for Undergraduates

SMART IN MATH
Strengthening Minorities Achievements in Research and Training  May 30-July 22, 2016

Discover the world of data science, mathematical modeling, graph theory and their applications to the modeling of diseases.

8-week submersion into the math and science of networks, data and dynamic models with applications in biomedical science intended for talented undergraduate students.

Conducted by:
Mathematical Epidemiologist,
Dr. Ariel Cintron-Arias and
Graph Theorist, Dr. Debra Knisley

Find out more:
http://www.etsu.edu/cas/math/activities/reu.php
https://www.mathprograms.org/db/programs/436

Included:
• housing
• transportation
• stipends ($4,000)
• exciting day trips to nearby facilities such as the Oak Ridge National Laboratory
• Present your findings at the largest conference of Mathematicians in the world!
