About the ASRF

The Appalachian Student Research Forum is an annual event hosted by East Tennessee State University. The Forum brings together undergraduate, graduate, medical and pharmacy students, post-doctoral fellows and medical residents to present their original research in a formal, juried setting.

Beginning in 1985 as a program within the Medical School with only 19 participants, the 2021 Forum will host over 70 participants from East Tennessee State University presenting in fields as diverse as nursing, medicine, pharmacy and public health; chemistry, biology, economics and other natural, physical and social sciences; computing and engineering; education, and the humanities.

A cadre of distinguished researchers, faculty and physicians evaluate and award top prizes for presentations for which all levels of participant are eligible.

In past years the Forum culminated with an awards presentation, a moment of recognition for ASRF partners, and a keynote address given by a nationally-recognized researcher. In 2019 the Forum was honored to partner with The Tennessee Valley Authority (TVA) to promote an environmentally sustainable Forum and foster environmental education. Past presenters include Dr. Shilpa Buch, a leading researcher in the connection between HIV and drug abuse; Dr. Richard Ignace, an ETSU professor in the Department of Physics and Astronomy; Dr. Karl H. Hasenstein, whose research into the use of high-gradient magnetic fields as surrogate for gravity resulted in a successful space experiment onboard a Space-X3 flight.

The Forum is organized by the ETSU Office of Research and Sponsored Programs Administration with input from the ASRF Faculty Advisory Committee. To learn about past ASRF events, please visit:
