

Zoom

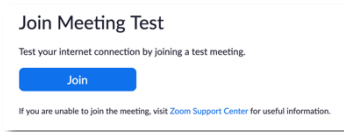

Join a Test Meeting

- In addition to the ability to test your audio and video when joining a meeting and even during a meeting, you can also join a **Test Meeting** to test your internet connection, audio hardware, and webcam, as well as familiarize yourself with the Zoom interface.
- You can share the link with your attendees in advance of the meeting for testing as well.

Selecting and Testing Audio via Test Meeting:

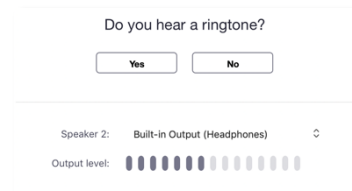

1. Go to <https://etsu.zoom.us/test> or <https://zoom.us/test>

2. Click the blue **Join** button to launch Zoom test.

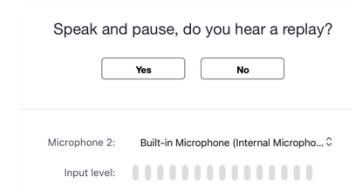

3. If prompted by your browser, click **Open Zoom Meetings**. If Zoom is not already installed on your computer, follow the prompts to download and install.

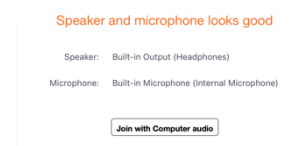

4. A pop-up window will help to test your speakers. If you don't hear the ringtone, use the drop-down menu or click **No** to switch speakers until you hear the ringtone. Click **Yes** to continue to the mic test.

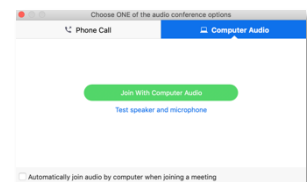

5. A pop-up window will prompt you to test your microphone. Speak into your mic. If you don't hear the replay, use the drop-down menu or click **No** to switch microphones until you hear the replay. Click **Yes** when you hear the replay.

6. Click **Join with Computer Audio**.

7. Click the green **Join with Computer Audio** button to join the test meeting with the selected microphones and speakers as an *attendee*.

While in the meeting you can test your webcam and attendee controls as well.
