Pre-Medicine Guide
The Pre-Medicine track at ETSU prepares students for application to a four-year Doctor of Allopathic Medicine (MD) or Doctor of Osteopathic Medicine (DO) degree program. Completion of a bachelor’s degree is required for acceptance to most medical schools.

**Did You Know There Are Two Paths to Becoming a Physician?**

**Allopathic Medicine**  Doctors of allopathic medicine (MDs) are medical doctors who treat disease and injury using counteractive methods. For example, they will prescribe antibiotics to kill bacteria that have caused an infection. Allopathic physicians often work in public or private hospitals or clinics and may have private practices. Although many allopathic physicians become internists, generalists, or family practitioners, some specialize in other medical fields.

**Osteopathic Medicine**  Doctors of osteopathic medicine (DOs) practice a “whole person” approach to health care. Osteopathic physicians understand how all the body’s systems are interconnected and how each one affects the others. They focus special attention on the musculoskeletal system, which reflects and influences the condition of all other body systems. Osteopathic physicians often work in public or private hospitals or clinics and may have private practices. Although many osteopathic physicians become internists, generalists, or family practitioners, some specialize in other medical fields.

**DOs and MDs are Alike in Many Ways**

- Both DOs and MDs complete four years of basic medical education.
- After medical school, both DOs and MDs obtain graduate medical education through internships, residencies, and fellowships. This training lasts three to eight years and prepares DOs and MDs to practice a specialty.
- DOs and MDs can choose to practice in any specialty of medicine—such as pediatrics, family medicine, psychiatry, surgery, or ophthalmology.
- DOs and MDs must pass comparable examinations to obtain state licensure.
- DOs and MDs both practice in accredited and licensed health care facilities.

**Application Process**

Students should start preparing for application approximately 18 months prior to when they desire to enter medical school. This process will include University Evaluation, MCAT preparation, and taking the MCAT, followed by application. Most students apply to medical school the summer after their junior year, but students should consult with their MPA Counselor to determine their application timeline. Applications typically open in May; deadlines vary from August through March. Please research your school choices to determine application due dates.

Most allopathic medical schools participate in the American Medical College Application Service (AMCAS). Most osteopathic medical schools participate in the American Association of Colleges of Osteopathic Medicine Application Service (AACOMAS). Many medical schools require or recommend a university committee letter of evaluation during the application process. Please visit the MPA website for additional information.

**Timeline**

<table>
<thead>
<tr>
<th>Freshman</th>
<th>Summer</th>
<th>Sophomore</th>
<th>Summer</th>
<th>Junior</th>
<th>Summer</th>
<th>Senior</th>
</tr>
</thead>
<tbody>
<tr>
<td>Complete medical school prerequisite requirements</td>
<td>Build professional relationships with professors, advisors, counselors, and health care professionals for letters of recommendation</td>
<td>Community service / volunteer work / job shadowing / engagement in student organizations; Document experiences</td>
<td>Choose a major</td>
<td>Gain research experience</td>
<td>Request letters of recommendation</td>
<td>MCAT prep and exam</td>
</tr>
</tbody>
</table>

**Advisement**

Pre-medicine is not a major. Due to course sequencing and preparation for the MCAT and application, it is recommended to declare your major as early as possible. Medical schools are interested in students who excel in the sciences and mathematics, but you do not have to major in these disciplines. Choose a major/minor that you enjoy and that plays to your strengths. Students should speak with an MPA counselor before declaring a major.

It is strongly recommended that you meet with your MPA Counselor and your major advisor each semester before registering for the following semester. Your major advisor is there to help you prepare for graduation, while your MPA Counselor is there to help you apply for medical school. Students who receive scholarships or participate in specialized ETSU programs (such as athletics or Honors College programs) must also seek advisement from those departments. Serious consequences can occur if students fail to meet with advisors (e.g., failure to graduate on time, missing appropriate courses to prepare for the MCAT, etc.).
What does it take to get into medical school?

**Allopathic Medicine**
- **Overall GPA 3.72**
  - 2019 average as reported by the American Association of Medical Colleges (AAMC)
- **Science GPA 3.66**
  - 2019 average Biology, Chemistry, Physics, and Math (BCPM) GPA as reported by AAMC

**Osteopathic Medicine**
- **Overall GPA 3.6**
  - 2019 average as reported by the American Association of Colleges of Osteopathic Medicine (AACOM)
- **Science GPA 3.53**
  - 2019 average Biology, Chemistry, Physics, and Math (BCPM) GPA as reported by AACOM

### Core Preparation Courses

Different schools may have varying prerequisite requirements. It is up to the student to research and ensure the required courses are completed before application to the preferred school(s) of interest.

<table>
<thead>
<tr>
<th>Course</th>
<th>Minimum Hours</th>
<th>Recommended Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>Biology</td>
<td>8</td>
<td>BIOL 1110/1111 and BIOL 1120/1121</td>
</tr>
<tr>
<td>General Chemistry</td>
<td>8</td>
<td>CHEM 1110/1111 and CHEM 1120/1121</td>
</tr>
<tr>
<td>Organic Chemistry</td>
<td>10</td>
<td>CHEM 2010/2011 and CHEM 2020/2021</td>
</tr>

<td>3</td>
<td>PHIL 2640, PHIL 2020 OR PHIL 2030</td>
</tr>
<tr>
<td>Probability and Statistics</td>
<td>3</td>
<td>MATH 1530</td>
</tr>
</tbody>
</table>

