

Technology Requirements

Exemplify requirements

- Exams given remotely with Exemplify (BYOD secured exam application) will use Exam ID (AI identification verification) and Exam Monitor. (AI digital proctor, and exam recording using webcam)
- Exam ID requires an active Internet connection at the beginning of an exam.
- Exam Monitor requires an active Internet connection to complete uploading of the exam recording.
- Computer devices must be compatible with all services for successful completion of this program.
- iPads Are Currently Unable to Run Exam Monitor.
 - Exam Monitor is required to record exams in Exemplify.
- Exemplify minimum system requirements that are found on the ExamSoft portal (<https://ei.examsoft.com/GKWeb/login/etsunursing>) at the top of the screen.
 - ExamSoft maintains and updates this information.
- Chromebooks, jailbroken iPads, some versions of Windows, all virtual machines, and all Linux distributions are currently incompatible with Exemplify.

D2L requirements

- PC or Mac is recommended
 - Intel i3 Processor – i5 is a nice upgrade but not essential
 - A minimum of 8gb of Ram
 - 16Gb is a nice upgrade but not essential
 - A minimum of a 128Gb Solid State Hard Drive (SSD)
 - 256Gb is a nice if possible
- D2L uses the Respondus Lockdown Browser with WebCam for remote exam proctoring
 - This is not compatible with Chromebooks
