Clinical Dress is worn when providing patient care in the hospital.

1. The scrub color of the College of Nursing uniform is ceil blue. All scrub tops must have the CON monogram. Scrubs must be clean and free of wrinkles and provide complete coverage from the shoulders to the feet. Each scrub set (top and pants) should be purchased from the same company (Landau, Cherokee, etc.) so the colors will match.

The style of the scrubs is up to the student; however, the following types of scrubs are not permitted:

- a. Scrubs tops that expose the stomach and/or lower back. Tops must either cover the pants to the hips or be tucked inside the pants. Under no circumstances should your stomach or lower back show. Turn, squat, and bend when trying on scrubs to make sure they provide appropriate coverage with activity.
 - b. Scrub pants secured only by a drawstring. Pants must be secured at the waist level — not at the hips — and stay there. Pants which are secured with an elastic waistband in addition to the drawstring are more secure.
 - c. Scrub pants which end in cuffs at the ankles. Pants should have hemmed leg openings.
2. Non-porous and continuous surface (no holes, NO tennis shoes) shoes are required in all clinical facilities. Acceptable shoe colors are solid white, black, navy, or ceil blue. Neon and fluorescent colors/symbols, designs, signs and stickers are not acceptable. Clogs are acceptable if they have a completely solid top and a strap which secures around the heel. Athletic shoes are acceptable if they are made of a fluid resistant material (no woven or webbed tops). Shoes must be kept clean. Socks and/or hose must be worn with shoes.
 3. Underwear must be worn. Choose full white or flesh colored underwear with no emblems or decorations that show through.
 4. Colognes, perfumes, and scented lotions/powders are not permitted in the clinical setting.
 5. A long sleeve or short sleeve white or navy crew neck shirt can be worn underneath the scrub top for additional warmth. The under shirt should be of sufficient thickness to be opaque. If a long sleeve shirt is worn, the cuffs must be tight enough to allow the sleeves to be pushed up and out of the way if needed. T- Shirts with logos or designs are not appropriate. Thermal or silk long underwear is not appropriate as an undershirt.
 6. Lab jackets having CON Logo are to be worn over the scrubs for additional warmth except when providing direct patient care. Sweatshirts, hoodies, and sweaters may be worn to the clinical site but may not be worn in patient care areas.

Other tools needed:

Stethoscope Information: no restrictions as long as it has a bell and a diaphragm

Manual Blood Pressure Cuff

Pen light
