Janice Greene, a doctoral student in the Department of Community and Behavioral Health, in the ETSU College of Public Health, has been selected as a Women in Manufacturing STEP Ahead Award Honoree by the Manufacturing Institute and the Society of Manufacturing Employees.

Ms. Greene, who works as a program manager for Babcock & Wilcox in Erwin, Tennessee, was recognized for her contributions to Nuclear Fuel Services decommissioning activities, described by NFS as “large, complex, and multi-year” that “required integrated, cross-functional teams.”

The STEP Ahead Awards celebrate women who have demonstrated Science, Technology, and Engineering and Production Excellence in manufacturing organizations. The awards will be formally presented on March 26 in Washington, DC.

From the STEP Ahead website:
“As part of the STEP Ahead initiative, the Women in Manufacturing STEP Ahead Awards honor women in the manufacturing industry who have demonstrated excellence and leadership in their careers and represent all levels of the manufacturing industry, from the factory-floor to the C-suite. STEP Ahead inspires next generation female leaders to pursue a career in manufacturing and showcases the amazing opportunities the manufacturing industry can offer.”

Ms. Greene received a BS in Geology from Morehead State University in 1986 and an MS Environmental Health at ETSU in 1994. She began working with Babcock & Wilcox companies in 1992, as an environmental scientist. Since 2006, she has served as the Decommissioning Activities Program Manager.
