

Graph-Story Assignment Rubric
Algebra I

A Range

The graph is neatly labeled with a title, appropriate scales on both axes, and units on both axes. The narrative clearly justifies all points where the direction of the graph changed. The narrative clearly justifies all segments of the graph. Slope is continuously described accurately within the story. Mathematical elements of the story flow well.

B Range

The graph is neatly labeled with a title, appropriate scales on both axes, and units on both axes. The narrative clearly justifies most points where the direction of the graph changed. The narrative clearly justifies most segments of the graph. Slope is described accurately within most of the story. Most mathematical elements of the story flow well.

C Range

The graph is neatly labeled with a title, appropriate scales on both axes, and units on both axes. The narrative clearly justifies some points where the direction of the graph changed. The narrative clearly justifies some segments of the graph. Slope is described accurately within some the story. Some mathematical elements of the story flow well.

Needs Revision, D, or F Range

The graph is not neatly labeled with a title, appropriate scales on both axes, or units on both axes. The narrative clearly justifies few points where the direction of the graph changed. The narrative clearly justifies few segments of the graph. Slope is seldom described accurately within the story. Mathematical elements of the story seem out of place.

*****If scored Needs Revision, revisions are due two days following return of the original.*****
