

**Second Grade Newsletter**  
**Friday, February 28, 2020**

Dear Families,

We have been enjoying learning about forces, motion, interactions, and energy. Next week we will continue this learning as well as learn about waves and their applications.

In Math we have been continuing to work hard on telling time. We will continue practicing this skill with some advanced problem solving next week. When we return from break we will shift into measurement.

In Language Arts we have been working on all our literacy skills and on our Flat Stanley project. We are excited to get these out into the mail next week so be sure and return the Flat Stanley forms on Monday. Next week is also Read Across America week and we will be dressing up. See the enclosed dress up information.

☺ Dr. Kelli

**Questions to Ask Your Child:**

- Tell me about forces and motion and how they interact.
- What is friction?
- How does it impact the motion of an object?
- Show them an analog clock and ask them to tell you the time.
- What kind of adventure do you hope your Flat Stanley goes on?

**Announcements:**

- Friday, March 6<sup>th</sup> is our last day of school for the quarter. We will return on Monday, March 30<sup>th</sup> for our last quarter of second grade.
- Friday, March 6<sup>th</sup> will be Ms. Kayla's last day in second grade. She will move to 5<sup>th</sup> grade for the remainder of her semester. We have enjoyed her so much and she has been a huge asset to our class.
