of Behavioral Health and Developmental Services (DBHDS). The Institute serves adult and geriatric individuals. As part of Virginia's public mental health system, SWVMHI serves adult, and geriatric persons from a number of cities and counties in southwestern Virginia. The SWVMHI catchment area is primarily rural in nature and has a total population of 564,464 people (1999 census figures). The primarily rural nature of the catchment area affects a number and variety of issues that impact the Institute. For example, this region generally has the highest unemployment rate in the state. In addition, outside the larger towns there is no public transportation, and it is difficult for the individuals to come to community clinics for treatment or rehabilitation. Also of note is the relative scarcity of private providers or private psychiatric hospital beds.

Student description of placement:
The placement at SWVMHI is currently an unpaid practicum experience, which will involve providing direct patient care at a psychiatric inpatient facility. The student will be assigned to a clinical supervisor on one unit (the student has a say in which unit they would like to be placed on, i.e. acute, geriatric, extended rehabilitation), and will also have the flexibility to provide care on other units. The student will have the option of participating in group therapy, individual therapy, suicide risk assessment, as well as extended assessment batteries. If interested, the student will also have the opportunity to observe and potentially conduct forensic services including fitness to stand trial, competency hearings, etc. The first student will be placed at SWVMHI from 5.15.2011 – 5.15.2012.

15. Cognitive Behavioral Therapy Center of Western North Carolina, P.A.
2008-2009(Summer Clerkship, one full day for 10 weeks on site) may be renewable with faculty sponsorship

417 Biltmore Avenue, Suite 2E
Asheville, NC 28801
Website: http://www.behaviortherapist.com/

On-site Supervisors: Rick Baker, MA, LPC, Trent Codd, Ed.S., & John Ludgate,Ph.D.
ETSU Supervisor: William T. Dalton III, Ph.D.

Site Description: We provide outpatient cognitive-behavioral therapy and other evidence-based treatments for emotional disorders. Our practice is firmly committed to delivering and disseminating empirically-based treatments. Our commitment is to improve the quality and variety of therapeutic and educational services to our clients and customers. We strive to build a collaborative environment where each person is valued, respected, and actively involved in their personal growth.

Student Description of Placement: session observations, interactions and scholarly discussions with supervisors, and access to book/video library to increase knowledge of related topics.
16. **ETSU Department of Family Medicine – clerkship setting**

917 West Walnut Street  
Johnson City, TN 37604-6527  
Supervisors: Tom Bishop, Ph.D.(Johnson City) and Chris Dula, PhD

**Site Description:** The Mission is to provide community-focused medical education and evidence-based, patient centered care; to improve health in rural southern Appalachia, especially among the underserved population; to model compassionate and efficient care using effective communication skills; and to advance scholarly investigation. We lead through excellence, collaboration and innovation.

**Student Description of Placement:** Student involved in three rotations at primary care sites in the tri-cities region. Each rotation involves experiential and didactic elements, with opportunities to shadow psychological and medical professionals treating various physical, emotional, and behavioral problems among predominately low-income patients.

17. **Mountain States Health Alliance- Cardio-pulmonary Rehabilitation**

**Cardiac Rehabilitation Services at The Wellness Center - unpaid**

200 MedTech Parkway, #200  
Johnson City, TN 37604  
Supervisor: Peggy Cantrell, PhD,

**Site Description:** Cardiac rehab provides patients with an individualized program of exercise and education, prescribed by his/her physician, for a specific condition. The centers have a variety of equipment that may include treadmills, NuStep, Airdyne bikes, arm ergometers, stationary bicycles, rowing machines, ellipticals, recumbent bikes and weights. To assist with patient care, their team includes individuals and physicians with specialized training in cardiopulmonary disease management. This team includes registered nurses, licensed practical nurses, registered respiratory therapists, exercise physiologists, dietitians, cardiologists and pulmonologists.

