The ETSU College of Public Health is the school of choice for students who want an exceptional educational experience in a world-class environment.

Our Mission
- To provide students a high-quality educational experience focusing on excellent teaching, research training, and practical skills to prepare them for a diverse and inter-professional workforce;
- To advance science through research focused on identifying causes of and practical solutions to important health challenges;
- To create an environment that is personally and professionally rewarding for faculty, staff, and students;
- To use our expertise to improve the health status of all people including those in underserved communities through education, evidence-based advocacy, collaborative research, and partnerships.

Our Core Values
- Altruism
- Community Service
- Dignity
- Diversity
- Education
- Integrity
- Research
- Teamwork

Our Vision
The ETSU College of Public Health is the school of choice for students who want an exceptional educational experience in a world-class environment.

Strategic Planning
- Expand and continuously benchmark and align educational programs with student, workforce, and public health needs.
- Continue to attract qualified students and to provide them with the highest quality educational experience possible.
- Actively engage faculty and students in the conduct and dissemination of collaborative research focused on important health challenges globally, nationally, and in the Appalachian communities.
- Foster a culture and environment that celebrate diversity and encourage cultural awareness and social justice.
- Effectively engage in public health workforce development responsive to workforce needs.
- Expand community-based problem-solving to advance student learning and community benefit.
- Contribute faculty and student expertise to strengthen our communities and professions.
- Strengthen the human and fiscal resources in support of the college mission and vision.
