If you would like to share content with meeting participants that includes audio, you will need to enable “Share Computer Sound” in order for them to hear the audio on their end.

**While in a meeting:**

1. Click the **Share** button at the bottom of the meeting window.

2. Select the desktop screen or application window you would like to share.

3. At the bottom left of the share options window, check the box next to **Share Computer Audio**.

4. If the audio content you are sharing is from a video, check the box next to **Optimize for full-screen video clip**.

5. Click the blue **Share** button at the bottom right of the share options window to enable your selections and begin sharing your chosen content/screen with computer audio.
