</table>

### Partition Domain:

- **AS-BUILT RECORDS**
- **CONSTRUCTION DOCUMENTS**
- **DESIGN DEVELOPMENT**
- **SCHEMATIC DESIGN**
- **CODES OFFICIAL REVIEW**
- **CERTIFICATIONS**
- **CPD**
- **DISCLAIMERS**
- **LEGALITIES**
- **MATERIALS**
- **NOTES**
- **OWNERSHIP**
- **PREHISTORY**
- **PROOF OF CONCEPT**
- **PRODUCTS**
- **RESPONSIBILITIES**
- **SCHEDULES**
- **SUPPORT**
- **TELEPHONE**
- **UNIT**
- **INTERNET**
- **UNIVERSITY**
- **FACSIMILE**
- **MHMI**
- **NOT**
- **UL DESIGN No.: UL -**

### Partition Notes:

1. **FRAMING:**
   - Use 5/8" thick Gypsum Board throughout.
   - Use stud depth indicated by the drawings. The depth stated by the referenced approval or test is the minimum depth.
   - Use 6" metal studs if required by local codes.
   - Use 8" nominal wood framing if required by local codes.
   - Use 10" metal studs if required by local codes.
   - Use 12" nominal wood framing if required by local codes.

2. **PARTITION NOTES:**
   - Use the following widths for partition openings:
     - 2'-0" for standard doors
     - 3'-0" for large doors
     - 4'-0" for double doors
     - 5'-0" for entry doors

3. **SOUND BATT:**
   - Provide a sound batt at the top and bottom of the partition.
   - Use the sound batts to isolate partition from all and above finish ceilings.
   - Isolate partition from all and above finish ceilings.

4. **ACOUSTICAL INSULATION:**
   - Provide acoustical insulation in stud cavity. Provide 2-1/2" thick insulation where stud depth is 2-1/2"; provide 3-1/2" thick insulation where stud depth is 3-1/2".
   - Run acoustical insulation from floor to 6" above finished ceiling and horizontally for a distance of 1'-0" (12") min. on top of the finished ceiling, both sides of the wall, for the entire length of the wall.

5. **CONTINUOUS VAPOR BARRIER:**
   - Provide a continuous vapor barrier at the top and bottom of the partition.
   - Seal perimeter of partition with continuous bead of sealant.

6. **ACOUSTICAL SEALANT:**
   - Provide acoustic sealant around all openings.
   - Seal all openings with acoustic sealant material.

7. **OUTLET BOX PADS:**
   - Provide acoustical outlet box pads at all electrical, opening, glazed partition, etc., construction above or below (where the interruption occurred).

8. **PARTITION MODIFICATION MATRIX NOTES:**
   - A. Follow the following locations, unless noted otherwise.
   - B. Locate stud 6" from double stud assemblies.
   - C. Locate stud 12" from double stud assemblies.
   - D. Locate stud 18" from double stud assemblies.
   - E. Locate stud 24" from double stud assemblies.
   - F. Locate stud 30" from double stud assemblies.
