After consultation with LCME staff concerning the senior rotations in the categories below, MSEC decided they are equivalent to electives and not subject to standard comprehensive review. Student evaluation of the rotations will be monitored annually to ensure effectiveness.

As originally planned, reviews for all courses / clerkships occur annually. Comprehensive reviews for all courses / clerkships occur on a three-year cycle. The fourth year of the review cycle will be a curricular review by year and across the four year curriculum.

Notation:
- As the reviews occur, identification of related curricular segments within a year or across years may lead to broader discussion and recommendations related to integration of related curriculum components. If approved by MSEC, some modifications may be addressed in advance of the fourth year horizontal / vertical review cycle.
