

Family Pedigree Project

For this project, you will collect hereditary information about your family members and produce pedigrees based on that information. Interview at least 5 family members to determine if they have the physical traits listed on the provided information cards. Once you have all the data listed on the cards, arrange the cards in a pedigree formation on a piece of poster board. On the same poster board, draw a pedigree for each trait listed on the information card (9 traits – so you should draw 9 pedigrees). The project will be graded according to the rubric below.

Completed and properly arranged info cards	4 points
<u>9 properly drawn and labeled pedigrees</u>	<u>36 points (4 points per pedigree)</u>
	40 points possible
