Security Cameras

Security cameras have come into increasing use on college and university campuses, principally as part of crime prevention strategy, to aid in the protection of public safety and personal property. Because ETSU respects the privacy of all of the members of the university community, a policy was developed to govern the use of university authorized security cameras on campus, to ensure that such cameras are used judiciously.

Responsibility for determining the appropriateness of installing university authorized security cameras on campus, that will be used for non-instructional purposes, and for disseminating and implementing this policy is delegated to the Office of the Vice President for Finance & Administration. The Vice President has established a Security Camera Subcommittee to review and make recommendations regarding locations of security cameras based on the parameters described in the policy.

Please refer to FP-34 Security Camera Policy (http://www.etsu.edu/fa/fs/procedures.aspx) for additional information.
