

TRAIL MAPPING Demonstration

DECEMBER 11, 2013

6:30-7:30 P.M.

**University Room, Commons Building, at
the University of Pittsburgh at Bradford**

Students involved in a semester-long trail mapping project will present their work to create an interactive, digital trail map of Bradford's Richard McDowell Trail. The GPS-based software allows community groups to create and control their own digital trails, which appear as a smart phone application, and is free for use. A question and answer session will follow the presentation to invite discussion about the next round of trail mapping in McKean County. Students and community groups are encouraged to attend to propose ideas for participation.

Sponsored by the Allegheny Institute for Natural History and the Office of Academic Affairs at the University of Pittsburgh at Bradford. Questions can be directed to Dr. William Schumann at wrs18@pitt.edu.
