

## **Second Grade Newsletter**

**Friday, March 6, 2020**

Dear Families,

We enjoyed experimenting with forces, motion, interactions, and energy. We also began learning about waves and will continue this into next quarter.

In Math we wrapped up telling time. When we return from break we will shift into measurement.

In Language Arts we really enjoyed our Flat Stanley project. Those have been mailed so give your recipients a heads up that they are on the way. We have enjoyed Read Across America week and have enjoyed a variety of other literacy activities.

Today was Ms. Kayla's last day in second grade. She has been a wonderful residency student and we will miss her! Next quarter we will welcome a new residency student when we return.

We have worked so hard this quarter and I'm so proud of all second graders!

☺ Dr. Kelli

### **Questions to Ask Your Child:**

- Tell me about energy.
- Tell me about waves.
- Is it am or pm right now?
- Tell me about your Flat Stanley journal.
- What do you hope to accomplish in your last quarter of second grade?

### **Announcements:**

- Friday, March 6<sup>th</sup> is our last day of school for the quarter. We will return on Monday, March 30<sup>th</sup> for our last quarter of second grade.
