

The following instructions assist you in how to install Citrix for Windows. Use Internet Explorer for the first installation.

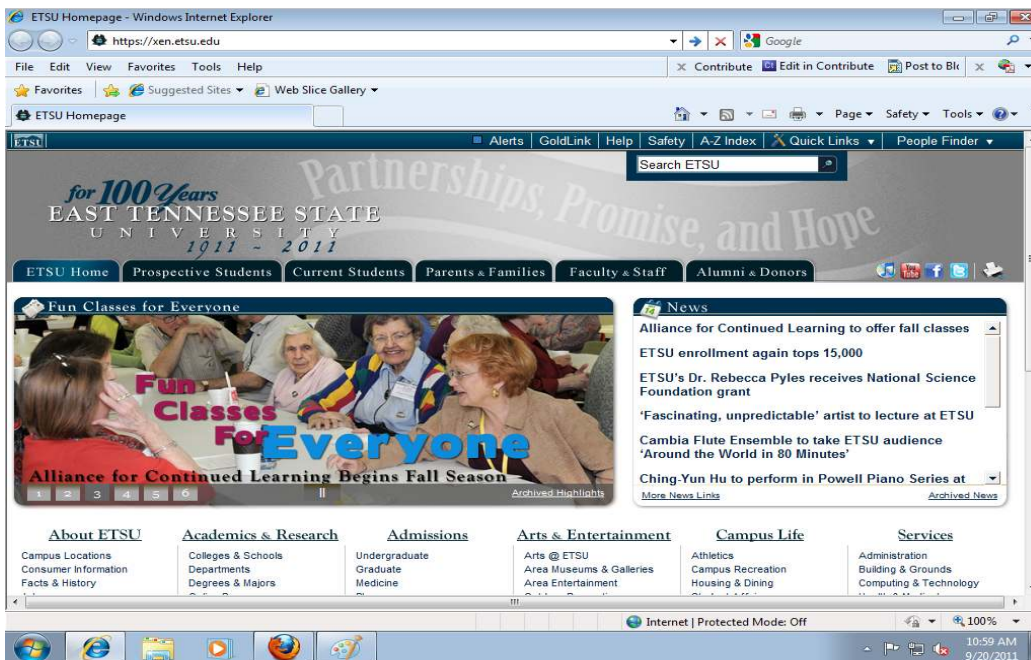

Step 1:

On the desktop, open Safari.

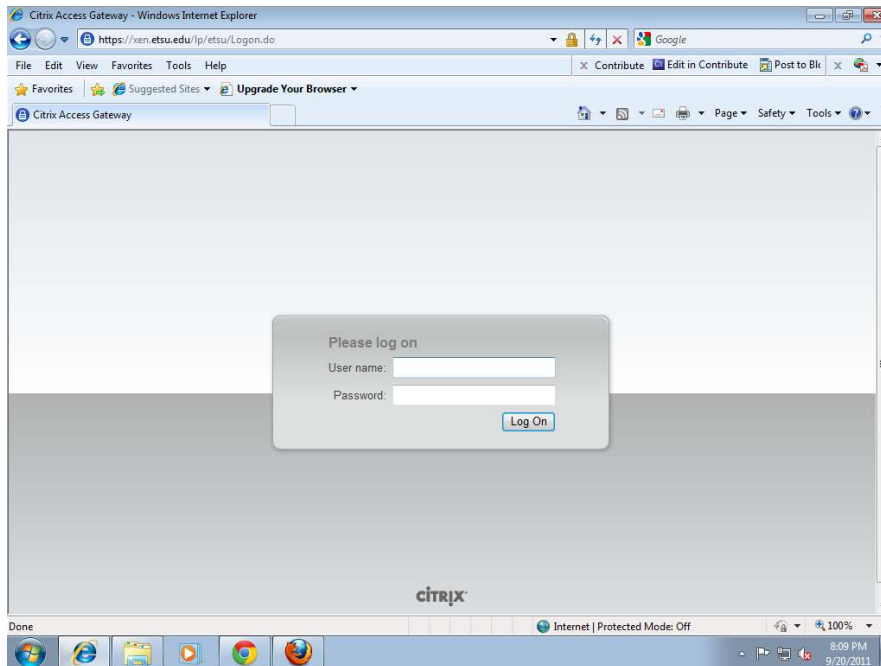

Step 2:

In the address bar, type <https://xen.etsu.edu>, and press Enter.

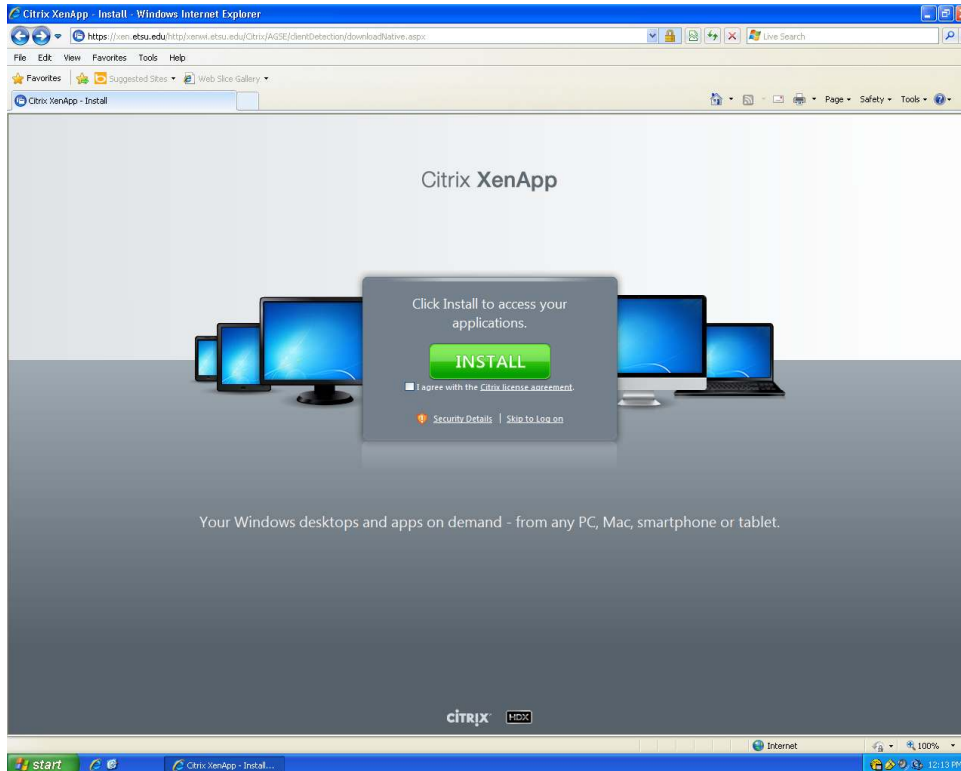

Step 3:

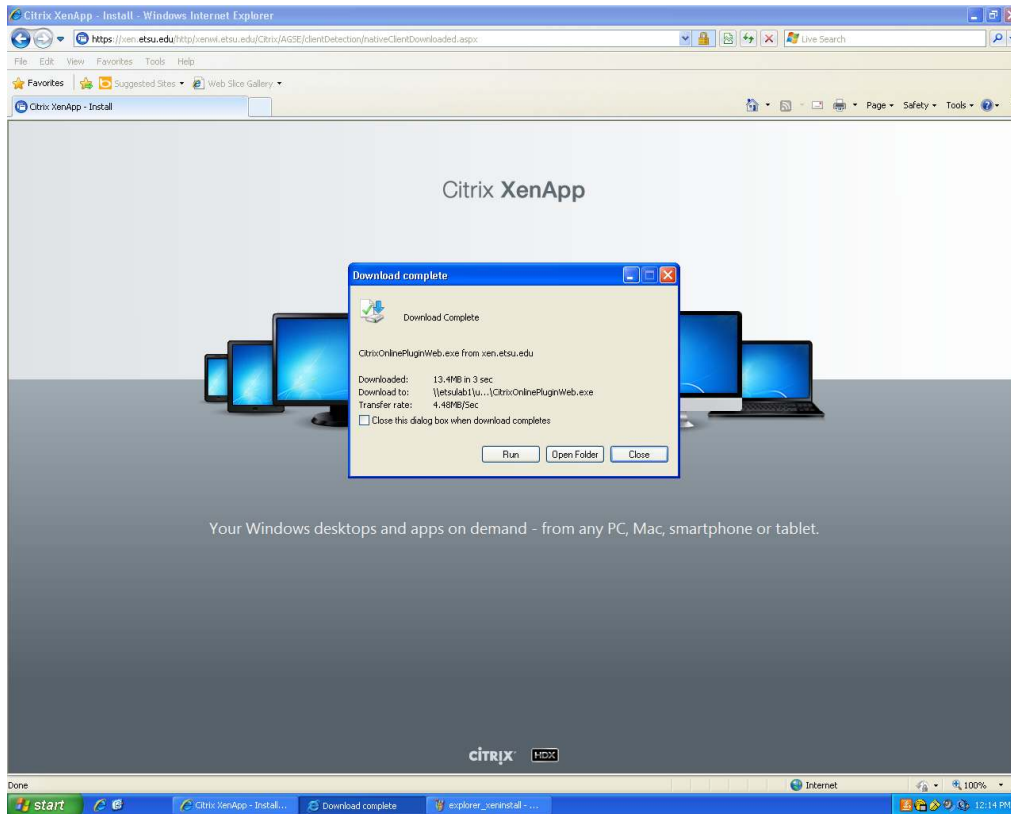

Log in using your ETSU username and password. When you are done, click Log On.

