

Hey there! My name is Hunter Oliver, and I am so excited to work another year here in second grade. Ms. Kelli is THE BEST!!!

I was born and raised in Johnson City and graduated from Science Hill High School. UH is so much better. ☺

While at SHHS, I was a thrower and sprinter for Track and Field. I studied in various clinical settings and loved my experiences in the medical field. By the time I graduated high school, I realized that my love for teaching young students and spending positive experiences with them was worth more to me than any medical degree could offer.

From that point on, I started applying for jobs that would help me accomplish my goals to inspire and motivate students. I started working as a head life guard at the Johnson City Country Club and later on as an America Reads Challenge Supervisor at ETSU. I currently work with middle school boys' basketball and high school baseball after school for UH. On the weekends, I direct Kid's Club at the Country Club.

I graduated from ETSU in May, 2017 with my Bachelor's degree in elementary education (licensure kindergarten through sixth grade). I plan on finishing my add-on in high school psychology and starting my Masters in K-12 School Counseling within the next two years. I would love to further my education to gain a better understanding of an efficient school system. Every day is an opportunity to learn and grow into a stronger student. Helping others is my passion.

It has been so nice to meet all of the new second graders.

I hope we have a blast this year working hard and playing hard.

Thank you!

Mr. Oliver
