The Black Death, or ‘plague,” was an extremely contagious and deadly disease that killed around a third of the population of Europe in the mid-1300s. It was a disease that had appeared before, and would appear again in human history. This class will explore the experiences of people living through plague pandemics throughout ancient, medieval, and early modern history. We will start with Ancient Greece, proceed through Byzantium, medieval Europe, and then conclude with the very-well documented experiences of Europeans in the 1600s. Through documents written in the past, a world emerges with differences, of course, but also surprising similarities to our own experiences living through Covid-19.

**Associated Term:** Summer 2020