**Student Description of Placement:** The practicum experience at Cardiac Rehabilitation provides an opportunity to conduct psycho-educational/support groups for men and women who have suffered a cardiac event, most typically a heart attack. The men and women who attend Cardiac Rehabilitation are usually older adults, ranging in age from 50-85. The psycho-educational groups cover topics such as health anxiety, depression, anger, self-care, communication effectively with the physician, and promoting social support. There is also an opportunity to provide individual therapy services at this site. These therapy sessions are typically 30 minutes in duration, and the patients are treated on a first-come, first-serve basis. These patients are typically dealing with depression
and anxiety, the loss of a spouse, interpersonal stress, financial stress, and health anxiety. Cognitive-behavioral, interpersonal, and supportive therapies are most effective for this setting. Additionally, there are some requirements each student has to meet prior to starting at Mountain States Health Alliance, including completing an online orientation, receiving a negative tuberculosis skin test within 60 days of the start date, having proof of the MMR vaccine or titer, having taken and passed a CPR class, and completing a checklist and safety orientation. Rachel will have a list of these requirements, and you will be contacted by the MSHA student coordinator with login information to complete the online requirements.

18. ETSU Student Health Clinic

$12,000 stipend - annual placement

**Site Description:**
ETSU Student Health is a nurse-managed on campus clinic which serves the primary health care needs of ETSU students.

**Placement Description:**
The student trainee provides integrated primary care consultation as well as traditional mental health services in this primary care setting.

19. Mountain City Extended Hours Clinic

$12,000 stipend – annual placement

**Site Description:**
Mountain City Extended Hours Clinic is a rural health clinic that is nurse-managed. Student trainees provide integrated behavioral health and telehealth services to a diverse rural population.
Appendix G: Department of Psychology Diversity Plan

Department of Psychology
Diversity Plan

The Department of Psychology at East Tennessee State University has established a program of clinical training designed to equip students with tools to address the behavioral and mental health needs of people located in the underserved communities surrounding the university. These communities comprise economically disadvantaged and strongly faith-based individuals located within rural Appalachia. In this way, the entire premise of the program is diversity-centered. Yet these three dimensions of individuality are but a subset of a much larger multidimensional spectrum of diversity with which the Department, through formal and informal experiences, attempts to ensure familiarity and sensitivity among all its staff and students. Included in this broader spectrum are, but are not limited to, race, ethnicity, age, sex, gender, sexual orientation, religious orientation, religion, disability status, socioeconomic status, and national origin. Below we describe the department’s efforts to infuse attention and sensitivity to diversity through 1) a long-term, systematic plan for the recruitment and retention of diverse staff and students; (2) education of students; and (3) establishment of a climate of respect.

Long-Term Systematic Efforts at The Department of Psychology at East Tennessee State University has established a program of clinical training designed to equip students with tools to address the behavioral and mental health needs of people located in the underserved communities surrounding the university. These communities comprise economically disadvantaged and strongly faith-based individuals located within rural Appalachia. In this way, the entire premise of the program is diversity-centered. Yet these three dimensions of individuality are but a subset of a much larger multidimensional spectrum of diversity with which the Department, through formal and informal experiences, attempts to ensure familiarity and sensitivity among all its staff and students. Included in this broader spectrum are, but are not limited to, race, ethnicity, age, sex, gender, sexual orientation, religious orientation, religion, disability status, socioeconomic status, and national origin. Below we describe the department’s efforts to infuse attention and sensitivity to diversity through 1) a long-term, systematic plan for the recruitment and retention of diverse staff and students; (2) education of students; and (3) establishment of a climate of respect.
Recruiting and Retaining Diverse Staff and Students