**Additional Recommended Courses**

<table>
<thead>
<tr>
<th>Course</th>
<th>Minimum Hours</th>
<th>Recommended Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>General Genetics</td>
<td>5</td>
<td>BIOL 3100/3141</td>
</tr>
<tr>
<td>Cell Biology</td>
<td>5</td>
<td>BIOL 3150/3151</td>
</tr>
<tr>
<td>Human Anatomy/ Human Physiology</td>
<td>8</td>
<td>HSCI 3000/3020</td>
</tr>
<tr>
<td>Calculus I and II</td>
<td>8</td>
<td>MATH 1910 and MATH 1920</td>
</tr>
<tr>
<td>Comparative Anatomy</td>
<td>4</td>
<td>BIOL 3220</td>
</tr>
<tr>
<td>Molecular Biology</td>
<td>3</td>
<td>BIOL 4647</td>
</tr>
<tr>
<td>Microbiology</td>
<td>4</td>
<td>HSCI 3320/3321</td>
</tr>
<tr>
<td>Immunology</td>
<td>3</td>
<td>HSCI 3540</td>
</tr>
</tbody>
</table>

*Calculus-based physics (PHYS 2110 and 2120) is strongly recommended.
**COMM 2055 is recommended
***PHIL 2030 is recommended for the MCAT philosophy knowledge requirement; it does not fill a General Education requirement.

---

### Gap Year

Some students choose to take one or more gap years before applying to medical school. Learn more about what your gap year should include: [https://students-residents.aamc.org/applying-medical-school/article/what-do-during-gap-years/](https://students-residents.aamc.org/applying-medical-school/article/what-do-during-gap-years/)

---

### The MCAT Entrance Exam

The MCAT (Medical College Admissions Test) is generally taken at the end of a student’s junior year for both MD and DO schools, or should be taken when the student is prepared. Complete all pre-requisite courses before taking the MCAT, and consult with your MPA Counselor to develop your MCAT study plan.

The MCAT tests four sections:
- Biological and Biochemical Foundations of Living Systems
- Chemical and Physical Foundations of Biological Systems
- Psychological, Social, and Biological Foundations of Behavior
- Critical Analysis and Reasoning Skills

---

### MCAT Average Composite Score

<table>
<thead>
<tr>
<th>Type of Medicine</th>
<th>Overall Average</th>
</tr>
</thead>
<tbody>
<tr>
<td>Allopathic</td>
<td>511.6</td>
</tr>
<tr>
<td>Osteopathic</td>
<td>503.8</td>
</tr>
</tbody>
</table>

### WATCH WHAT YOU POST!

Please consider personal email addresses when corresponding with professional schools. First impressions are often based on correspondence and email addresses should be appropriate for professional communication. Messages and images sent electronically are reflections of judgment and potential suitability for professional careers. Inappropriate behaviors shared through an accessible venue can be viewed and shared by anyone and may compromise your admission to medical school.

Greek life, service organizations, and faith-based organizations also provide excellent opportunities for involvement and leadership.

HOW CAN I GET EXPERIENCE?

You can start by asking your own primary care provider or specialist for shadowing opportunities.

**QUILLEN COLLEGE OF MEDICINE**
Quillen College of Medicine offers excellent structured clinical internship opportunities for students. Many of these experiences are seasonal and include an application process, so do your research early to keep from missing out on the next cycle.

**MEDICAL HORIZONS**
This summer program, the result of a partnership between ETSU’s Quillen College of Medicine and Ballad Health, allows students to participate in four 1-week internships in various specialties including family medicine, pediatrics, internal medicine, surgery, psychiatry, and obstetrics/gynecology. In addition to shadowing physicians in various specialties, you will also receive lectures on topics related to the medical field. Learn more and apply for the program at etsu.edu/com/sa/admissions/medicalhorizons/default.php

**ANATOMY INTERNSHIPS**
These internships, which run in the fall, spring, and summer semesters, offer students hands-on experience in the gross anatomy lab at ETSU’s Quillen College of Medicine. Students participate in projects, observe dissections, and practice suturing. Learn more and apply for an internship at etsu.edu/com/dbms/academics/anatomy.php

**QUILLEN’S PATIENT SIMULATION LAB**
Gain experience in Quillen’s patient simulation lab to learn more about opportunities available to budding health professionals and to experience hands-on learning, much like you would as a medical student. Learn more at etsu.edu/com/simlab/summerinternship.php

**RURAL COMMUNITY HEALTH PROJECT**
This experience, best suited to students who are interested in rural health careers, involves a 6-8-week group project supervised by a health care professional. You will have the chance to help address real health problems within a community by performing data collection, interviewing the public, preparing health education materials, and/or working in health promotion. You will also be shadowing and observing the work of your physician supervisor. Learn more and apply at etsu.edu/com/ruralprograms/premedical/community.php

**QUILLEN PIPELINE PROGRAM**
This program matches ETSU undergraduate pre-med students with a mentor who is currently a QCOM student. Application information is emailed to MPA students each year.

**SUMMER HEALTH PROFESSIONS EDUCATION PROGRAM (SHPEP)**
This is a six-week academic enrichment program for freshman and sophomore college students who want to become physicians or dentists. SHPEP hosts students at 13 program sites across the country, including Duke University, the University of Virginia, and University of Louisville. Learn more and apply at www.shpep.org

AAMC Core Competencies

These 15 Core Competencies are essential for competitive medical school applicants. How will you demonstrate these competencies?

**Pre-Professional Competencies**
- Service Orientation
- Social Skills
- Cultural Competence
- Teamwork
- Oral Communication
- Ethical Responsibility to Self and Others
- Reliability and Dependability
- Resilience and Adaptability
- Capacity for Improvement

**Thinking and Reasoning Competencies**
- Critical Thinking
- Quantitative Reasoning
- Scientific Inquiry
- Written Communication

**Science Competencies**
- Living Systems
- Human Behavior