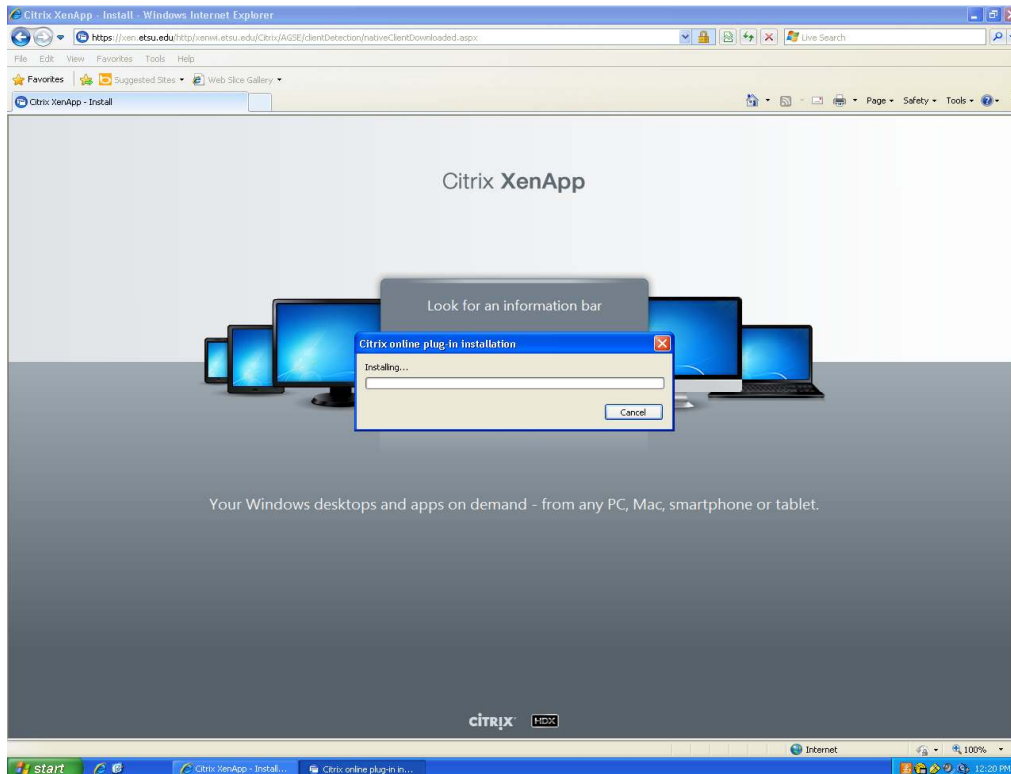

Step 4: Click Install to Begin Downloading Citrix Online Plug-in.pkg

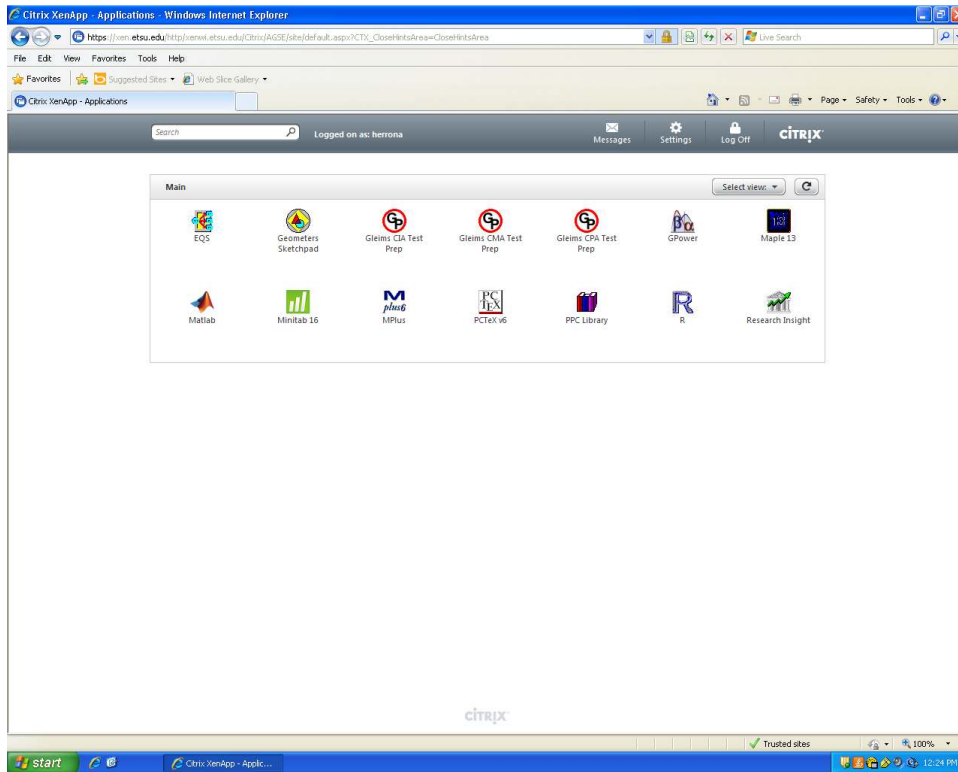

Step 5: Click Run in the Download pop-up.

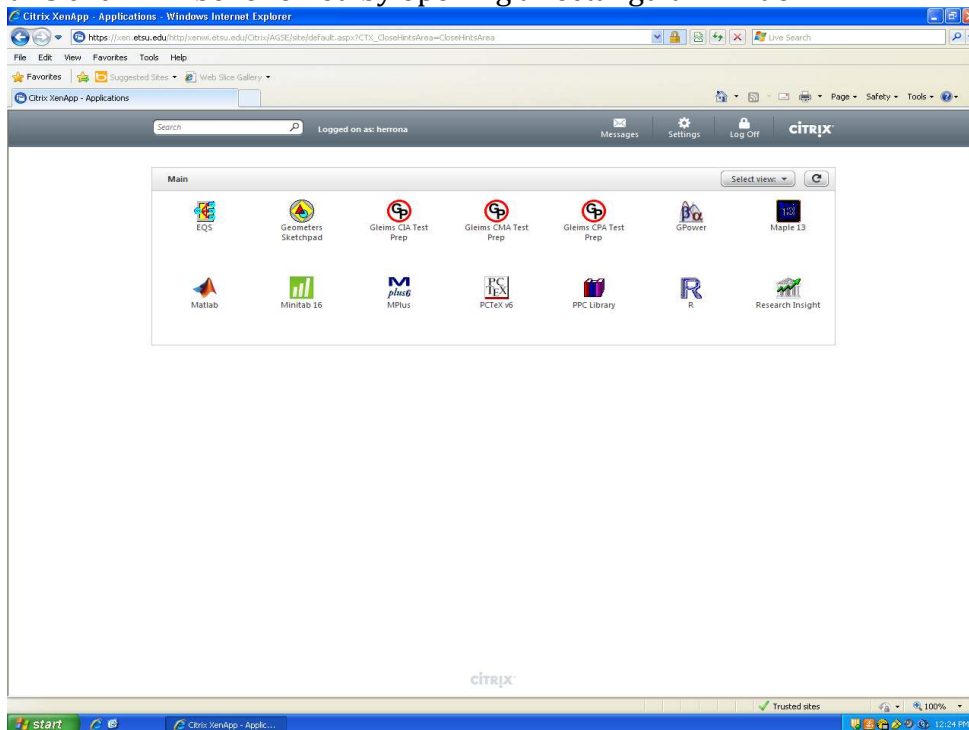

Step 6: Progress through the Citrix Online Plug-in Installer:

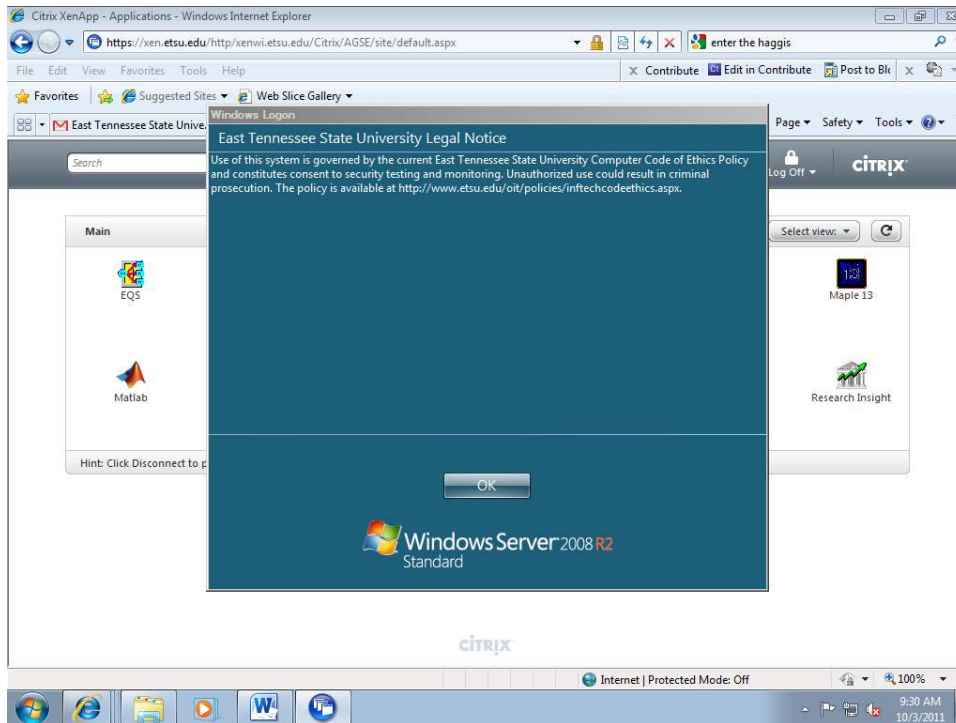

Step 7: Available applications under Citrix are displayed.

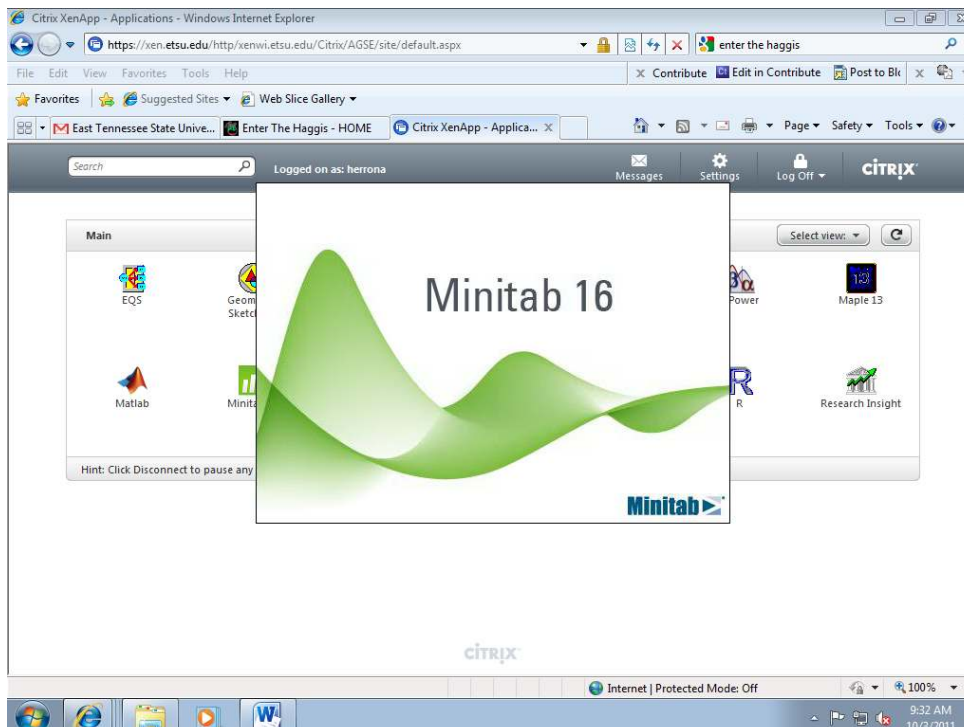

Step 8: Let's open an application. For example, let's open Minitab. Click on the Minitab icon, this click will be followed by opening a rectangular window.

Step 9: If the Citrix Online Plug-in is working properly, it will enable a launcher, this is usually a file with extension “.ica” that is in charge launching applications. The next window you will see is a blue ETSU window with a legal notice, click OK.

Step 10: Next, the application start up window appears. Just wait and continue smiling.

Step 11: Minitab is HERE! Enjoy! ☺