In this first area our plans include a breadth of strategies for recruiting and retaining both diverse faculty and students. Currently we have 15 full-time faculty – 9 men and 6 women. Open faculty positions are advertised in both a general audience publication (i.e., the APA Monitor), and an African-American targeted publication (Psych Discourse). Every department advertisement is subjected to review and revision by ETSU’s Affirmative Action Officer, Dr. Mary Jordan, who directs the Office of Equity & Diversity (http://www.etsu.edu/equity). The Office of Equity and Diversity oversees equity standards and university-wide education and training on diversity. All ads include a statement encouraging minorities and underrepresented groups to apply. In addition, departmental faculty distribute advertisements to colleagues in other psychology graduate departments and to various society listservs such as the Council of Graduate Departments of Psychology (COGDOP) and the Society for Personality and Social Psychology. In order to improve in the area of diversity recruitment, we plan to advertise future open faculty positions in additional listservs that would reach diversity-specific organizations (e.g., APA Divisions 44 (LGBT) and 45 (Ethnic Minority Issues)).

We continually strive to recruit diverse graduate students. Since the inception of the clinical doctoral program we have distributed marketing to over 500 colleges and universities nationwide, including 50 Historically Black Colleges and Universities (HBCUs), more than 70 Christian Colleges/Universities, and more than 50 Colleges and Universities that host a McNair. The program also utilizes a recruiter funded by the School of Graduate Studies who attends graduate school and career fairs at institutions which identify as serving historically underserved groups. The program individually corresponds with all contacts identified through this institutional recruitment. The program participates in student recruitment at professional conferences, such as the Collaborative Family Health Association, Rural Mental Health Association, and the Tennessee Psychological Association. In addition, with each cohort of potential students we recruit doctoral students who are sensitive to diversity issues particularly as they relate to a clinical setting. In this regard, as part of our group interviewing process, we ask a series of interview questions designed to gauge sensitivity to individual and cultural differences. To this end, we have received, on average, 42 applications for our program each year between 2007 and 2010. Table 2 indicates the diversity represented in our applicants, and in the demographics of the 28 students enrolled in various stages of the program during these years. Of the 28 current students, 8 (28.6%) are male,
2 (7.1%) report ethnicity that is non-White. The mean age of current students is 26 years, with some variability (range = 23 to 48). Three (10.7%) report some form of disability-related status.

In addition to student demographic diversity, with each cohort of potential students we recruit doctoral students who are sensitive to diversity issues particularly as they relate to a clinical setting. Thus, as part of a group interview of applicants, we ask a series of interview questions designed to gauge sensitivity:

In the spirit of striving to implement additional strategies for recruitment of diverse faculty and students alike, we believe a restructuring of the departmental website to highlight diversity will facilitate our efforts. According to research recently published in the *Journal of Diversity in Higher Education* (Wilson & Meyer, 2009), programs’ websites have been referred to as the virtual face, and may be critical especially for minority students considering particular schools, as they can evaluate via the website as to whether that college or university takes their needs and interests into consideration.

Our restructured website will highlight the department’s statement on diversity/inclusiveness, as well as departmentally-sponsored activities that relate to diversity, including open positions, speakers, and faculty and student activities (presentations, publications, projects). We will highlight, for example, Dr. Chris Dula, who, in collaboration with a Sociology faculty member, has been awarded a diversity grant from the Tennessee Board of Regents two years in a row. We will also highlight Dr. Stacey Williams’ recent research study on attitudes about sexual orientation. Finally, we will include a description of our recently implemented Priester-Sloan award, which is a graduate student scholarship for first year graduate students, awarded in large part based on financial need. The addition of this award to the website recognizes the struggles of students based on economic circumstance. Hence, a retooled website will help retain students while contributing to a climate of respect.

In addition to our efforts aimed directly at recruiting and retaining diverse faculty and students, we believe that our efforts to promote diversity, both formally, in our training curriculum, and informally, in the environments and climates we establish for them, will indirectly promote the recruitment and retention of diverse faculty and students. Indeed, we believe these two efforts mutually inform one another.
Education of Students

Our systematic plan to infuse diversity into the curriculum is a formal effort. For clinical students, we infuse discussion of diversity into the ethics course (PSYC5100). Further, both clinical and experimental students take an anthropology course on cultural and anthropologic applications related to mental health in rural Appalachia (PSYC7500). Clinical students gain further experience interacting with rural communities and working interprofessionally through the course “Rural Health Research and Practice” (PSYC5040), an inter-professional course which also enrolls nursing, medicine, environmental health, social work and public health students. PSYC5040 uses community-based participatory research methodology and theory relevant to health sciences and rural settings.

