

STRATEGIC GOALS

1. Provide excellence in teaching and lifelong learning through cross institutional curricular and experiential collaboration.
2. Offer the highest quality Doctor of Nursing Practice collaborative program to meet regional and state workforce needs.
3. Preserve and protect diversity and inclusion of people and ideas through availability of opportunities for students and faculty.
4. Impact systems and policies through professional leadership in the academic and healthcare communities.
5. Engage in faculty and student research/scholarly activities that leads to improvement in the health of communities, advancement of nursing knowledge and practice and /or impacts health care delivery.
6. Faculty and students participate in interprofessional education and practice.
7. Provide DNP graduates the ability to address patient care needs in the delivery of innovative health care within communities while recognizing their unique placement and leadership in the nursing workforce.

PROGRAM OUTCOMES

1. Integrate specialized knowledge, theories, and research from nursing science and related disciplines for application to nursing practice;
2. Assume leadership roles as advanced clinicians, nurse educators, and/ or administrators;
3. Demonstrate accountability in nursing practice according to accepted standards of patient care and safety;
4. Use information technology to translate research findings into evidence-based practice at the individual and health system levels;
5. Affect desired change by developing and implementing policies at different levels of the health care system and with different constituencies;
6. Provide multidisciplinary leadership through analysis of critical indicators within health care systems to provide optimal client care and safety; and
7. Demonstrate advanced knowledge and skill in planning and delivery of health management.

GOALS	PROGRAM OUTCOMES
1. Provide excellence in teaching and lifelong learning through cross institutional curricular and experiential collaboration.	Integrate specialized knowledge, theories, and research from nursing science and related disciplines for application to nursing practice; (OUTCOME # 1)

	Demonstrate advanced knowledge and skill in planning and delivery of health management. (OUTCOME #7)
2. Offer the highest quality Doctor of Nursing Practice collaborative program to meet regional and state workforce needs.	<p>Integrate specialized knowledge, theories, and research from nursing science and related disciplines for application to nursing practice; (OUTCOME #1)</p> <p>Demonstrate accountability in nursing practice according to accepted standards of patient care and safety; (OUTCOME #3)</p>
3. Preserve and protect diversity and inclusion of people and ideas through availability of opportunities for students and faculty.	Affect desired change by developing and implementing policies at different levels of the health care system and with different constituencies; (OUTCOME #5)
4. Impact systems and policies through professional leadership in the academic and healthcare communities.	<p>Assume leadership roles as advanced clinicians, nurse educators, and/ or administrators; (OUTCOME #2)</p> <p>Provide multidisciplinary leadership through analysis of critical indicators within health care systems to provide optimal client care and safety (OUTCOME #6)</p>
5. Engage in faculty and student research/scholarly activities that leads to improvement in the health of communities, advancement of nursing knowledge and practice and /or impacts health care delivery.	Use information technology to translate research findings into evidence-based practice at the individual and health system levels; (OUTCOME #4)

<p>6. Faculty and students participate in interprofessional education and practice.</p>	<p>Integrate specialized knowledge, theories, and research from nursing science and related disciplines for application to nursing practice; (OUTCOME #1)</p>
<p>7. Provide DNP graduates the ability to address patient care needs in the delivery of innovative health care within communities while recognizing their unique placement and leadership in the nursing workforce.</p>	<p>Demonstrate accountability in nursing practice according to accepted standards of patient care and safety; (OUTCOME #3)</p> <p>Affect desired change by developing and implementing policies at different levels of the health care system and with different constituencies; (OUTCOME #5)</p>
