

Using High School Data in Navigate

You can review information about your students' high school experience using filters in Navigate and identify students for early outreach. Here's how:

1. On your Navigate home screen click the **Advanced Search** icon in the left navigation.
2. On the advance search screen choose the Performance Data filters, then select the high school data you want to investigate:

Performance Data GPA, Hours, Credits					
Min. Cumulative GPA ²	Max. Cumulative GPA ²	Min. Transfer GPA ²	Max. Transfer GPA ²	Min. High-School GPA ²	Max. High-School GPA ²
<input type="text" value="0.000"/>	<input type="text" value="5.000"/>	<input type="text" value="0.000"/>	<input type="text" value="5.000"/>	<input type="text" value="0.000"/>	<input type="text" value="5.000"/>
Min. Credits Earned ²	Max. Credits Earned ²	Min. Hours Attempted ²	Max. Hours Attempted ²	Min. Credit Comp. % ²	Max. Credit Comp. % ²
<input type="text" value="0"/>	<input type="text" value="999"/>	<input type="text" value="0"/>	<input type="text" value="999"/>	<input type="text" value="0"/>	<input type="text" value="100"/>

3. Try combining the high school GPA filter with other filters to spot students who may benefit from extra outreach and support, for instance:
 - Entering freshmen fall 2017* + HS GPA 3.5 or above + ETSU fall 2017 GPA lower than 3.0
 - Entering freshmen fall 2019* + HS GPA 3.0 or below + enrolled in a demanding course that term.

* The most reliable way to work with a list of entering freshmen in Navigate is to request a list from the Office of Planning and Decision Support and upload it to Navigate as a student list. Then you can apply advanced search filters to the list.
