In the Honors College at ETSU we hold a healthy disregard of the impossible.

We believe that—when it comes to our students—every one of them can be a positive agent of change who engages in meaningful and impactful work for the betterment of their lives, their communities, and others around the globe.

The Honors College houses five unique honors programs—each one developed to provide a strong balance of curricular, co-curricular, and extra-curricular activities and experiences, each one suited to serve the personal, academic, and professional needs of its students, and each one geared to transform lives and elevate communities in Northeast Tennessee and beyond.

The Honors College offers unique and powerful educational opportunities that generate remarkable stories, stories our students tell about their experiences at ETSU that inspire feelings of admiration, trust, and enthusiasm in all those who listen to them.

**CREATE A REMARKABLE STORY**

Ever since I was a child, studying abroad and becoming a literary translator in Japan has been my dream. The ETSU Honors College empowers me with the unmatched advantage of achieving this dream while becoming tuned culturally to our globally connective world. Not only will this opportunity increase my chances of employment and enrolling in a graduate program, but it is also a once-in-a-lifetime opportunity for me to network, form relationships, and discover new possibilities.

Zackary Keith // Class of 2021
Major, English / Minor, Psychology
