IMPORTANT NOTICE
FOR NEW INCOMING ON-CAMPUS HOUSING RESIDENTS!

New Meningococcal Immunization Requirement
for New Incoming On-Campus Housing Residents

Effective July 1, 2013, the Tennessee General Assembly will require ALL NEW INCOMING STUDENTS who plan to live in "ON-CAMPUS" STUDENT HOUSING at any public institution of higher learning in the State of Tennessee, be required to provide proof of adequate immunization against Meningococcal Disease within the last 5 years, unless the student provides the appropriate medical or religious exemption to Student/University Health Services.

Please note: This requirement does not replace the Hepatitis B/Meningitis Waiver Form. The Hepatitis B/Meningitis Waiver Form is still mandatory for completion. If this law is passed all new incoming students living in on-campus housing will not have the option of refusing this immunization without providing Student Health Services with appropriately executed medical or religious exemptions. These exemption forms can be found on the Student/University Health website.

For more information and forms please visit the Student/University website http://www.etsu.edu/nursing/shserv/ or call Student/University Health Services 423-439-4225.