Our recently implemented PhD program concentration in experimental psychology has a translational focus and also promotes inter-professional contact via coursework and research. Further, a core component of the experimental concentration is a seminar course on the Psychology of Diversity (PSYC7770) which covers various theoretical topics, such as racial identity development, stigma and identity, social contact to effect change in attitudes, among others – all in the context of psychological science and understanding the experiences of individuals differing on a variety of dimensions, including gender, race/ethnicity, sexual orientation, social status, and immigration status. This course serves as a guided elective for clinical students. Further, we strive to ensure cross fertilization between the clinical and experimental programs. For one thing, students in both concentrations recruit faculty from both concentrations to serve on their graduate advisory committees. Further, the experimental faculty provides support to the clinical program by identifying and ensuring the achievement of learning outcomes appropriate to the broad and general foundations training expected of clinical students.

In their clinical training, students address how diversity issues are relevant to their cases. Indeed, one of the major components of the clinical capstone project is the section on how diversity issues are relevant to the case being described. This application is designed to help prepare students to work with diverse populations, such as they will find in both the Behavioral Health and Wellness clinic and their externship placements. In addition to racial and ethnic diversity, the BHWC caseload includes diverse individuals. Of the 143 visiting the clinic in the last year, 51 (35%) were female and 2 (1%) were transgender. In addition, of the 74 clients who provided ethnic data, 65 were Caucasian, while 3 (4%) were African American, 3 (4%) were Latino, 1 (1%) was Asian, 1 (1%) was Romanian/German, and 1 (1%) was German/Somoan.
Further, students are exposed to clients with diverse religious values, and therefore religion and spirituality issues are dealt with in therapy. We also have several clients with physical disabilities seeking treatment in the BHWC. Through their experience working in the department’s BHWC as well as a host of externship placements, students are exposed to a diverse range of client demographics, clinical settings, and colleagues. Students are also exposed to a diverse range of presenting problems, from long-term schizophrenia to adjustment disorders. Community mental health locations offer students the opportunity to work with individuals of varying levels of SES. For example, at the Downtown Clinic, which is a nurse practitioner-run clinic for low-income individuals, students gain experience handling issues related to low SES and homelessness. Another unique feature of the Downtown Clinic is that Johnson City’s Hispanic and migrant population is disproportionately represented, thus exposing students to ethnic diversity and the reality of the language barrier. Moreover, students working within primary care settings collaborate with physicians and residents of varying racial, ethnic, and foreign national backgrounds (e.g., Pakistani, Indian).

Our clinic director, Dr. Kerry Holland, is very active in the community with regard to promoting diversity issues. She has provided diversity training for medical students at Quillen College of Medicine, and started a chapter of Parents, Families, & Friends of Lesbians and Gays (PFLAG) in Upper East Tennessee. Her efforts are notable because our region leans toward extreme political and religious conservatism, which has created a difficult and challenging environment for individuals from sexually diverse backgrounds. In addition to student training, the department fosters faculty diversity education. A number of faculty (e.g., Drs. Brown, Cantrell, Dixon, Ellis) have received Safe Zone Training.

Dr. Holland, along with an advanced graduate student, has recently created an intake training video that highlights examples of the complexities that can arise with a clinical intake. The role-play video depicts a client who mentions both a partner and a husband when describing her relationship history. The video is intended to assist students in developing respectful and effective skills to handle complex intake encounters.

