This class is offered for students that are 100% online with their course schedule. Class meets asynchronously online. Testing will be conducted live, on campus or at an approved proctoring site if living out of the local area. Students with special circumstances who are unable to be tested as described should contact the instructor. Students will need to have a reliable computer and internet access to complete course requirements. For further information, contact the instructor.

Ceramics: Molds & Multiples This course explores plaster mold-making as a creative method for ceramic practice. Students investigate plaster mold-making, tile-making and slip casting while learning to create prototypes and explore repetition through ceramic casting and assembly. The course also introduces basic digital fabrication methods, including custom tool making through plastic and clay printing, as ways to expand approaches to form, process, and ceramic production.

This course explores subjects including the subconscious, mysticism, supernatural phenomena, fictional and fantastical narratives, and ritual practices as sources for art making. Historical and contemporary visionary artists using symbolism, the occult, mythology, abstraction, intuitive painting, spiritualism, abstraction, divination, and expressive arts in their studio practice will be introduced. Students will create a series of guided studies and visual experiments while gathering additional readings, visual references, and other relevant materials to develop their own areas of interest within the broader topic, using concepts and techniques rooted in traditional and/or nontraditional painting. Other media that might integrate meaningfully with painting may be considered on an individual basis. Each student will work to develop a personal codex of material and immaterial parameters for making conceptually cohesive works. This framework will guide the creation of a culminating, self-directed series of three or more paintings to be presented alongside documentation in the form of studies, sketches, visual research, and readings.

***BIOL 1010-900 is an ONLINE course offered through the ETSU Biological Sciences Department and REQUIRES A PERMIT to register. Send permit requests along with your E# and course CRN to youngtl@etsu.edu. PLEASE BE SURE TO ALSO REGISTER FOR THE CORRESPONDING ONLINE LAB SECTION, BIOL 1011-900, CRN 82505, WHICH WILL ALSO REQUIRE A PERMIT. ** Students will not be required to meet on campus or online at scheduled times. A distance learning laboratory kit is required, and it will be provided by your instructor at no extra charge. For minimum system computer requirements and additional information, please go here: https://www.etsu.edu/onlinehelp/student_help/tech_resources.php (you will need to copy/paste the link). Please be advised you will be responsible for watching/listening to lectures on D2L and completing assignments and assessments by the posted deadlines for each. You will be required to submit electronic photos of yourself performing the home-based lab exercises in order to receive full credit. Other requirements will be addressed by the instructor. Students wishing to attend a campus-based classroom section must enroll in a different section of BIOL*

*1010. **Textbook required for the online BIOL1010 or BIOL1020 is different from the on-ground courses BIOL1010 or BIOL1020 courses. If you plan to use the same book, be advised to take both the courses as online or on-ground.*

****Course description: The Cell Biology course will explore the complex structures and functions of the cell, from the molecular level of organelles to intercellular interactions. Topics covered include nuclear organization and function, mitochondrial bioenergetics, and the dynamic properties of the cytoskeleton. Furthermore, the course will investigate mechanisms of membrane transport, signal transduction pathways, and the regulation of cell growth and programmed cell death. A thorough understanding of these fundamental cellular processes will provide insights into the origins of life, the pathogenesis of disease, and the development of potential therapeutic interventions. Required Textbooks (students are expected to acquire both texts, or at minimum, one of the following): 1) Alberts et al., Molecular Biology of the Cell, 7th Edition, 2022 (W.W. Norton & Co). 2) Lodish et al., Molecular Cell Biology, 9th Edition, 2021 (MacMillan Learning).*

