

Second Grade Newsletter
Friday, September 7, 2018

Dear Families,

This week we have focused on soil, soil properties, and layers of soil. Next week we will learn more about worms, composting, and inside the Earth. We will also continue to work with maps and globes next week.

In math we have been learning to add with regrouping. We are getting the hang of it. We will continue this next week and will start next quarter with reviewing this skills before moving into subtraction with regrouping.

In language arts we are continuing to work hard on spelling, reading skills, parts of sentences, and we have also been focusing on character traits, setting, parts of a story, and story sequences.

We have worked hard all quarter and I can't believe it is almost time for break.

-Ms. Kelli

Questions to Ask Your Child:

- What do you know about layers of soil?
- What is inside the Earth?
- What is regrouping?
- Solve $28 + 9$. Do you need to regroup? How do you know?
- Tell me about the setting of Charlie and the Chocolate Factory.

Announcements:

- Picture day is Monday, September 10th.
- Please return the field trip form and money for the play we will be seeing next quarter next week.
- Our last day of the quarter is Friday, September 14th.