**Climate of Respect**

Our formal and informal efforts to promote diversity contribute to a climate in which diversity is celebrated. To further promote a climate of respect, we provide activities in the
department and support activities in the larger university and community related to diversity. One 
effort in this regard is the infusion of diversity into our speaker series. We reserve one speaker 
series event per year to a topic related to diversity, but in reality, many of our speakers 
have addressed diversity issues. In Spring semester, 2011 we had Dr. Naomi Hall, who 
represented cultural diversity in her personal characteristics as well as her research on ethnic 
minority risk for HIV and promotion of sexual negotiation skills. We also have organized 
university-wide events that reflect diversity, such as Jean Kilbourne (who spoke about women 
and advertising) and Tim Wise (anti-racist writer and activist co-sponsored by the ETSU Race 
Relations Dialogue Task Force). Ideas we have for moving forward with this effort include hosting 
a university-wide event on men’s experience of sexual abuse – a topic that is rarely discussed and 
that goes against societal expectations of gender, and collaborating with the university’s Office of 
Multicultural Affairs in their numerous efforts to increase the depth of diversity consciousness on 
campus. We believe that our faculty and students’ current affiliations also could facilitate our 
efforts to sponsor, co-sponsor, and support larger scale diversity relevant events (for instance: Dr. 
Chris Dula is a member of the ETSU Race Relations Dialogue Task Force; Drs Peggy Cantrell 
and Stacey Williams are member of women’s studies faculty/steering committee; Dr. Jamie Hirsch 
founded the campus group Active Minds which focuses on raising awareness about mental health 
and seeking care; Dr. Stacey Williams is part of leadership of the PFLAG chapter; and numerous 
undergraduate and graduate students (e.g., David Hutsell) are members of organizations 
promoting respect for diversity (such as NAMI and LGBTies).

The department encourages faculty and student research that promotes an 
understanding of diverse perspectives. Our current faculty represents quite a range of areas of 
psychology, as well as specific research areas within each. Some faculty and student research 
activities explicitly focus on individual differences, whereas others examine the extent to which 
individual differences are contributors to mental and behavioral health outcomes. Drs. William 
Dalton III and Jodi Polaha conduct research directly relevant for rural Appalachia and both mental 
and physical health. Dr. Wallace Dixon studies individual differences in linguistic, cognitive, and 
temperament development.

Finally, we have recently undertaken systematic and continuous assessment of 
diversity-related activities in the department. Through this effort, we are collecting 
information on the current activities in which students and faculty participate that relate to 
diversity. In addition to tracking our progress in the area of diversity, we will use the 
information gathered to assist in updating the department website and newsletter.
Moreover, gathering and posting such information will contribute to the recruitment and retention of diverse staff and students, as well as to a climate of respect.

The findings from our initial survey of faculty revealed faculty members are studying an array of topics related to diversity including:

- Older adults, rurality, and race/ethnicity as pertaining to psychopathology, personality, and health functioning
- Attitudes about sexual orientation and stigma
- Diversity in higher education at universities and community colleges in Tennessee
- Traumatic events and discrimination experiences among South Africans
- Religiosity in relation to stress and health
- How gender and socioeconomic status moderate trauma experiences and psychosocial functioning
- Women’s infertility experiences in Appalachia
- Psychological make-up and well-being of various minority groups (e.g., LGBTQ)
- Cultural norms between social groups/regions
- Rural Appalachian families and children
- Rural, African American, and Hispanic populations
- Stigma in seeking mental health services in rural areas
- Barriers to physician screening of mental health problems

Relatedly, all faculty who completed the survey (N=12) felt somewhat or often supported by the department in terms of their own diverse characteristics (M=3.33, possible range 1-4). Further, many faculty members (9 out of 12) infuse diversity into their training of graduate students at least sometimes or often.

Findings from the faculty survey were further supported by those of a similar diversity survey completed by the current graduate students in the clinical psychology program (N=22). The majority of students indicated feeling supported “somewhat” or “a lot” by peers (85%) and the Clinical program (95%) for their individual differences or personal demographics. Sample comments regarding the program include:

“The program and faculty do an excellent job of supporting diversity as well as encouraging self-exploration into one’s individuality.”
“The program ensures a safe & accepting environment for students.”