By the end of 1815, Europe was finally at peace. After years of warmaking, Napoleon languished in exile on Saint Helena, slowly dying of an ulcer while monarchy and (supposedly) stability were restored in Europe. The illusion of European stability endured through the rest of the 19th century, and at the dawn of the 20th century, things looked bright. Thanks to scientific and technological development, electric lights illuminated city streets, journeys that once had taken days now took hours, people lived longer and healthier lives, and a growing share of the population could read, write, and vote. Scientific progress led to social progress; war was a thing of the past—or so many Europeans thought. As the Austrian writer Stefan Zweig put it, "People no more believed in the possibility of barbaric relapses, such as wars between the nations of Europe, than they believed in ghosts and witches." Why, then, did 20th century Europe come to be defined by total war, ethnic cleansing, and fierce ideological conflict? This course will tackle the history of Modern Europe by questioning the inevitability of progress and closely examining the particular people, decisions, and political movements that determined the course of Modern European history. Along the way, we will gain an understanding of topics including industrialization, mass politics (nationalism, fascism, communism), gender and sexuality, colonialism and decolonization, and migration. Throughout the course, we will ask how historical actors defined Europe and to what ends, as well as who has been imagined to be included in and excluded from belonging to Europe.

The course studies the history of various ancient armies, 2500 BCE – 1453 CE by studying their organizational structure, weapons, and the degree to which cultural values and imperatives shaped the form and application of military force. We will examine these armies' tactical doctrines and specific operational capabilities to seek explanations for how they were shaped by technological opportunities and limitations along with social and cultural norms. Students should leave this course equipped with a greater appreciation of how ancient societies formed armies, used technology, and waged warfare. The tools you will learn in this course, such as critical thinking, greater historical perspective, written communication, and a more sophisticated ability to engage in professional discourse can be transferred seamlessly to any major field and any profession.

HIST-3950-001	Special Topics in History: War	12396	3	TR	08:35 AM	09:55 AM	A021	124	Class	DONNELLY	HIST	30	2	28	Y

Students will discover and understand the historical background that set the stage for the conflict, the events that led directly to the war, an overview of the major issues involved at home and abroad, and the major impacts of the culmination of the conflict in 1975. The focus of the course is on the military and civil-military aspects of the Wars, beginning with the introduction of advisors in 1950, thru the peak of the US involvement, 1965-1970, until the end of direct US military involvement in 1973. In this focal period, we will examine the function and military actions of US, Republic of Vietnam, Democratic Republic of Vietnam, and Viet Cong organizations, technology, tactics, and paramilitary operations within the area of operations. This course will cover the diplomatic, informational, social, and economic aspects of the Wars, including those actions and effects leading to, during, and following the conflict.

When Europeans first encountered the New World, they found an enchanting and limitless land that intensified their scientific endeavors and ignited their imagination. Soon, mathematicians and geographers became inundated with new information which they tirelessly compiled into ever-changing images of new discoveries. Meanwhile, rumors of sea monsters, exotic civilizations, and untold riches filled the halls of royal courts across Europe. Over the course of several centuries, the Americas transformed from an unknown space into a surveyed and bordered landscape where empires clashed and new nations were born. This class explores the development of the early Americas through historical maps. Using maps as our sources, we will investigate how Europeans and Indigenous people viewed the Americas and how they rendered the world around them into images that tell the story of human ambition and technological triumph.

On first thought, we might wonder if the body has a history at all. Everyone is born into a body, ages in that body, and dies in that body. This has always been true. But human conceptions of what a body is, how it works, how it should look, and how it relates to the mind or soul have changed wildly over time. This course examines how understandings and meanings of the body have changed from the 1870s to the present. We will focus on the history of the body in Europe and its relationship to colonialism, nationalism, medicine, war, Nazism, reproduction, the environment, beauty, and sports. By connecting the body to these historical developments, we will ask: How did different political regimes in Modern Europe used the body? And: How have concepts like the "normal," "ideal," "average," or "European" body been historically constructed? Along the way, we will see how scientific knowledge has penetrated deeper into the body over time: it was once taboo for physicians to look directly at their patients' bodies, but over the past 150 years, medical techniques including palpitation, drawing blood, dissection, surgery, X-ray imaging, and DNA analysis have become routine. These techniques have ushered in a revolution in health and longevity, but they have also often been deployed without full consideration of their ethical implications. We will explore what this ever-deeper penetration means for how we understand bodies and the historically specific contexts from which these practices arose. (For example: did you know the stethoscope was invented by a physician who did not want to place his head too near his female patients' breasts to protect their modesty?) This is a seminar-style, discussion-based class, and its success depends on all members' active participation. Readings will focus on Germany, France, Britain, Czechoslovakia, Sweden, Russia, Austria, and beyond.
