*This seminar explores the visual and material culture of East Asia through the recurring motif of the four seasons and their close ties to artistic and creative expression. Organized thematically by winter, spring, summer, and autumn, the course examines how artists, patrons, and viewers across China, Japan, and Korea have represented nature's cycles to articulate philosophical ideas, social values, and emotional sensibilities. Through diverse media, including traditional ink painting, ceramics, decorative arts, garden design, photography, and contemporary installation, students will study the interrelationship between time, landscape, and embodiment in East Asian art. The course also considers how the shifting seasons structure rituals, poetic imagination, and artistic production, as well as how modern and contemporary artists reinterpret these traditions in response to industrialization, ecological crisis, and globalization.*

*Highlighting photography's active role as a social-formation mechanism since photography's arrival in Asia in the mid-19th century, this course From early European photographer's lens of the "Orient" to the contemporary artist's vibrant new visions, this course, from the perspective of cultural history, hopes to open up the discussion about the world history of photography and Asian studies by engaging with concepts such as imperialism, orientalism, modernity, and epistemology. We will examine how photography was used in the service of an array of areas including but not limited to ethnography, journalism, propaganda, tourism, documentation, and of course, art.*

Course ID	Title	CRN	Credits	Days	Start Time	End Time	Building	Room	Meeting Type	Instructor	Dept.	Max Enroll.	Actual Enroll.	Seats Left	Gradable
BIOL-1010-200	Biology of Your World	14459	3	TR	04:30 PM	05:50 PM	A019	131	Class	CUMMINS	BISC	128	108	20	Y

*\*\*BIOL 1010-900 is an ONLINE course offered through the ETSU Biological Sciences Department and REQUIRES A PERMIT to register. Send permit requests along with your E# and course CRN to youngtl@etsu.edu. PLEASE BE SURE TO ALSO REGISTER FOR THE CORRESPONDING ONLINE LAB SECTION, BIOL 1011-900, CRN 14462, WHICH WILL ALSO REQUIRE A PERMIT. \*\* Students will not be required to meet on campus or online at scheduled times. A distance learning laboratory kit is required, and it will be provided by your instructor at no extra charge. For minimum system computer requirements and additional information, please go here: [https://www.etsu.edu/onlinehelp/student\\_help/tech\\_resources.php](https://www.etsu.edu/onlinehelp/student_help/tech_resources.php) (you will need to copy/paste the link). Please be advised you will be responsible for watching/listening to lectures on D2L and completing assignments and assessments by the posted deadlines for each. You will be required to submit electronic photos of yourself performing the home-based lab exercises in order to receive full credit. Other requirements will be addressed by the instructor. Students wishing to attend a campus-based classroom section must enroll in a different section of BIOL 1010. \*\*Textbook required for the online BIOL1010 or BIOL1020 is different from the on-ground courses BIOL1010 or BIOL1020 courses. If you plan to use the same book, be advised to take both the*

*Digital Audio Fundamentals. This course provides a hands-on creative course covering the theory, technology, and artistic methods used to craft and disseminate digital audio. Topics may include the digital age's influence on our use of audio including the role of computers in audio production, processing, and design, and the role of digital audio in our everyday lives with a focus on tools. For more information, email Prof. David Tarnoff (tarnoff@etsu.edu).*

*The course covers the military aspects of the period preceding the war (from 1815), the war itself (1914-1918), and the immediate aftermath (to 1939). The course focuses on military operations during the period 1914-1918. Students begin with an overview of the strategic environment and the political context for the military struggle. Students then receive an orientation to relative advantages and disadvantages of contemporary military organizations, tactics, equipment, technology, rank structures, and living conditions. Students will develop analysis tools based upon the Principles of War; use the tools to analyze the conduct of selected military operations from the perspectives of both sides; and use the results of the analysis to suggest lessons and improvements that would benefit future military operations. The course concludes with a discussion of the Armistice and Treaty that ended the War and the impact on the strategic conditions that set the stage for the world's next global conflict.*

*Many of the most decisive turning points in the history of the world have been battles. More than just conflicts between armies, such moments often represent fundamental clashes among rival religions; cultures; and social, political, and economic systems. The outcomes of these battles have dramatically transformed and shaped the course of history, often sending it on unexpected or completely new paths. This course examines twenty-five such pivotal moments by studying weapons and doctrines of the time, analyzing tactical actions in detail, highlighting and exposing critical points or personalities responsible for the battle outcomes, and reflecting upon the near- and long-term strategic significance of those outcomes.*

\*\*\*Course description: The Cell Biology course will explore the complex structures and functions of the cell, from the molecular level of organelles to intercellular interactions. Topics covered include nuclear organization and function, mitochondrial bioenergetics, and the dynamic properties of the cytoskeleton. Furthermore, the course will investigate mechanisms of membrane transport, signal transduction pathways, and the regulation of cell growth and programmed cell death. A thorough understanding of these fundamental cellular processes will provide insights into the origins of life, the pathogenesis of disease, and the development of potential therapeutic interventions. Required Textbooks (students are expected to acquire both texts, or at minimum, one of the following): 1) Alberts et al., *Molecular Biology of the Cell, 7th Edition, 2022 (W.W. Norton & Co)*. 2) Lodish et al., *Molecular Cell Biology, 9th Edition, 2021 (MacMillan Learning)*.

BIOL-3150-800	Cell Biology	14472	3	MWF	10:30 AM	11:25 AM	A709	1022	Class	ARUNAGIRI	BISC	50	41	9	Y
BIOL-3150-888	Honors: Cell Biology	15298	3	MWF	10:30 AM	11:25 AM	A709	1022	Class	ARUNAGIRI	BISC	0	1	-1	Y

\*\*\*This course offers hands-on training in the essential experimental techniques used to investigate the molecular biology of the cell and address questions in the biomedical field. Students will gain practical proficiency in core methods, including cell viability analysis, immunocytochemistry for characterizing organelles and cellular components, and biochemical analysis for protein characterization. The course reinforces theoretical knowledge and incorporates project-based learning to build skills directly relevant to both academic research and entry-level biotechnology positions. Additionally, students may have the opportunity to explore advanced methods like live-cell imaging to track dynamic cellular processes, dependent on instrument availability.