“I have never felt discriminated against by the program by any differences I may have from faculty or other students.”

“Professors are generally supportive in most areas, including those related to diversity.”

“The clinical faculty are open-minded and supportive.”

“The program seems to be open to a wide breadth of experiences, beliefs, and differences so long as one is capable of being open to differences and diversity in others, specifically our clients.”

Further, the majority of clinical students reported having taken at least one course or had training experience pertaining to diversity (82%) so far in their training. Those who commented on their experiences with coursework in the department reported widespread inclusion and helpfulness:

“We had a seminar course dedicated to understanding how issues of diversity factor into psychological studies and psychological health. The reading and conversations were helpful in increasing mindfulness about diversity-related issues. Many (I would say most) other classes incorporated issues of diversity into the discussions and reading material. Ethics class (w/Dr. Ellis) was very helpful in attuning our minds to the various types of issues that people may present with in clinical work. Assessment courses spent time discussing how diversity among clients may impact assessment scores. Clinically focused courses always incorporated readings and discussions of how clinicians must maintain awareness of diversity-related issues. The anthropology course was unique and helpful in its focus on cultural and socioeconomic diversity.”

“Although diversity training is weaved throughout courses, the social psychology seminar was particularly helpful in increasing my understanding of privilege and challenges associated with coming from a less privileged background.”
“Social Diversity- discussed issues relating to inequality among races, as well as protective and risk factors for different races. Cultural Anthropological Studies- Discussed culture bound syndromes. In addition I learned a lot from a guest speaker we had who was a Mexican adjunct professor at a local college who came and spoke to our class about her work, about curanderismo, but mainly her culture. Not only was it extremely interesting it was also very easy to understand and I still remember a lot she told us about cultural differences.”

“Legal and Ethical Issues in Psychology provided a nice introduction to cultural competence. As well, Personality and Treatment models included a portion on multicultural practice. From these classes, I feel I know the bare basics about cultural competence, how to become more culturally competent, and possible courses of action for when I encounter a client who belongs to a culture I am unfamiliar with.”

Of those who completed the survey, although students indicated their race/ethnicity as White, there was variation in other areas of diversity. Specifically, current reports indicated 74% of clinical students are female while 26% are male, 91% are of heterosexual orientation while 9% are of minority sexual orientation (gay, lesbian, or bisexual), and 39% are married while another 48% are either in a committed relationship and/or cohabitating. In addition, while 53% report being Christian, among the others, 26% report being spiritual but not religious and 16% are atheist. Students also reported an age range from 23-49. And, the majority of current students indicated having grown up in the South (68%), 18% originated on the East Coast of the U.S. and the remainder were from the North, Northwest, Midwest, or Southwest.

As depicted in the findings of the surveys, as well as the content of this document overall, the Clinical program has made many successful strides in the area of diversity. In particular, we have integrated a diversity focus in the areas of recruitment and retention and in the education of students. And in so doing, we believe we have created a climate of tolerance and acceptance.

Program costs (tuition and fees) and fellowships and other funding available:

On average, six students are admitted per year, with all students receiving University support through a graduate assistantship for at least the first two years. The support includes a stipend of $12,000 plus in and out-of-state tuition waivers for the academic year (fall and spring terms). Sources of graduate assistant support in the remaining two years pre-internship vary, and include community training grants and contracts, teaching assistantships, or faculty grants. The stipend amount as well as the contract period after the first two years may vary according to the source of the grant. For example, some community placements have a stipend level of $10,000 for 12 months, and include travel reimbursement. Others have a stipend of $12,000 for a 12 month period. To date, 100% of enrolled students have received at least 4 years of graduate assistantship support.

</tr>
</tbody>
</table>
Licensure Outcomes

The Commission on Accreditation requires calculation of licensure rates based on a denominator of “the total number of program graduates in the past 10 years, minus the number who graduated in the past two years.” For ETSU, this denominator is zero because all four program graduates have graduated within the past two years.
